

I am a consultant working with the Clinical Research Unit at SB Australia. I am currently monitoring the paroxetine vs fluoxetine study in mild to moderate depression (Protocol 356).

We currently have about 28 patients enrolled but have had seven serious AEs as follows:

6. Patient 122
AE: Suicide
Study drug onset: 19th June 1993 - AE onset: [redacted]

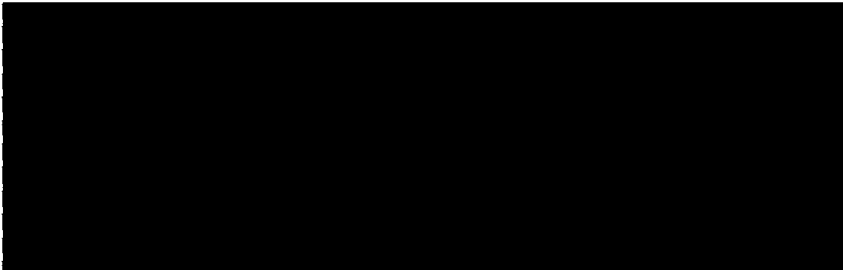

Kind regards,

Consultant
