

Australian Unique Device Identification Database (AusUDID)

Conceptual Model for Healthcare

UDI Project Team

Devices Reforms Taskforce

Australian Government

Department of Health, Disability and Ageing
Therapeutic Goods Administration

tga.gov.au

Document overview

This conceptual model has been developed to support healthcare to understand the data available in the [Australian UDI Database \(AusUDID\)](#).

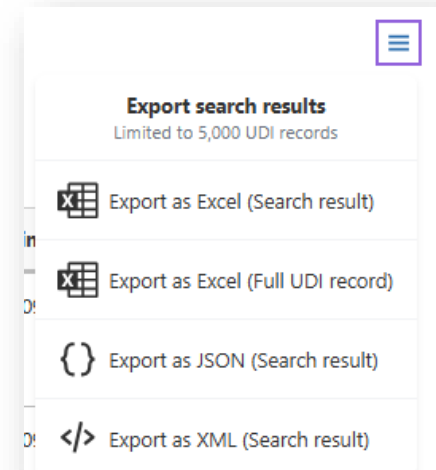

For detailed information about the data elements, refer to the [Australian UDI Data Dictionary](#).

Future AusUDID development may include development of one or more APIs to support integration into healthcare systems.

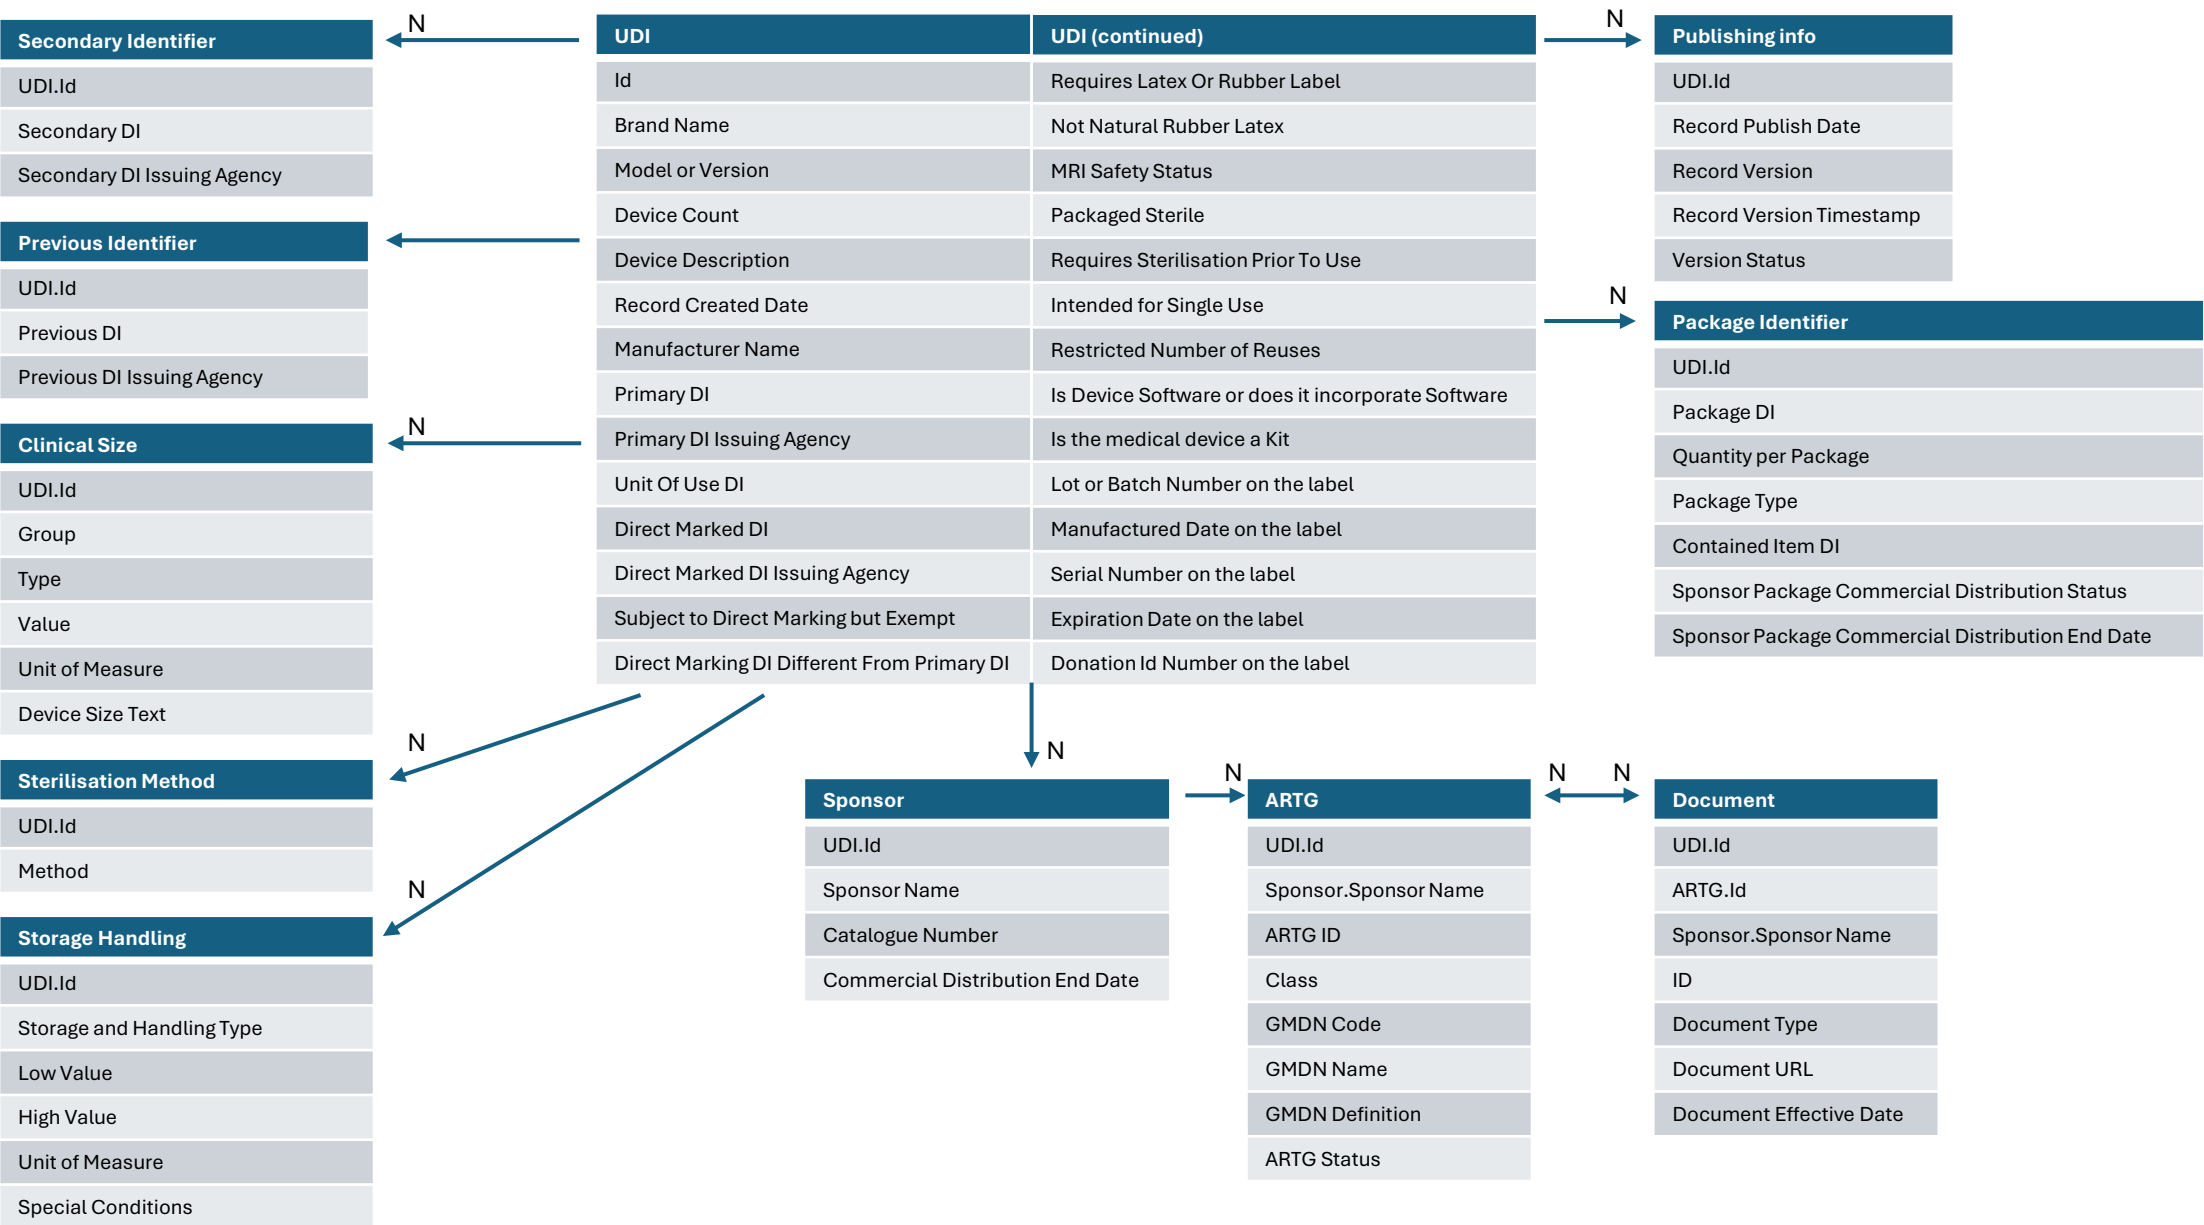

Data is currently available through full database downloads and periodic updates, available here: <https://ausudid.tga.gov.au/downloads>.

There are additional download options within the system including:

- Microsoft Excel exports
- JSON exports
- XML exports.
