

Why are you wanting to “regulate” a billion dollar industry in Australia?

Why would you want to;

- 1) make many many retailers go broke?
- 2) cause massive job loss in Australia?
- 3) make Australian athletes a joke to all our international competitors?
- 4) make it harder than what it is for Australians to live a healthy and balanced life style?
- 5) cause many businesses to go bankrupt and end up on benefits?
- 6) make more Australians obese and depressed?
- 7) make hard working Australians like myself end up fat and depressed.
- 8) make it harder for gym going healthy Australians to train and keep fit?

I really don't understand??

Do you have shares in McDonald's? Kfc?

Are you looking to drive all Australians to more obesity than we've ever seen before?

I have a Thyroid condition and the only breakfast I can stomach without throwing up after my medication in the morning is a protein shake. Why are you going to take that away from me?

Why do you want me to be sick ?

I used to be obese (after the pharmacy industry failed me). I never never abused any proteins or supplements. I used them to aid my blood sweat and tears at the gym.

It was through major lifestyle changes and hard hard work that I lost that weight and look fabulous but I couldn't have gotten through the PT workouts where I told him repeatedly I hated him without a pre workout and I couldn't have gone to work to be able to pay for my PT without my post workout so my muscles recovered and I didn't get leg cramps and excessive soreness.

I have never met anyone at the gym who

Abuses supplements.

You will drive people to horse steroids and drugs that are not good and illegal if you take these safe supplements away.

These supplements are already regulated and have all ingredients listed.

I don't see what your problem is?

I really don't think you realize what this will do to me personally.

I will not be able to have breakfast and will therefore end up heaving on the way to work. I will not be able to go to work cause I'll be so sick. I will not be able to go to the gym cause I'll be sore from no recovery shake. I'll get fat again.

I'll lose my job and end up on Centrelink.

Who are you to tell me what's right for my body? That's a private discussion with my doctor.

My doctor approved my supplement use with a thyroid problem and did regular blood tests to check my overall health.

My doctor was supportive and praised my transformation which also resulted in getting rid of migraines and being “drug” free! No migraine preventative, no codeine etc...

Through all of this I had debilitating migraines and prescription medicine did nothing for me!

Your government approved drugs from the pharmacy did nothing but make me more depressed and fatter still with migraines.

The thing that fixed me was some radical leaps of faith and changing my life for the absolute better.

Holistic health care was one of the best things to help me - Accupuncture, massage etc... and none of this was detrimental to my health.

I would rather kill myself than ever ever end up like that again.

You will be responsible for my demise and many many others.

I am a routine person and you will disrupt my routine by taking away my gym supplements and my breakfast shake which has more protein, nutritional value than a piece of toast. Also toast goes goey and gives me a gag reflex. And makes me spew!

Who are you to pick and choose what is right for me?

Where do I get on your committee?

I have lost over 40 kgs and lead a healthy lifestyle. I am healthy weight and healthy bmi.

I am 100% more qualified than all of you about this issue and would love to talk further with you!

If you want to take something off the shelves- remove soft drinks and Cordial!

Certain soft drinks contain aspartame.

This is very very bad on your body and does nothing but make Australians fat!

If a child leaves soft drink in their school bag and it heats up - Carcinogenic!

This is the case for many items in the supermarket that look innocent!

And more importantly are given to children!

There are stacks of items in the supermarket that are carcinogenic if mis handled or heated up etc...

Supplements do not harm people.

They always have ingredients and list warnings etc....

Why are you going to remove things that are safe in every other country and make Australia a dumb laughing stock again.

They already think we are dumb and say gaday and ride kangaroos. Why are you going to make up more of a fool looking country?

If you want to ban something ban cigarettes! They contain more chemicals that damage your body than anything else sold! Long term body Damage that affects the Medicare and health system.

And by the way - my doctor told me if I didn't change my life and lose weight I was headed for high cholesterol and diabetes.

There is no definitive study that shows what numerous combinations of prescription drugs has on the body.

And you want me to end up on beta blockers for cholesterol, diabetes medication and on aspartame products that are carcinogenic and my thyroid medication. Don't forget migraines ! If I'm on all that, I'll probably have migraines plus codiene again! I'm up to 5 drugs! 5! You want me to go from 1. To 5!

You are killers!

Do you have shares in pharmaceutical products for cancer? Or diabetes because that's the only reason you would consider this... the long term growth in the need for big pharma.

You are going to ruin my life.

My happy and healthy life.

The gym is the only thing I love and you're going to make it harder for me to go!

This is censorship!

I have the right to be happy.

I'm a tax paying, law abiding citizen and I'm begging you to come to your senses!

Your system works now.

If it ain't broken don't fix it!

But you're committee is broken!

I'll do the job for \$1 less a week! Saving \$52 a year and 104 every 2 years.

I can do a better job than this!

Who proposed this? What's their email address? I would like to email them to!
