Dear Sir/Madam,

**Re: Proposed amendments referred for scheduling advice to ACMS #28
Item 1.1 Paracetamol**

Pfizer Australia Pty Ltd (Pfizer) appreciates the opportunity to provide comment in relation this agenda item.

Under "Reasons for Proposal", the available paracetamol liquid preparations are listed, including:
"32.5 mg/mL paracetamol + 1 mg/mL dextromethorphan (intended primarily for use in children, are currently available as a Pharmacy Medicine (Schedule 2))."

[REDACTED]

For the purposes of accuracy of the public record, we wish to clarify that it is incorrect to state that this product was *"intended primarily for use in children"*. The TGA approved artwork provided dosage instructions limited to adults and children 12 years and over, and included a Warning Statement **"Do not use this product in children under 12 years of age"**. [REDACTED]

Should you require any additional information or clarification, please do not hesitate to contact me directly.
