Hi s22

Thank you for your email.
The reason behind my phone call was that we had received signals that the approved S19a Estradiol patches were unobtainable (strengths weren't mentioned). I believe my colleague has been in touch with Sandoz and is investigating the supply status of these products, however I would appreciate if you could provide me with information on the ARTG estradiol patches supplied by Sandoz.

Please provide this information in the table provided below:

Product	Estimated normal monthly demand levels	Estimated market share	Current stock levels at the sponsor/manufacturing level (as at Date)	Current stock levels at the wholesaler/distributor level (as at Date)	Dates of expected deliveries (importations) for the next 6 months and quantities expected for each order
s22					

s22					
ESTRADOT 10 estradiol 100 microgram transdermal drug delivery system sachet (338060)					

A response by **COB 25 July 2024** would be greatly appreciated.

Kind regards,

s2

Dear s2

Thank you for your phone call enquiry on the stock levels of Estradot and Estradiol. Sandoz is collating the data for our response.

Would you be able to provide a background on your request, or is there additional information you would like Sandoz to provide for a more complete response?

Kind regards,

Dear s22

Thank you for your query. Please see our response below.

s22

Response

s22

s47

Question 2

We have received multiple enquiries from external stakeholders, as well as ongoing media spotlight on the shortages of transdermal HRT patches.

Is Sandoz reassessing its future planned orders or considering alternative management actions, such as submitting a S19A application?

Response

- The shortage management strategy is:
 - s22
 - s47

Product	Estimated normal monthly demand levels	Estimated market share	Current stock levels at the sponsor/manufacturing level (as at Date)	Current stock levels at the wholesaler/distributor level (as at Date)	Dates of expected deliveries (importations) for the next 6 months and quantities expected for each order
s22					

s22

s22

ESTRADOT 100 estradiol 100
microgram transdermal drug
delivery system sachet
(338060)

s47

Please reach out if you have further questions.

Hi s22

Thank you for your response. I have processed the shortage notifications s47G and s47G for Estradot 100 (ARTG 338060) and s22

I have the following questions relating to these shortages:

- s47
However, the shortage has been pushed out to s47G. Have there been any changes?
- s22
- [Redacted]

We are appreciative of a response to the above questions by **COB Monday 28 October 2024**.

Thank you for your assistance in managing this shortage. Please let us know if there are any updates.

Kind Regards,

Dear s22

Thank you for your response. We are happy to have a meeting with Sandoz anytime between 11.30am-2pm on Thursday, 29 October 2024. Would this work for your team?

In terms of best contacts to invite from Medicine Shortages Section, please include everyone in this email from the TGA.

We would also appreciate if you could provide the meeting agenda prior to the meeting, noting we have some questions regarding the supply of Estradot, s22 products and the s47

Subject: RE: New notification for s22 [SEC=OFFICIAL]

Dear s22 and s22

Please see our responses to your queries below.

- **Information provided in s31 request in October, indicated that there is delivery s47 due for Estradot 100 (ARTG 338060) in s47G. However, the shortage has been pushed out to s47G. Have there been any changes?**
 - Sandoz is experiencing a long-term shortage due to a global shortage for Estradot, s22, and s22 products. This has led to:
 - s47
 - s47
 - During this long-term shortage limited registered stock will become available via the allocation. s47 delivery in s47G is still expected, however this is not a complete resolution of the shortage due to backorders and increased demand.
 - A S19 is currently under evaluation which is needed to address the shortage in Australia (and indirectly, in New Zealand). Therefore, the shortage was extended to allow for the evaluation of the S19.

s47
 - Sandoz is proposing a call with the TGA this week to address the medicine shortage reporting for Estradot, s22, and s22 products s47
 - Please advise who from the TGA should be invited to the call. (E.g. Head of Medicine Shortages)

s22

s22

- Sandoz is proposing a call with the TGA this week to discuss proposals to address the medicine shortage in the long term for s22, s22, and s22 products.
 - Please advise who from the TGA should be invited to the call. (E.g. Head of Medicine Shortages)
- Pending this call, Sandoz will review the shortage resolution date and update the notification accordingly.

We will look forward to your response regarding the best contacts to invite to the call to discuss the proposals to address the medicine shortages for Estradot, s22, and s22

Many thanks and kind regards,

s22

Dear s22

s22 has just had another alignment call with s22 on the reporting of the medicine shortages for the Estradot products.

Could I please request that you push back what was submitted for s22 and Estradot 100, and I will update all strengths of Estradot s22 for processing today.

Thank you so much for your cooperation and support!

Many thanks and kind regards,

Thank you for your email.

We reviewed the MSN database and have submitted an extension for ESTRADOT 100 mcg. The submission number for your reference is: **MS-2024-04548-1**.

Please let me know if there are any further discrepancies or any further information required for the approval of the S19A extension application.

Thank you again for all your support in this application.

Kind regards,

s22

Dear s22 [REDACTED]

Thank you for your email.

I would like to ensure that the expiry of the section 19A renewal approvals align with the shortage dates, to ensure continuity in supply of estradiol patches. Please see my email attached from the 17/10/24 regarding the medicine shortage notifications for Estradot products.

From the information provided in the market assessment, there is not sufficient stock to resolve all the Estradot shortages within s47G [REDACTED].

Please update the shortage notifications as soon as possible. Once this is done the section 19A renewal application can then be finalised and sent to the delegate for review.

Kind regards

Dear s22,
 Please find our response below.

Comments to give more background to the data provided in the tables below:

- Sandoz is committed to ensure consistent patient access to treatment and therefore need to secure supply of S19 s22 stock for s47G before S19 extension.
 - s47G, the lead time of supply chain needs to be considered and planned well in advance.
- We are still expecting supply of registered stock to come in and out for the remainder of 2025 and due to this inconsistency of supply we require the S19 extension to ensure treatment availability.

ARTG product	Pack Size	Estimated monthly demand	Estimated market share	Current stock levels at the sponsor/manufacturing level (as at 23/5/25)	Current stock levels at the wholesaler/distributor level (as at 22/5/25)	Dates of expected deliveries (importations) for the next 6 months and quantities expected for each order

Note for file

Date and time	23 October 2024 1550
Type of event (e.g. meeting/ telephone conversation)	Telephone conversation
Topic	MSNs for Estradot – ARTG s22, 338060 and section 19A renewal approvals for Estradiol Transdermal System s22 and 100mcg/day (0.1mg/day) (Sandoz, USA)
Participants	s22 (Medicine Shortages Section) s22 (Sandoz Pty Ltd)

Key points

- Discussed the published expected resolution dates of all ARTG Estradot patches vs the market assessment information provided under section 31 in October 2024. The market assessment indicates that the patches will remain in shortage s47G when the shortages are due to resolve.
- Asked s22 if the situation had changed since the section 31 request and if the shortages will resolve as per the current dates. s22 confirmed that the shortages will not resolve on 20/01/25, however s22 does not know when the shortages will resolve. s47
- s22 confirmed that there are ongoing global issues with the supply of estradiol patches. s47
- s22 said that updating the MSNs to reflect the current situation is difficult as s47
- Told s22 that it would be more appropriate to have a longer shortage duration published and to update the availability to limited when supply allows.
- s22 confirmed that the supply of estradiol patches has been unstable for a long period of time due to the global demand and the discontinuation of Climara patches.
- Discussed that the section 19A renewal approvals need to be justified to the delegate against current approvals and current shortage dates.
- Ensured Sandoz was aware that the delegate could still consider renewing the approvals and that given the shortage of HRT products is a high-profile shortage and the products have high usage, we would ideally like to make

sure that there is supply available for the expected shortage duration which according to the market assessment will be longer than 20/01/25.

Decision

§22 agreed to talk to §22 team about extending the shortage dates of Estradot patches and will let me know of the decision as soon as possible.

Dear s22

Thank you for supplying the below information to assist us with the shortage situation. It is much appreciated.

I have noted that orders for ARTG stock is limited/TBA over s47G and would like to ensure that the Medicine Shortage Reports Database has the most up to date information.

As per the [database](#), the Estradot shortages are currently due to resolve between October 2024 and s47G

Can you please update the shortage notifications to reflect the expected return to supply dates of Estradot patches as soon as possible. This will also ensure our management actions (including section 19A approvals) align with the shortage dates.

Please let me know if you have any questions.

Kind regards

Dear Regulatory Affairs Team,
 Due to the ongoing [shortages of transdermal HRT products](#) and the associated public health impact, we are requesting supply details for your ARTG and section 19A approved products. Can you please fill in the below tables to assist us in the management of these shortages.

I have not included all strengths of the current section 19A approved Estradiol Transdermal System (Sandoz, USA), only the strengths that a renewal application has been received for.

ARTG product	Pack Size	Estimated normal monthly demand levels (when not in shortage)	Estimated market share	Current stock levels at the sponsor/manufacturing level (as at Date)	Current stock levels at the wholesaler/distributor level (as at Date)	Dates of expected deliveries (importations) for the next 6 months and quantities expected for each order
s22						
ESTRADOT 100 estradiol 100 microgram transdermal drug delivery system sachet ARTG 338060						

Section 19A product	Pack size	Current stock levels at the sponsor/manufacturing level (as at Date)	Current stock levels at the wholesaler/distributor level (as at Date)	Dates of expected deliveries (importations) for the next 6 months and quantities expected for each order
s22				

A response by COB Tuesday 8 October would be greatly appreciated.

Please let me know if you have any questions.

Kindest regards,

Dear **s22**

Please find our response below.

Comments to give more background to the data provided in the tables below:

- Sandoz is committed to ensure consistent patient access to treatment and therefore need to secure supply of S19 ESTRAMON stock for **s47G** before S19 extension.
 - s47G**, the lead time of supply chain needs to be considered and planned well in advance.
- We are still expecting supply of registered stock to come in and out for the remainder of 2025 and due to this inconsistency of supply we require the S19 extension to ensure treatment availability.
- To ensure patient or pharmacies are not left out of pocket, Sandoz is supplying S19 stock at the same value as registered stock.

Dear s22 [redacted]

I hope you are well.

Can you please confirm if supply via s19A has commenced for the below s19A approved products:

s22 [Redacted]

ESTRADIOL estradiol 0.1 mg/day transdermal system

Additionally, we are investigating the supply situation of estradiol patches over the coming months and would like to gauge Sandoz's confidence in the return to supply date of the following products:

Product in shortage	Current published resolution date
s22 [Redacted]	
ESTRADOT 100 estradiol 100 microgram transdermal drug delivery system sachet AUST R: 338060	17 May 2024
s22 [Redacted]	

Please let me know if you have any questions about the above.

A response by COB Friday 15 March 2024 would be much appreciated.

Kind regards,

s22 [Redacted]

Hi s22

Thank you for your email, and I'm sorry I missed your call earlier (we are playing phone tag!).

I appreciate you updating the notifications for the two strengths noted below. I continue to urge Sandoz to consider updating the remaining notifications to align as a priority, however happy to discuss further at the meeting on Monday.

See you then.

Kind regards

Dear s22,

Thank you for contacting us today with your review and assessment.

Please be assured that Sandoz is committed to meet our obligations in relation to reporting changes to the period of shortage and notifying a realistic timeframe for shortage duration to support patients and health professionals. As you may be aware a call to discuss the global medicines shortage for Estradot s22 range of products is scheduled with TGA and Sandoz for Monday 04/11/2024.

I confirm, medicines shortages notification for ESTRADOT 100 mcg (AUST R 338060) and s22 has been updated today until 30/04/2025 to support Sandoz' application to continue supply of estradiol transdermal products under the section 19A pathway. All other strengths will be updated according to further market assessments and in line with discussions with TGA on Monday to manage community expectations.

Please advise if you require any further information to evaluate and approve Sandoz' current S19 application.

Kind regards

Dear s22

Thank you for providing the market assessment data for Estradot transdermal products on 8

October 2024.

My team has collated the data, and the assessment demonstrates there will be **insufficient** supply of registered Estradot products to meet the usual demand, until at least April 2025. For several strengths, there are no planned deliveries of the ARTG stock for the next 6 months.

As per the [Therapeutic Goods Act 1989](#) (Section 30EFA), sponsors are required to report changes to the period of a shortage within 10 working days beginning on the first day the person knows, or ought reasonably to have known, of the change to that period. Section 30EI of the Act provides *'For the purposes of this Act, there is a shortage of a medicine in Australia at a particular time if, at any time in the 6 months after that particular time, the supply of that medicine in Australia will not, or will not be likely to, meet the demand for the medicine for all of the patients in Australia who take, or who may need to take, the medicine'*.

It is important to consider the next 6 months supply outlook when making changes to reported medicine shortages. Based on the information you provided on 8 October, in response to our market assessment request, there are significant discrepancies between the reported shortage end dates and supply projections over the next 6 months. Considering this, could you please review and update the medicine shortage notifications for Estradot products immediately, to ensure you are meeting your obligations in relation to reporting changes to the period of a shortage.

Additionally, we have heard from patients and clinical groups that the repeated shortage extensions are having a significant impact on continued patient treatment and is impacting the clinician's ability to make informed clinical considerations for their patients. In our experience, notifying a realistic timeframe for shortage duration (guided by the dynamic nature of the supply and demand situation) and erring on the conservative side is received better within the wider community, then repeatedly extending the shortage.

I am aware that during the shortage period of registered Estradot products, Sandoz intend to continue supply of estradiol transdermal products under the section 19A pathway, and I wanted to assure you that we are supportive of this to reduce the impact on Australian patients.

Our aim is to support patients and health professionals during the shortage by providing accurate information about the shortage duration and management actions. This helps with managing community expectations around ongoing availability of the ARTG stock and assists with the TGA's consideration of additional management strategies to alleviate the shortage impact where needed.

We look forward to receiving your updated shortage notifications as a priority.

Kind regards

s22

Hi s22

It was great to meet with the Sandoz team yesterday. We really thank Sandoz for the transparent conversation yesterday, and as discussed we are happy to support the ongoing need for section 19A products into 2025.

We discussed the importance of having longer MSN's published on our database, to help patients and clinicians plan ongoing treatment. I thank Sandoz for agreeing to update the notifications, and I would appreciate if you could please update the remaining Estradot notifications as a priority today, given the confirmation that supply of ARTG products will continue to be intermittent for most of 2025. As noted yesterday, longer shortage periods on our database not only helps our team with assessment of section 19A applications, but could also assist the main department in terms of PBS considerations for submissions Sandoz has made for the section 19A products.

s22

. It's important that notifications align with the information that was shared with us yesterday, in line with reporting requirements.

Happy to chat if needed.

Kind regards

s22

ARTG Entry

ARTG Entry

ARTG number of the product that has a supply disruption:

ARTG ID	ARTG Name	Active Ingredient	Strength	Dosage Form
338060	ESTRADOT 100 estradiol 100 microgram transdermal drug delivery system sachet	estradiol	1.56mg	Drug delivery system, transdermal

ATC Descriptor: Genito urinary system and sex hormones

Are all pack sizes for this ARTG entry affected? Yes

Is this ARTG entry listed in the PBS? Yes

Provide the PBS number for this listing: 8765H

Do you have a designated sponsor representative within your organisation who is a point of contact on PBS matters? No

Details

Details

When was the shortage known to the sponsor? 13/12/2023

Nature of the shortage: Current

Shortage reason: Manufacturing

Manufacturing site problem:	s47	
Shortage reason - further information:	Document 23	
Estimated period supply will be affected at wholesaler points:	From:	17/01/2024
	To:	17/05/2024
Availability:	Limited Availability	
TGA publication date:	15/12/2023	
Is this shortage related to other medicines within the same Therapeutic class?	No	
Is this shortage specific to Australia?	Yes	
Estimated normal demand volumes for Australia:	s47	
Estimated percentage share of the Australian market:	s47	
Estimated current stock at sponsor / manufacturing level in Australia:	s47	
Estimated current stock at wholesaler / distributor level in Australia:	s47	
What is meant by 1 unit in this context:	Pack of 8 pouches	

Impact

Are there therapeutic alternatives on the Australian market?	Yes
What is the status of substitute options for this product in Australia?	Exact Therapeutic Alternatives
Are they available in adequate supplies to meet demand?	Unknown at this time
Provide details:	
Do any specific population groups use this product?	No
Based on your answers above and the Assessment Framework, what is the shortage impact rating?	2 - Medium Impact

 Subject: RE: Section 19A Application - s22) [SEC=OFFICIAL]

Dear s2

Thank you for your email.

I can confirm that we have access to order s22. Sandoz also has access to cover any future supply gaps of ESTRADOT for the AU market using ESTRAMON, provided that there is still an approved and valid S19A application in place.

s22

Finally, please see below the information about future orders of the US products and an updated SOH at sponsor & wholesaler details as per requested.

SKU	Product	Current stock levels at the sponsor/manufacturing level (as at 16/8/2024)	Current stock levels at the wholesaler/distributor level (as at 15/8/2024)	Dates of expected deliveries (importations) for the next 6 months and quantities expected for each order
s22				
44073880	s47			

USA Product	Current stock levels at the sponsor level (as at 16/8/2024)	Current stock levels at the wholesaler/distributor (as at 15/8/2024)	Dates of orders for the duration of the approval (until 31 October 2024) and quantities expected for each order	Other comments
s22				

If there are any further questions or further information you require, please do not hesitate to contact me.

Thank you for your support in our application and I hope you have a wonderful weekend ahead.

Kind regards,

s22

Dear s22

Thank you for your email. I am responding on behalf of s22

Your s19A application for s22 has been assigned to assessor and they are working to expedite it within their capacity & alongside other competing priorities.

s22

Additionally, in reference to the below table provided by Sandoz last month, can you please confirm that the information about **future orders** of the US products remains applicable? And if you are able to provide updated SOH at sponsor & wholesaler details also – that would be much appreciated.

USA Product	Current stock levels at the sponsor level (as of 17 July 2024)	Current stock levels at the wholesaler/distributor level (as of 17 July 2024)	Dates of orders for the duration of the approval (until 31 October 2024) and quantities expected for each order	Other comments

Dear s22 [redacted]

I hope you are well.

Would you be able to provide any updates or feedback in regards to the application below?

We are looking into the shipment of goods and also looking at printing our over labels to be able to ensure an efficient process to provide access of the product to the market. Therefore your advice in regards to the application would be greatly appreciated.

Thank you again for your support in this request and our application and should you require any further information, please do not hesitate to contact me.

Kind regards,

s22 [redacted]

Dear s22

Thank you for your section 19A application for s22.

Can you please send us the documents required for the application individually? I am aware that there are many documents, however it will be difficult to assess the application and for the delegate to review if all the information is contained within one document.

There is no need to resend the medicine shortage notifications as separate documents.

Can you also please ensure that if the product cartons contain s22, that there are copies of these documents also.

Sorry for any inconvenience.

Kind regards

s22
