

Application Date	Form Type	Product Profile	Form	Strength	Indication	Dose & frequency	Status
28/06/2018	SAS-A	Trientine (Triethylenetetramine, TETA)	Capsule	250	Wilson disease		Completed
26/06/2018	SAS-B	Trientine (Triethylenetetramine, TETA)	Capsule	250	Wilson disease	250-300 milligrams three times daily, orally	Approved
26/06/2018	SAS-B	Trientine (Triethylenetetramine, TETA)	Capsule	250	Wilson disease	250-300 milligram, 1 three times daily, orally	Withdrawn
26/06/2018	SAS-A	Trientine (Triethylenetetramine, TETA)					Completed
13/06/2018	SAS-A	Trientine (Triethylenetetramine, TETA)	Tablet	250			Completed
13/06/2018	SAS-B	Trientine (Triethylenetetramine, TETA)	Capsule	250	Wilson disease	as per protocol	Approved
13/06/2018	SAS-B	Trientine (Triethylenetetramine, TETA)	Tablet	250	Wilson disease	up to 1500mg daily in divided doses	Approved
1/06/2018	SAS-B	Trientine (Triethylenetetramine, TETA)	Capsule	250	Wilson disease	2 bd	Approved
28/05/2018	SAS-B	Trientine (Triethylenetetramine, TETA)	Capsule	250	Wilson disease	2 bd	Approved
14/05/2018	SAS-A	Trientine (Triethylenetetramine, TETA)	Capsule	250	Wilson disease		Completed
1/05/2018	SAS-B	Trientine (Triethylenetetramine, TETA)	Capsule	250	Wilson disease	750 milligram in the morning and 500 milligram at night, orally.	Approved
23/04/2018	SAS-B	Trientine (Triethylenetetramine, TETA)	Tablet	250	Wilson disease	300mg, orally, one 6 times per day	Awaiting Decision
17/04/2018	SAS-B	Trientine (Triethylenetetramine, TETA)	Capsule	250	Wilson disease	500 milligrams orally, twice daily	Approved
17/04/2018	SAS-A	Trientine (Triethylenetetramine, TETA)	Capsule	250			Completed
17/04/2018	SAS-A	Trientine (Triethylenetetramine, TETA)	Capsule	250	Wilson disease		Completed
11/04/2018	SAS-B	Trientine (Triethylenetetramine, TETA)	Capsule	250	Wilson disease	500 milligrams three times daily, orally	Approved
10/04/2018	SAS-B	Trientine (Triethylenetetramine, TETA)	Capsule	250	Wilson disease	500 milligram orally, twice daily	Approved
28/03/2018	SAS-B	Trientine (Triethylenetetramine, TETA)	Capsule	250	Wilson disease	500 milligrams, twice daily, orally.	Approved
21/03/2018	SAS-B	Trientine (Triethylenetetramine, TETA)	Tablet	250	Wilson disease	600 milligrams, three times a day, orally.	Approved
9/03/2018	SAS-B	Trientine (Triethylenetetramine, TETA)	Capsule	250	Wilson disease	500 milligrams twice daily, orally	Approved
8/03/2018	SAS-A	Trientine (Triethylenetetramine, TETA)	Tablet	250			Completed
7/03/2018	SAS-A	Trientine (Triethylenetetramine, TETA)	Capsule	250			Completed
7/03/2018	SAS-B	Trientine (Triethylenetetramine, TETA)	Capsule	250	Wilson disease	500 milligrams, three times a day, orally.	Approved
5/03/2018	SAS-B	Trientine (Triethylenetetramine, TETA)	Capsule	250	Wilson disease	250mg, orally, twice a day	Approved
28/02/2018	SAS-B	Trientine (Triethylenetetramine, TETA)	Capsule	250	Wilson disease	250 milligrams, three times daily, orally	Approved

16/02/2018	SAS-B	Trientine (Triethylenetetramine, TETA)	Capsule	250	Wilson disease	750 milligrams daily, orally	Approved
13/02/2018	SAS-B	Trientine (Triethylenetetramine, TETA)	Tablet	250	Wilson disease	250 milligrams, three times daily, orally	Approved
13/02/2018	SAS-B	Trientine (Triethylenetetramine, TETA)	Capsule	250	Wilson disease	1250 milligrams in divided doses daily, orally	Approved
9/02/2018	SAS-B	Trientine (Triethylenetetramine, TETA)	Capsule	250	Wilson disease	As per protocol	Approved
9/02/2018	SAS-B	Trientine (Triethylenetetramine, TETA)	Capsule	250	Wilson disease	600 milligrams, twice daily, orally	Approved
9/02/2018	SAS-B	Trientine (Triethylenetetramine, TETA)	Capsule	250	Wilson disease	600 milligrams, three times daily, orally	Approved
9/02/2018	SAS-B	Trientine (Triethylenetetramine, TETA)	Capsule	250	Wilson disease	1500 milligrams daily in divided doses	Approved
7/02/2018	SAS-B	Trientine (Triethylenetetramine, TETA)	Capsule	250	Wilson disease	250 milligrams, twice a day, orally	Approved
31/01/2018	SAS-B	Trientine (Triethylenetetramine, TETA)	Capsule	250	Wilson disease	250-300 milligrams, three times daily, orally	Approved
29/01/2018	SAS-B	Trientine (Triethylenetetramine, TETA)	Capsule	250	Wilson disease	250 milligrams, three times a day, orally.	Approved
25/01/2018	SAS-B	Trientine (Triethylenetetramine, TETA)	Capsule	250	Wilson disease	600 milligrams, twice a day, orally.	Approved
25/01/2018	SAS-A	Trientine (Triethylenetetramine, TETA)	Capsule	250	Wilson disease	600mg twice a day orally	Completed
12/01/2018	SAS-B	Trientine (Triethylenetetramine, TETA)	Capsule	250	Wilson disease	250 milligrams, twice a day, orally.	Approved
12/01/2018	SAS-A	Trientine (Triethylenetetramine, TETA)	Tablet	250	Wilson disease	Nasogastric/oral - Strength: 250 milligrams - Dose: 1 tablet 3 times daily	Completed
10/01/2018	SAS-B	Trientine (Triethylenetetramine, TETA)	Capsule	250	Wilson disease	750 milligrams, twice a day, orally.	Approved
4/01/2018	SAS-B	Trientine (Triethylenetetramine, TETA)	Tablet	250	Wilson disease	250mg tablets, 4 tablets daily, orally	Approved
7/12/2017	SAS-B	Trientine (Triethylenetetramine, TETA)	Capsule	250	Wilson disease	750 milligrams in the morning, and 500 milligrams at night, orally	Approved
6/12/2017	SAS-B	Trientine (Triethylenetetramine, TETA)	Tablet	250	Wilson disease	250 mg - 300 mg daily, orally	Approved
5/12/2017	SAS-B	Trientine (Triethylenetetramine, TETA)	Capsule	250	Wilson disease	250 mg three times daily, orally	Approved
29/11/2017	SAS-B	Trientine (Triethylenetetramine, TETA)	Capsule	250	Wilson disease	500 mg twice daily, orally	Approved
20/11/2017	SAS-B	Trientine (Triethylenetetramine, TETA)	Tablet	250	Wilson disease	300 milligrams four times a day, orally	Approved
3/11/2017	SAS-B	Trientine (Triethylenetetramine, TETA)	Capsule	250	Wilson disease	750 milligrams once daily, orally	Approved
31/10/2017	SAS-B	Trientine (Triethylenetetramine, TETA)	Tablet	250	Wilson disease	500 milligrams twice daily, orally	Approved
24/10/2017	SAS-B	Trientine (Triethylenetetramine, TETA)	Tablet	250	Wilson disease	300 milligrams twice daily, orally	Approved
20/10/2017	SAS-B	Trientine (Triethylenetetramine, TETA)	Capsule	250	Wilson disease	500 milligrams, twice a day, orally.	Approved

4/10/2017	SAS-B	Trientine (Triethylenetetramine, TETA)	Tablet	250	Wilson disease	500 milligrams twice daily, orally	Approved
3/10/2017	SAS-B	Trientine (Triethylenetetramine, TETA)	Tablet	250	Wilson disease	500 milligrams in the morning and 750 mg at night, orally.	Approved
28/09/2017	SAS-B	Trientine (Triethylenetetramine, TETA)	Tablet	250	Wilson disease	750 milligrams twice daily	Approved
25/09/2017	SAS-B	Trientine (Triethylenetetramine, TETA)	Tablet	250	Wilson disease	500 milligrams, twice a day, orally.	Approved
2/09/2017	SAS-B	Trientine (Triethylenetetramine, TETA)	Tablet	250	Wilson disease	250 milligrams three times a day, orally	Approved
9/08/2017	SAS-B	Trientine (Triethylenetetramine, TETA)	Tablet	250	Wilson disease	250mg three times daily, orally	Approved
2/08/2017	SAS-B	Trientine (Triethylenetetramine, TETA)	Tablet	250	Wilson disease	250 mg twice daily	Approved
27/07/2017	SAS-B	Trientine (Triethylenetetramine, TETA)	Tablet	250	Wilson disease	250 mg mane and 500 mg nocte	Approved
26/07/2017	SAS-B	Trientine (Triethylenetetramine, TETA)	Tablet	250	Wilson disease	8 x 250mg tablets per day	Approved
26/07/2017	SAS-B	Trientine (Triethylenetetramine, TETA)	Tablet	250	Wilson disease	Tablet, 8 tablets per day, orally	Withdrawn
26/07/2017	SAS-B	Trientine (Triethylenetetramine, TETA)	Tablet	250	Wilson disease	300 mg tablets, 8 per day, orally	Approved
14/07/2017	SAS-B	Trientine (Triethylenetetramine, TETA)	Tablet	250	Wilson disease	250 milligram, daily	Approved
14/07/2017	SAS-B	Trientine (Triethylenetetramine, TETA)	Tablet	250	Wilson disease	starting dose 250mg daily	Approved
11/07/2017	SAS-B	Trientine (Triethylenetetramine, TETA)	Tablet	250	Wilson disease	500mg twice daily	Approved
11/07/2017	SAS-B	Trientine (Triethylenetetramine, TETA)	Tablet	250	Wilson disease	1 gram twice daily	Approved
