Advertising Consultation
Regulatory Reform
Therapeutic Goods Administration
PO Box 100
WODEN ACT 2606

The "information campaigns" mounted by sponsors of medicine products, although not mentioning the products by name, have the effect of promoting those medicine products. Those campaigns clearly and significantly undermine the intent of the prohibition of direct-to-consumer advertising of medicines which require a prescription (Schedules 4 and 8). Those campaigns should be similarly regulated to prevent what amounts to de-facto advertising.
