

Each row that includes an age corresponds to a fatal report. The number of reports included in this document exceeds the number of reports with fatal outcome included in the Database of Adverse Event Notifications (DAEN) and the TGA COVID-19 vaccine weekly safety report because duplicate reports (that is, reports relating to the same individual) are excluded from the DAEN and the weekly safety report. Rows that do not include an age do not represent additional reports. This document is a PDF document created from an Excel spreadsheet. Consequently, the extra pages found in the document that do not include ages correspond with extra columns, not extra rows.
