Introduction

Australian Register of Therapeutic Goods

The publicly accessible version of the Australian Register of Therapeutic Goods is the reference database of the Therapeutic Goods Administration (TGA). It provides information on therapeutic goods that can be supplied in Australia.

Please note: the ARTG is a record of the contents and classification details of therapeutic goods. It is not intended to provide guidance, advice or recommendations on those goods.

Purpose

This document provides guidance on search options and conducting more complex searches on the ARTG

Quick Hints

1	Screen	Use a larger screen (desktop, laptop, or tablet) for optimum performance
2	Browser	Use chrome for fast loading time
3	Idle Time	If the search page is open and has not been used in a while, refresh the page using your web browser so that the system can reset the timeout
4	Help button	Use the help button for quick on-screen self-guidance - then click anywhere to return to normal display
5	Export Results	Hover above the top right of the Search Results table to display an ellipsis (...) that provides 'More options'. Select 'Export data', and select 'summary data' (the 'underlying data' option has no effect)
6	Filters	Expand the filters panel on the top right extreme part of the screen for additional filtering options
7	Visual Areas	Click on the visual areas (donut portion, donut list, days, bar, column, etc) to zoom into relevant ARTG entries
8	Focus Mode	Hover above the top right of the Search Results table and select the focus mode rectangle next to the ellipsis (...) to expand the table to full page view
9	Refresh page	Use refresh page / clear selections to reset your selections
10	Spelling Combinations	Check spellings or try singular/plural keywords if the search does not return results e.g. face mask instead of face masks
11	Page Navigations	Use back button above the Menu Items on the left instead of browser back button

Known Issues

The following table may help you understand odd behaviour observed, and possibly prevent you reporting on something we already know about. We will update this table as issues are found or resolved.

ID	Description	Comments
1	All X's displayed	The ARTG search tool will show all X's when there is a browser timeout. Refresh your screen using browser controls – see also FAQs.
2	Need to scroll right	The ARTG search tool is currently optimised for larger screens used without magnified settings. Use a desktop, laptop, or larger tablet for best viewing experience.
3	Mobile Responsiveness	The ARTG search has been developed for use with larger screens only at this stage. Mobile-friendly screens will be developed for future releases.

The Australian Register of Therapeutic Goods is a register of therapeutic goods that can be lawfully supplied in Australia. Searching for Device Manufacturers can be performed using the [Advanced Search - Medical Devices](#) page.

Search results from the ARTG include **Public Summary**, **Consumer Medicines Information (CMI)**, and **Product Information (PI)** documents. All CMI and PI documents are available on this website. In future Medical Device **Instructions for Use (IFU)** and **Patient Information Leaflets (PIL)** will also be available in the search results.

This search page covers information that is included on the ARTG. If you are looking for other information please go to the [TGA Website](#).

If you cannot find the medical device you are looking for in your search results, it may be suspended or cancelled from the ARTG. Suspended goods information can be viewed on the [TGA Suspensions web page](#).

Therapeutic goods that have been subject to compliance action can be found on our [Compliance web page](#).

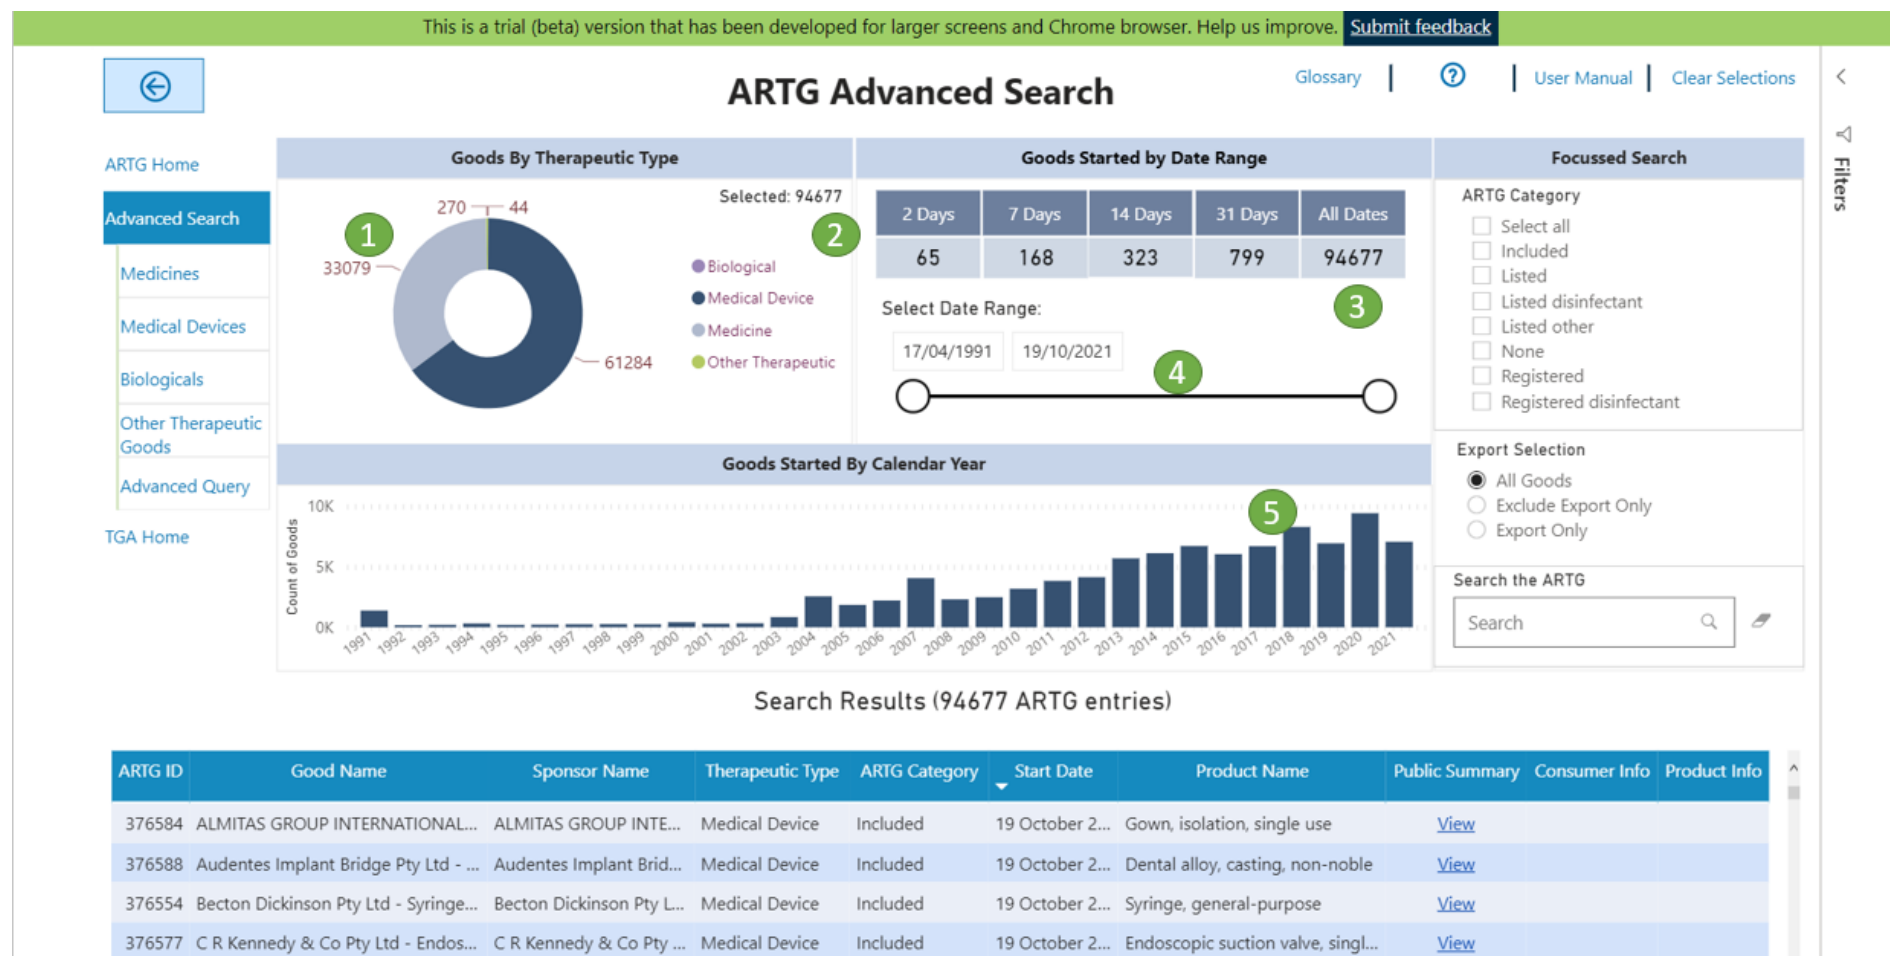

Search Elements – Home Page

1	Beta Banner	The beta banner has the following words “This is a trial (beta) version that has been developed for larger screens and Chrome browser. Help us improve.” The banner also has a button “Submit feedback” when clicked it takes you to a survey that you can fill in to help us improve
2	Heading	The heading includes the words ‘ARTG Search (active entries)’. The ‘Home’ page contains basic search of goods that are active in the ARTG. When a different dashboard, such as ‘Advanced search’ or ‘Medicines is in use, the dashboard name will be included in the heading.
3	Glossary	Select ‘Glossary’ to view a list of definitions used in the ARTG.
4	Refresh Page	Select ‘Refresh Page’ to remove all filtering that was previously selected.
5	Tabs	The tabs on the left of the dashboard provide a quick link to other dashboard views. Select a tab to open that view. Click advanced search to use additional general search criteria. Select a product type tab for product specific search criteria.
6	Search	This section helps you search ARTG entries by the “ARTG ID, Product Name, Good Name, Sponsor Name, Active Ingredient or Excipient”.
7	Search Results	The Search Results displays a summary of active goods in the ARTG. All goods are displayed until filtering is applied, then only the selected goods are displayed. The Search Results also provide a link to the good’s Public Summary document and to the Product Information (PI) and Consumer Medicine Information (CMI) documents where applicable. When a single therapeutic type is selected, most of the details that relate to goods of that therapeutic type will be displayed.
8	Export search results	Hover above the top right of the Search Results table to display an ellipsis (...) that provides ‘More options’. Select ‘Export data’ from the list to export the summary information contained in the Search Results to a CSV or Excel file. The full ARTG details can be exported by selecting each therapeutic type and exporting the full details. For the whole ARTG, that will require four exports, one for each therapeutic type.

9	General information and links	This section defines the ARTG and provides some links to information or documents that are commonly required.
---	--------------------------------------	---

Advanced search

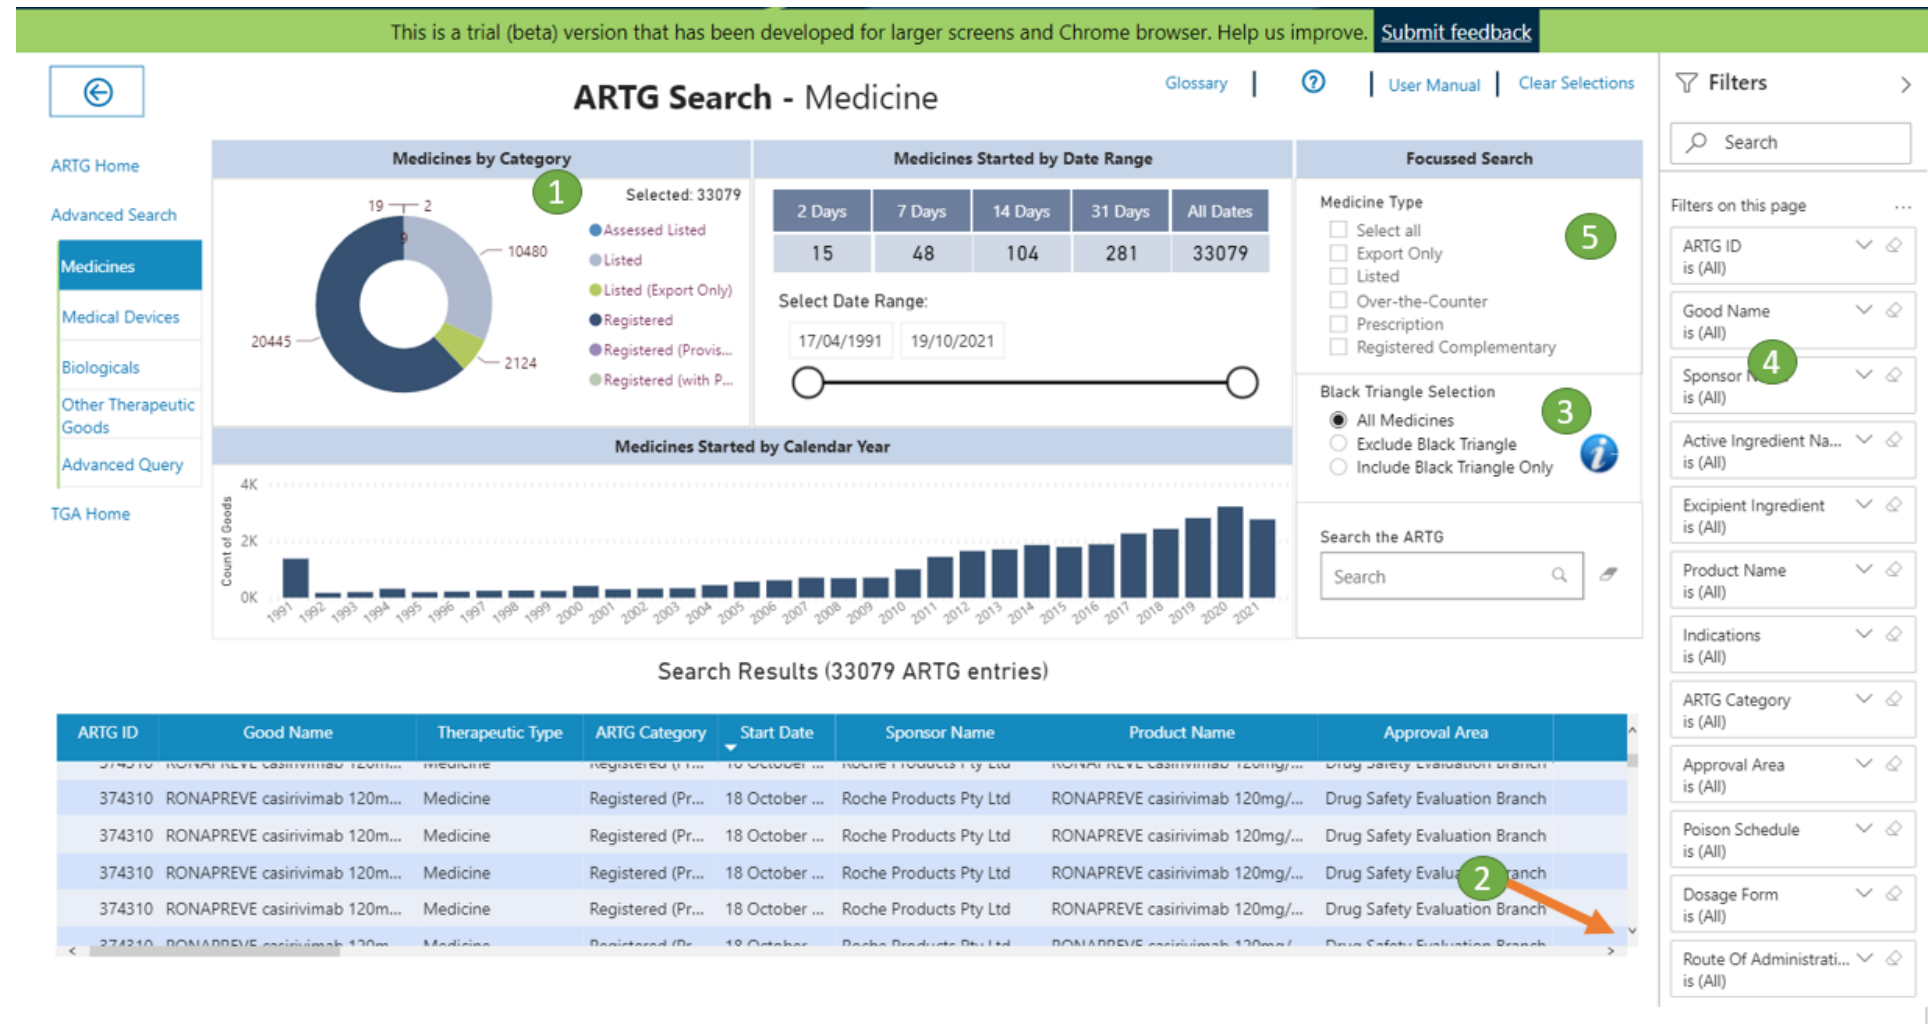

Use this page for an advanced search of all active therapeutic goods.

Additional search elements – Advanced Search

1	Goods by therapeutic type	The graphs shows a count of the goods in the ARTG that are active, categorised by therapeutic type. The number in the centre of the graph is a count of the selected goods. Click on a segment of the graph, or the label name in the legend, to display details about that therapeutic type in the dashboard.
2	Selected	The number displayed is the count of goods that have been selected using filtering options. If no filtering has been applied, the number displayed is the total goods that are active in the ARTG.
3	New goods started on the ARTG (predefined date range)	Click on a button to show only the goods that have started in the ARTG within the last 2, 7, 14 or 31 days in the Search Results.
4	New goods started on the ARTG	Select specific dates, either by entering the dates or moving the slider, to show only goods started on the ARTG within that date range.
5	Goods started by calendar dates	The graph displays a count of goods started on the ARTG in each calendar year since 1991 that are still active. Select a year to show only the goods that were started in that year on the dashboard.

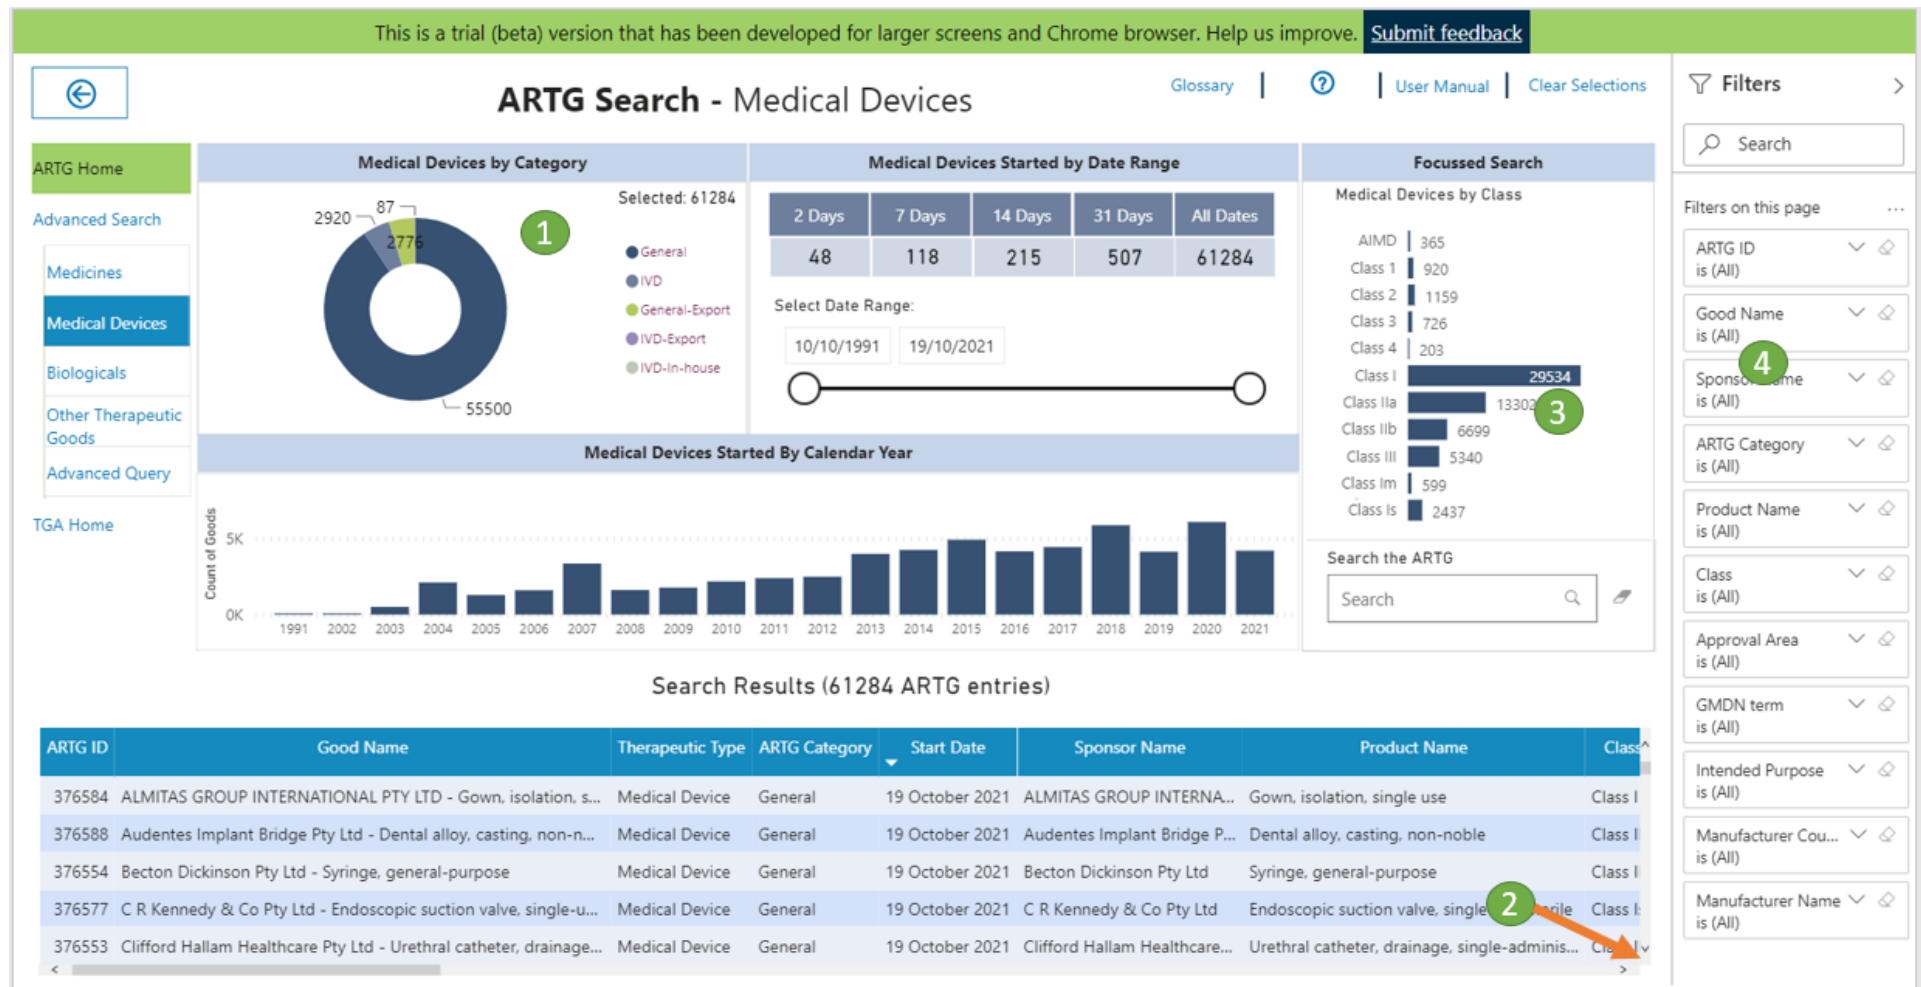

Medicines

Additional search elements - Medicines

1	Medicines Category	The graph displays a count of medicines in each category.
2	Search Results - Details	Most of the details that are displayed in the Public Summary document for Medicine goods are displayed in the Search Results. Use the horizontal arrow to scroll across the table to display more information. The details can be exported to a file by hovering over the last column heading and selecting the ellipsis (...).
3	Black Triangle Scheme?	Select Yes (Y) to display only the medicines that are in the Black Triangle Scheme. For more information about the Black Triangle Scheme, select the Information icon
4	Filters	Additional filtering options that are relevant for Medicine goods are available. Those that are not relevant, such as GMDNs, are not included in the filtering options in this view.
5	Medicine Type	Tick one or more boxes to display only those medicine types. If none of the boxes are ticked, all of the medicine types will be displayed unless excluded by use of other filtering options.

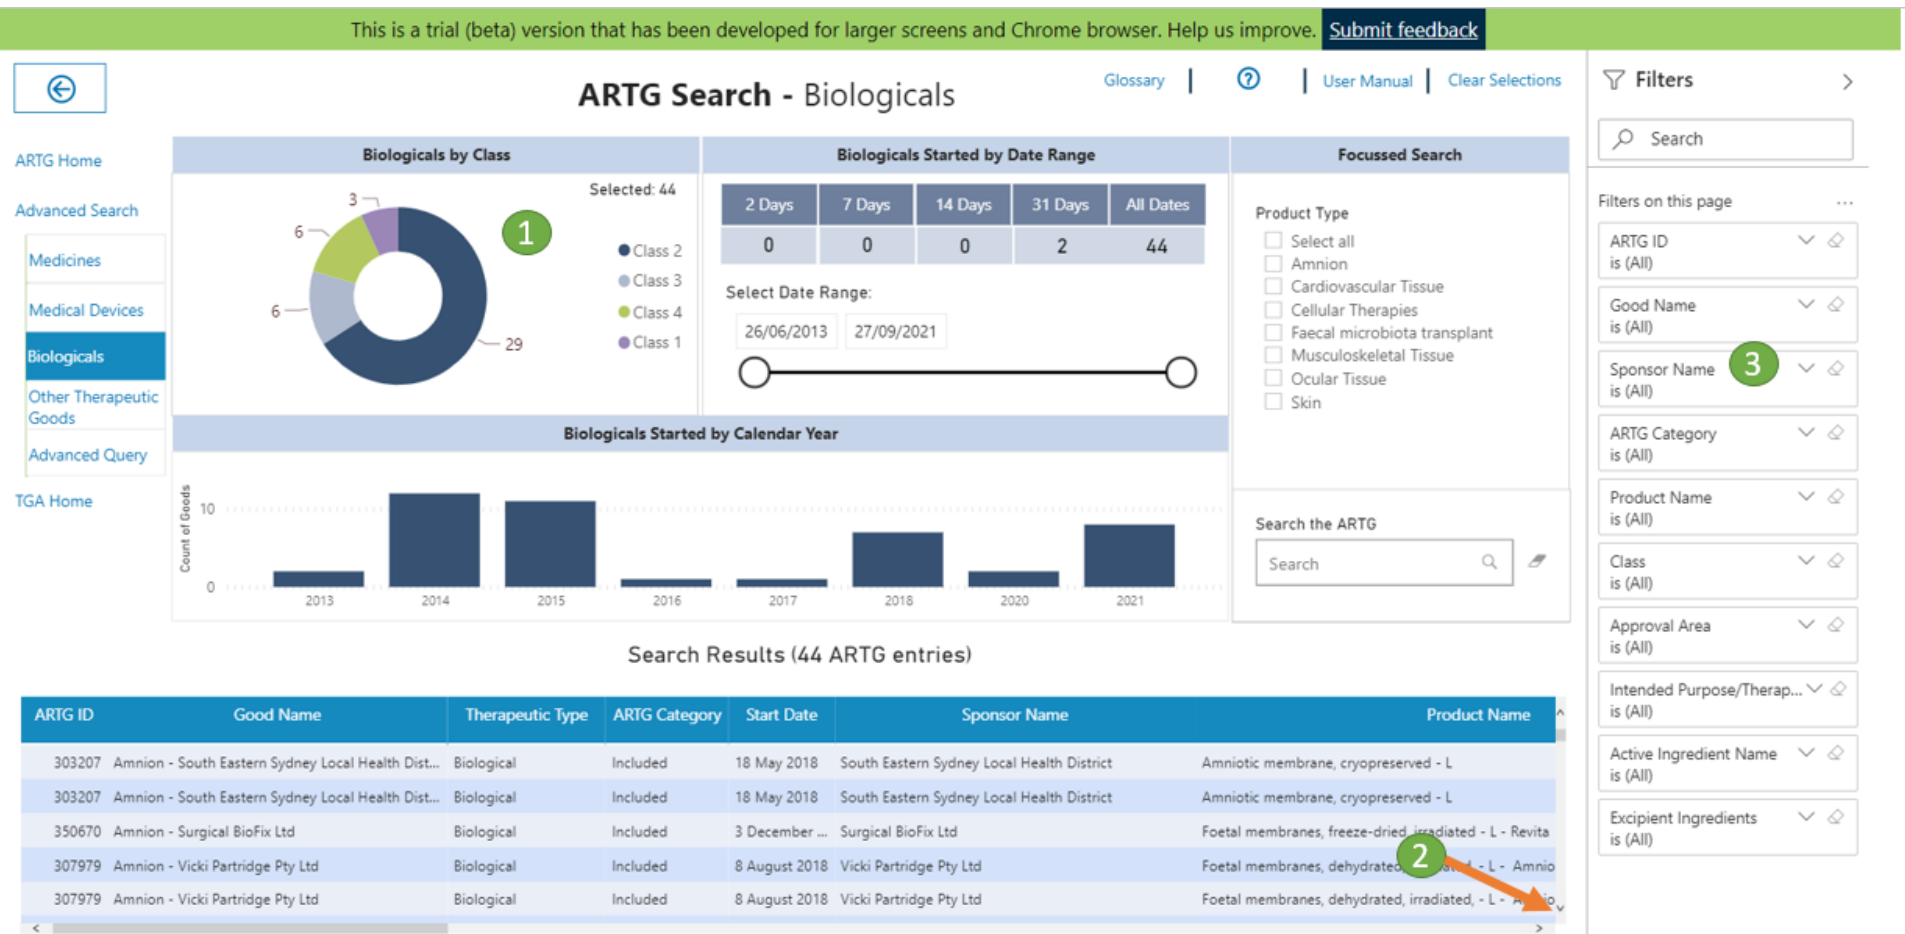

Medical Devices

Additional search elements – Medical Devices

1	Medical Devices Category	The graph displays a count of medical devices in each category. 'General' refers to inclusions that are not IVDs.
2	Search Results - Details	Most of the details that are displayed in the Public Summary document for Medical Device goods are displayed in the Search Results. Use the horizontal arrow to scroll across the table to display more information. The details can be exported to a file by hovering over the last column heading and selecting the ellipsis (...). Some Medical Devices contain multiple products, resulting in multiple columns. For example, if a good contains two products, then it will appear in two lines so that the different product details can be displayed.
3	Medical Devices by Class	The graph displays a count of the Medical Devices by class. Class 1, 2, 3 and 4 are IVDs. AIMD, Class I, IIa, IIb, III, Im and Is are 'General' medical devices, meaning that they are not IVDs.
4	Filters	Additional filtering options that are relevant for Medical Device goods are available. Those that are not relevant, such as ingredients, are not included in the filtering options in this view.

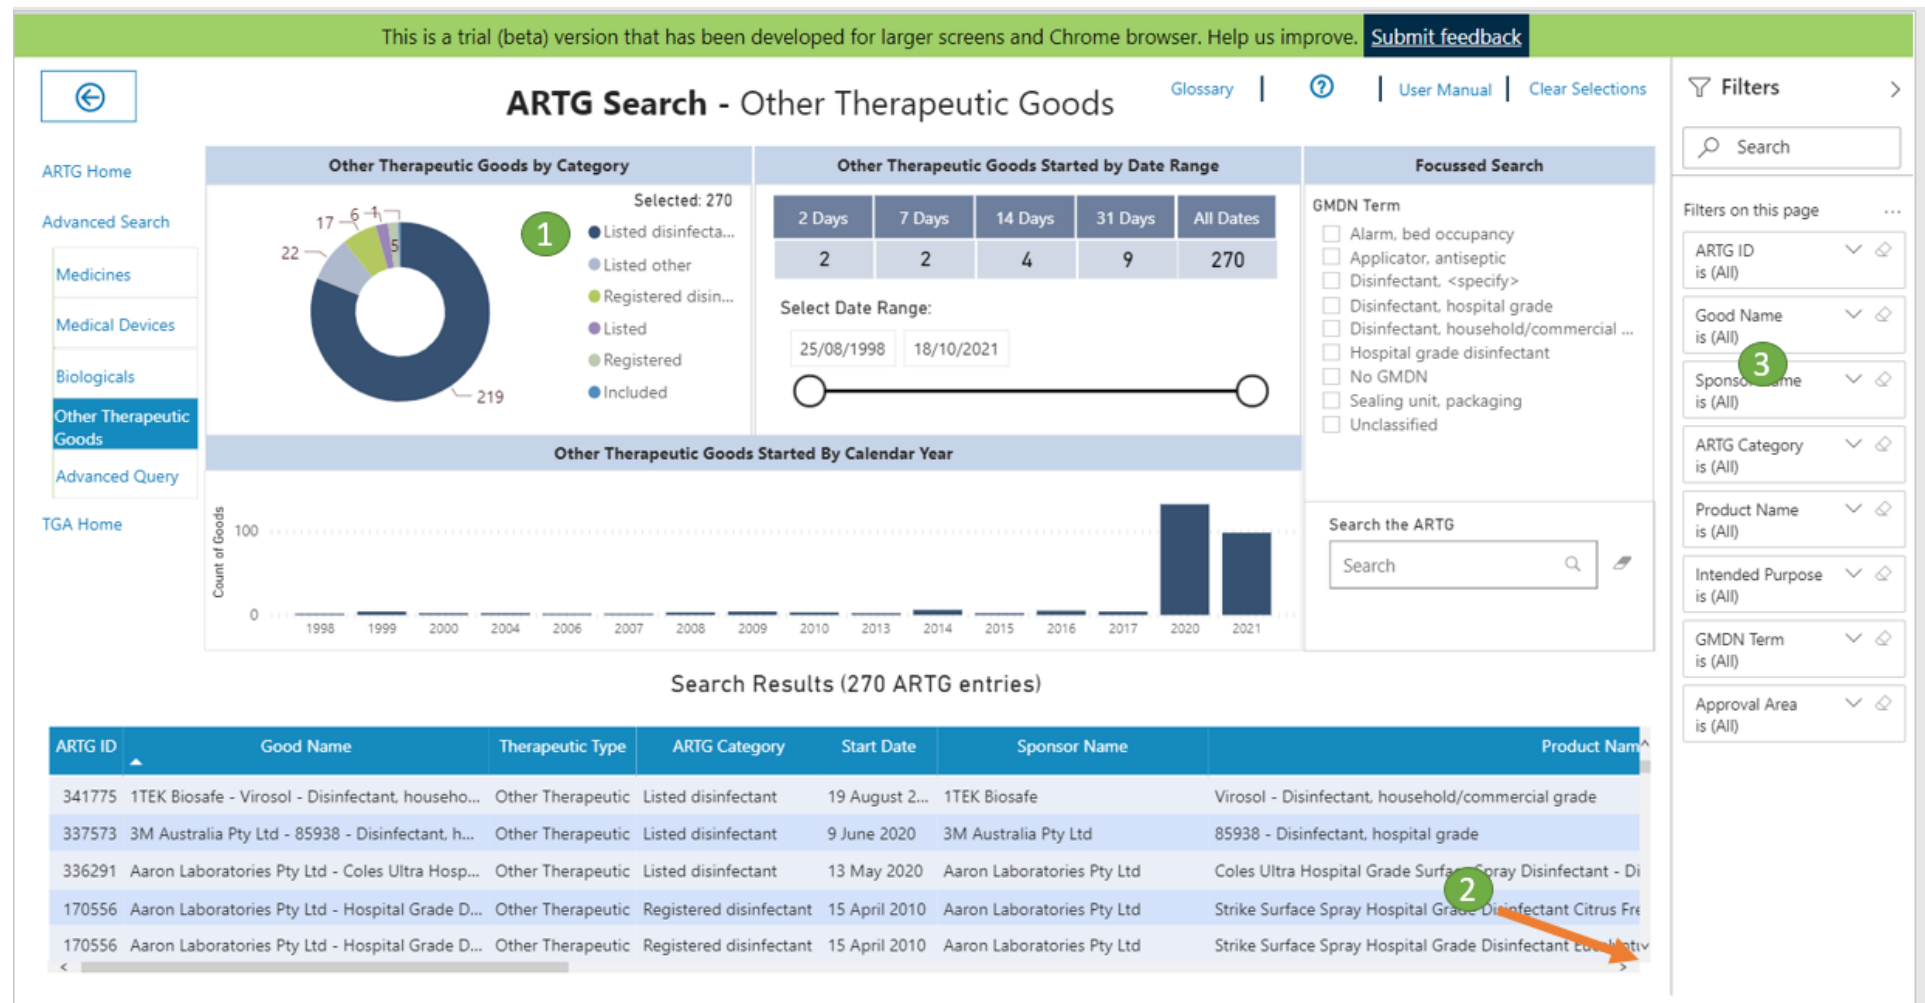

Biologicals

Additional search elements - Biologicals

1	Biologicals by Class	Unlike other therapeutic goods, all Biological goods have the same ARTG Category – Included. Instead of the donut graph that displays a count of Biologicals by ARTG Category, the count is displayed by class.
2	Search Results - Details	Most of the details that are displayed in the Public Summary document for Biological goods are displayed in the Search Results. Use the horizontal arrow to scroll across the table to display more information. The details can be exported to a file by hovering over the last column heading and selecting the ellipsis (...). Some Biologicals contain multiple products, resulting in multiple columns. For example, if a good contains two products, then it will appear in two lines so that the different product details can be displayed.
3	Filters	Additional filtering options that are relevant for Biological goods are available. Those that are not relevant, such as GMDNs, are not included in the filtering options.

Other Therapeutic Goods

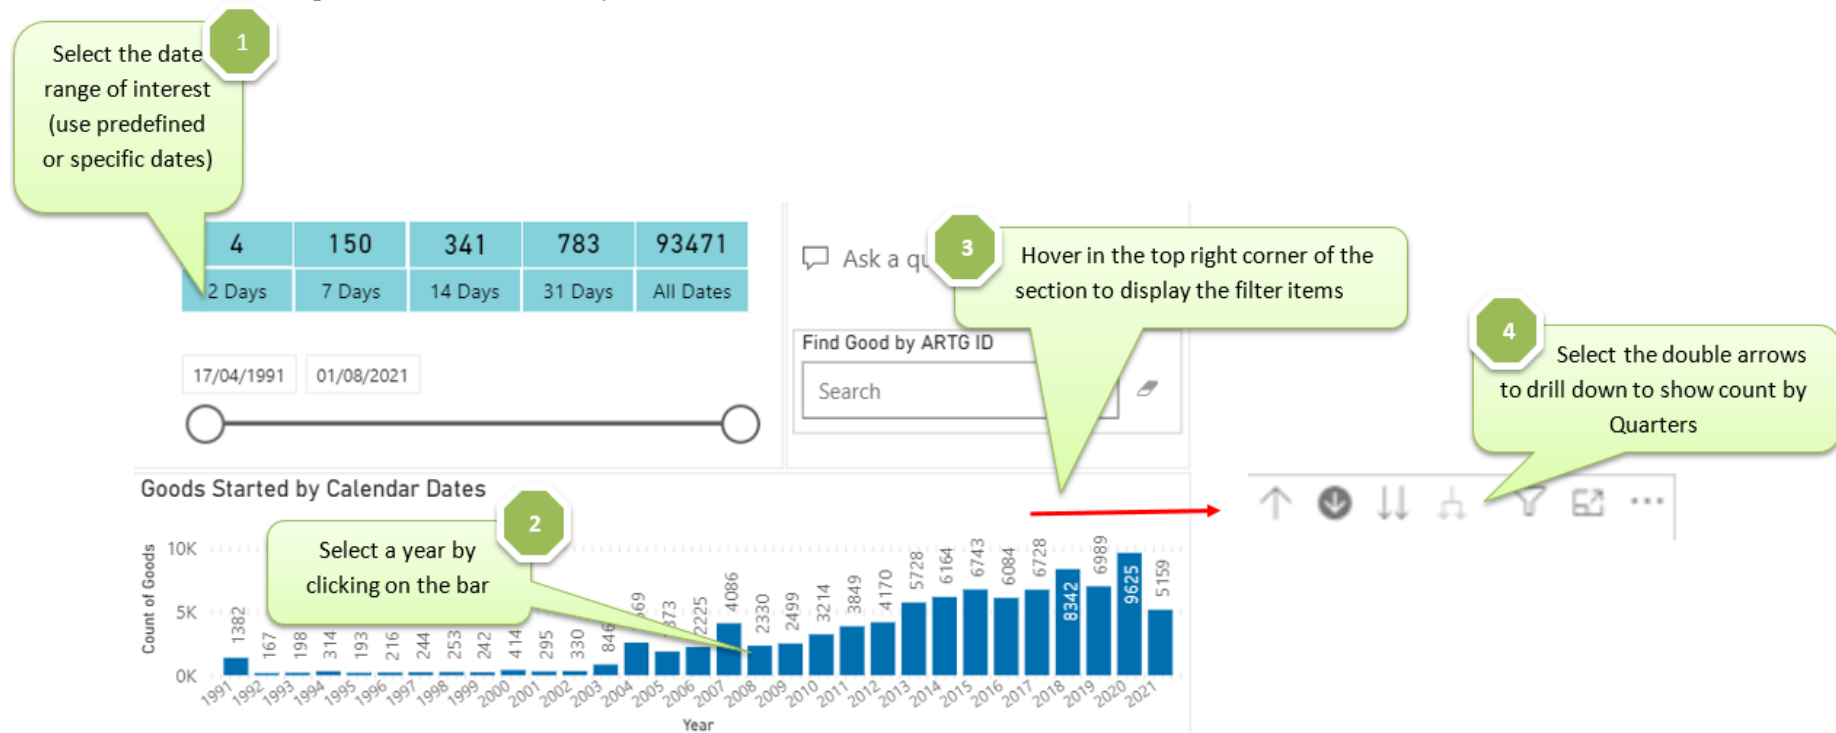

Additional search elements - Other Therapeutic Goods

1	Other Therapeutic Goods By Category	The graph displays a count of medical devices in each category.
2	Search Results - Details	Most of the details that are displayed in the Public Summary document for Other Therapeutic Goods are displayed in the Search Results. Use the horizontal arrow to scroll across the table to display more information. The details can be exported to a file by hovering over the last column heading and selecting the ellipsis (...). Some Other Therapeutic Goods contain multiple products, resulting in multiple columns. For example, if a good contains two products, then it will appear in two lines so that the different product details can be displayed.
3	Filters	Additional filtering options that are relevant for Other Therapeutic Goods are available. Those that are not relevant, such as Ingredients, are not included in the filtering options.

Search and Filtering hints

Drill down to show a count of goods started on the ARTG by Quarter, Month or Date

Basic and Advanced filtering options

Basic and Advanced filtering options are available on the right side of the dashboard in any view. Some of the options change, depending on which dashboard you are using. For example, in the Medicine dashboard the GMDN filter will not be available as it does not apply to medicines. The filters that apply to all therapeutic goods will be available in all views.

1 Click the arrow to the right of the data that you wish to search to expand the search pane.

2 By default, the filtering type is Basic

3 Enter all or part of the search criteria. Matching results will be displayed below.

4 Check the boxes to the left of the items you wish to select
Hint: hover over the word to see the full text

5 Click Apply filter for the selected items to be included in the Search Results table

The screenshot shows the 'Filters' panel on the left with a search bar and four filter categories: ARTG ID, Good Name, ARTG Category, and Therapeutic Type. The 'Good Name' filter is expanded, showing a search bar with 'paracetamol' and a list of results. The results list includes checkboxes for each item: PANADOL CHILD..., ZALDIAR tramad..., ADIRAMEDICA IB..., ADIRAMEDICA P..., ADVILDUO PARA..., AFT PHARMACE..., and AFT PHARMACE... The 'Apply filter' button is at the bottom of the results list.

1 You can select a filter value from the list by clicking the arrow

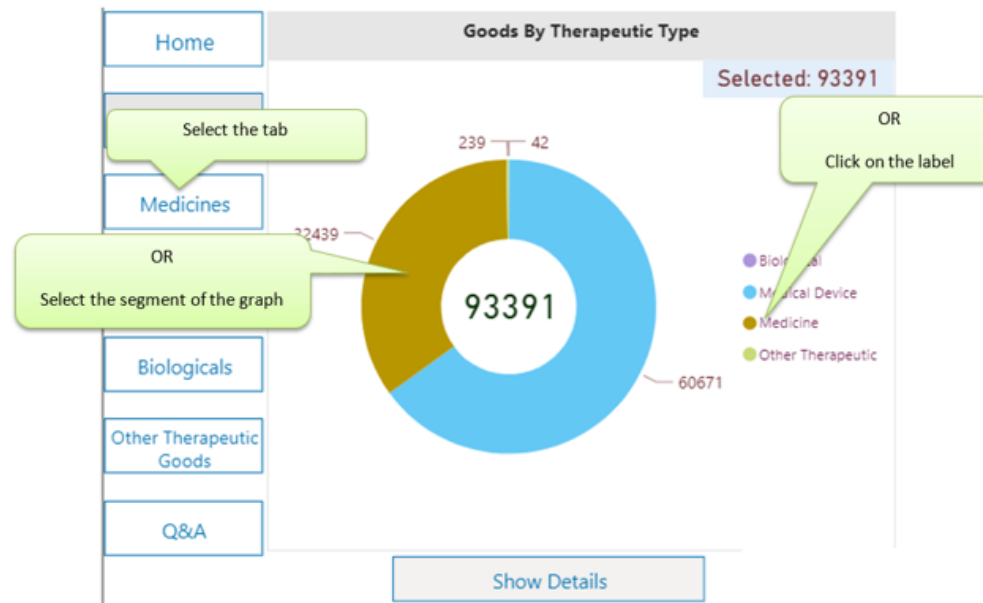

2 Enter the search text

3 Add another search term to further refine or Apply filter (4)

4 Select Apply filter to return results in the Search Results table

The data in any table column can be sorted by clicking on the column heading. Click once to sort by ascending order and twice to sort by descending order. An arrow will appear in the bottom left corner of the column heading box to indicate that the column data are sorted. When the arrow points up, the order is ascending; when it points down it is descending.

Note: If ascending order sorting has been applied to a column that has blank rows, the blank rows will show at the top of the list.

The dashboard displays no results

If the search is idle for a few minutes, then is used again, the results may be missing. The dashboard may look like this:

Use the Refresh button at the top left of the screen (usually at the top left of the web browser) to update the dashboard (see example below)

Frequently Asked Questions (FAQs)

Why does the same good appears on multiple lines in the Search Results?

If multiple products or multiple components are covered under the same ARTG entry (the good), the information displayed in the Search Results will be displayed in multiple lines, one for each product or component.

When I try to access content on pages using a document link, the content does not load properly.

Try using a different browser. It is recommended that you do not use Internet Explorer.

When I try to export the Search Results to a CSV file, records are missing

The CSV export is limited to 30,000 records. A full export of data is available when the file format selected is Excel.

When I type in the Aust L (or R) number on the packet, no results appear

The ARTG search only sows current active entries. Your product may be cancelled or suspended. Check the number is correct and contact the place of purchase if you have concerns.
