10.2 Vaccine reports

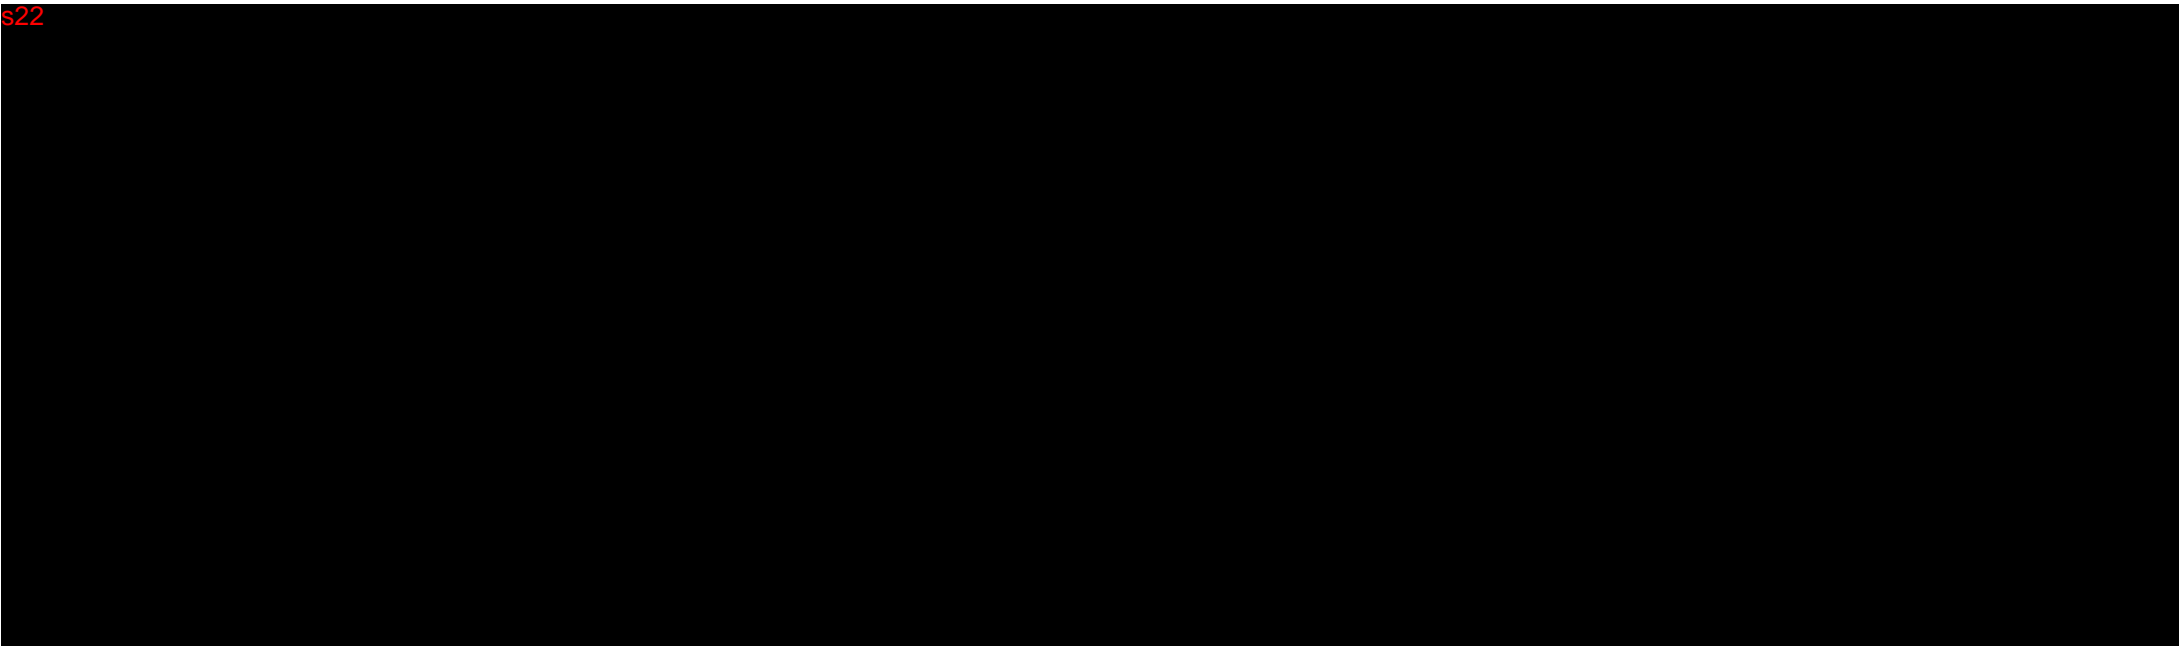

s22 [Redacted]

[Redacted] The number of reports associated with each vaccine is shown in the table below.

s22 [Redacted] Details of reactions associated with individual vaccines are shown in the Table, below.

s22 [Redacted]

Vaccine	No. reports	Inject. site reaction	Convulsion seizure	Fever/pyrexia	Dyspnoea/apnoea	HHE	Other important reactions / comments
s22							
DTPa-IPV-HiB-Hep B	6	1			1		Apnoea/hypoxia, bradycardia (s22) movement and sleep disorder (s22) allergic rash in twins (s22)
DTPa-IPV-Hep B	1						s22 - vomiting
Hepatitis B	1				1		Rash, syncope, dyspnoea (s22) – patient was given 9 vaccinations)
Hep A-Hep B	1						Testicular inflammation (s22)
HiB-Hepatitis B	11	4		3	1	2	HHE – s22 bradycardia, apnoea – s22 s22 both in babies born pre-term;
s22							

10.2.1 Widespread rash and dyspnoea with multiple vaccines

Report [REDACTED]

This report described a 46 year old male who received s22, Hib, hepatitis B, s22 vaccines all on the same day. Two days later, he presented to the emergency department with widespread rash (s22) and was again treated for widespread rash and (s22) dyspnoea s22

Members considered this may have been a delayed anaphylactic reaction and/or viral skin rash. It was unusual for this number of vaccines to be administered at the same time, but this person appeared to be travelling overseas in the very near future.
