

Limitations of the data

This document contains information from reports of adverse events that the TGA has received in relation to therapeutic goods. It does not contain all known information, and an assessment of the safety of a medicine cannot be made based on this information.

Causality

- The reports received by the TGA contain suspected associations that reflect the observations of an individual reporter. The reporter may be a health professional, a sponsor, or a member of the public.
- Adverse events are suspected of being related to a therapeutic good, but this relationship is usually not certain - the symptom may be related to the underlying illness or to other factors.
- There might be no relationship between the adverse event and the medicine - it may be a coincidence that the adverse event occurred when the medicine was taken.

Report Date	Medicine	Reaction	Sender Type
6/07/2022	Adaya 10:10 Medicinal cannabis oil (cannabidiol ; tetrahydrocannabinol) - Suspect s22	Dizziness ; Hallucination, auditory	Health Professional
