

**Labelling and Packaging of Cough and Cold Medicines
Stakeholder and Public Consultation October – December 2009
Submission received from the Pharmacy Board of Victoria**

The Pharmacy Board of Victoria fully supports the submission made by the Pharmaceutical Council of Western Australia. This matter is a registration issue and not a scheduling consideration and may undermine the principles for inclusion of substances in Schedule 4. It will impose possible criminal sanctions on pharmacists for a breach compared with an approach allowing professional discretion by pharmacists.
