Submission to TGA on the ban of poppers

Hi, I have been using poppers/amyl for the last year now, I mainly use this in the bedroom & mainly with a regular partner & friend, I don't use it every single time. I have found no addiction the substance & no side bad side effects or health issues, I have never heard of any health issues or warning about poppers. I very much enjoy using this to enhance sexual stimulation & the person I sleep with who is a bottom helps him to be more relaxed and loosen up before sex. We find it great fun together. For me it takes things to another level of something different, I think all adult people should try it with their partner & it makes things a lot more fun & stimulating.

Even with cigarettes & sisha, you don't have to do use it if you don't want to & it won't effect you if you don't want it. It may not be for everyone but for the people who enjoy it, why take it away?

I urge you please to not ban this! Please find a more suitable way to provide information on when distributing the product then, but at the end of the day we are all adults and be making our own informed decisions on if we want to use this or not.

Thank you!
