

UDI Roadshow Summary

29 September 2025 - Sydney

8 October 2025 - Melbourne

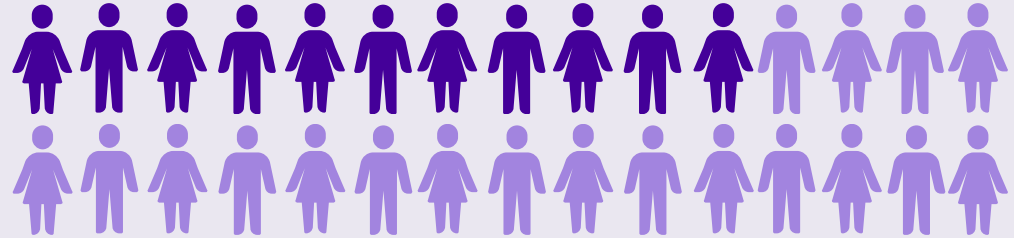

Overview

In September and October 2025, the Therapeutic Goods Administration (TGA) hosted 2 UDI sponsor workshops aimed at helping sponsors understand the Australian implementation of the UDI system and the AusUDID. The sessions successfully built awareness, clarified requirements, identified remaining details to be solved, and strengthened engagement across the medical device sector.

Attendees

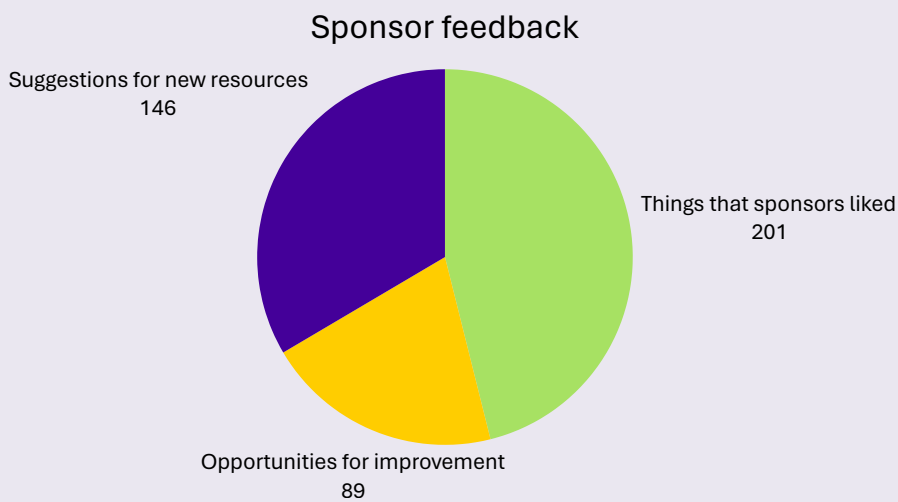

371 participants from 200+ sponsor organisations:

- **Melbourne:** 138
- **Sydney:** 233

What you said

We asked sponsors about current resources, including guidance and the UDI Hub. Their input showed us what works, what doesn't, and what they need next.

What you asked

Sponsors asked about:

UDI implementation compliance timelines

AusUDID data elements and submission methods

Requirements for specific device types, such as Systems or Procedure Packs and Surgical Loan Kits

UDI adoption and use in healthcare settings

What you need

Sponsors asked for:

- more examples in guidance
- instructions for using the AusUDID
- better ways to receive TGA updates
- additional paths to find information.

What we're doing

We are:

- updating guidance and other documents
- publishing new resources, including videos and decision trees
- developing a new subscription service for updates from the UDI Support Team.

When we're doing it

Some new resources such as videos, decision trees and a 'Preparing for UDI and AusUDID' checklist are available now.

We will publish the new resources and updates in 2026.

Next steps

We will continue to support sponsors and manufacturers through webinars, workshops, and the UDI Hub. We will share our plans for webinars and other communications in 2026.
