

Study Design:

A single dose, randomized, 5-way cross-over study in healthy women given the following doses following an overnight fast:

- A) 30 µg ethinyloestradiol orally,
- B) 30 µg ethinyloestradiol plus 75 µg gestodene (Femovan) orally,
- C) 30 µg ethinyloestradiol plus 75 µg gestodene by slow IV infusion,
- D) 30 µg ethinyloestradiol plus 150 µg desogestrel (Marvelon) orally,
- E) 30 µg ethinyloestradiol plus 150 µg 3-keto desogestrel IV.
