Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, mild anxiety, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS).

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Yes l have used CBD safely and had success for the treatment of pain relief from arthritis.

DescrCBD should be available and affordable to everyone regardless of your social and economic position in society.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have never used it but it would be a far better option for pain relief then what is currently being offered.

DescrThere are so many pain sufferers in Australia, particularly the elderly. It needs to be affordable to all Australians regardless of income.

Allowing Australians easier access to CBD would bring great relief to pain sufferers. People are far too dependent on pain killers which can cause far more harm then good. It's time the TGA start prioritising what's best for Australians.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

Date:	Thursday, 21 May 2020 1:36:53 PM

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

DescrIt's a widely available product, it shouldn't be expensive to begin with.

Only publish my submission on the TGA website with confidential information redacted.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

[redacted]

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the TGA proposal – pharmacist-only, up to 60mg/day, adults only & must be proven in large studies to work at low dose before permitted for sale.

If available, I would like myself or my loved ones to try CBD for nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I think CBD must be 'proven' to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

DescrN/A

Just make it available for those that need it in personal quantities.
If it is illegally sold then strong penalties should apply.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have not tried CBD oil before as I have been able to access it. I think it would be benificial for me for general well-being

DescrThere may be many Australians who would benefit from CBD oil. Access to high quality products at a range of prices will help more people

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I would use CBD in a safe way and read the label and warnings.

My experience really with CBD is of a second hand nature. I have seen people benefit from it for pain and I strongly believe that people should have the right to choose a more natural form of medicine such as CBD if they would like to.

DescrWith regard to the price I would like to ensure that the quality is there. If the quality is there then I am willing to pay a higher price.

I feel the best way to give public access to CBD is to allow it to be distributed through reputable companies and manufacturers this way it would become main stream and more people could benefit.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I and a number of people i know suffer from varying degrees of anxiety and or depression and an overwhelming amount of anecdotal and clinicially proven research out of united states has shown huge results treating this with almost no negative consequences or side effects. Compare that to the accepted drugs used to treat these issues currently which can have devastating side effects and addiction consequences, i believe to prevent early adoption of CBD as an alternative would be a serious mistake and will cause more harm than will be risked by legalising CBD now.

Descr

The best way to access will be a system that doesn't monopolise production ability into the hands of a select few pharmaceutical companies. The more widely available the better, so long as manufacturing standards are met.

Publish my entire submission in full, including my name, work title and any other information about me on the TGA website.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Given the restrictions here in Australia, I have not used CBD oil. However, I have seen and heard of ONLY positive experiences from other people in Australia and world-wide who have used CBD oil for many different reasons and have had incredible results and have changed their lives for the better. It is mind blowing that CBD has not been made available to the public without a prescription.

DescrThe lower price for CBD is incredibly important. A greater amount of people looking to purchase CBD will more often than not be buying CBD to manage medical problems and it would be safe to assume that those people may have had their income affected due to their medical problem. Therefore, it is important to make CBD affordable so that anyone is able to access CBD. For some, CBD could greatly manage their symptoms which could allow them to return work and better financially support themselves.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I think CBD must be 'proven' to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

Descr

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would not use CBD in a safe way and will not read the label and warnings.

DescrNeeds to be low. Feel like it is a better drug with more uses than what's available at the moment all derived from a plant

Only publish my submission on the TGA website, do not publish my name or any other information about me.

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have seen many people benefit from the use of CBD in other countries where it is available over the counter. Many cases of improved sleep and decreased stress have been witnessed which has lead to people being able to contribute more to society.

DescrAffordability is the number one restraint on CBD products currently in Australia. This is making people resort the the internet and tbe US where many are being scammed.

I ask the TGA to seriously consider allowing the use of CBD from Australian industrial hemp crops aslong as they are grown under good agricultural practices. Currently, CBD from industrial hemp grown and made in the US can be imported and prescribed to patients. I feel the same opportunity should be available to Australian hemp growers. This will result in a more reliable and affordable source of CBD in Australia.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I would use CBD in a safe way and read the label and warnings.

A friend of mine has seizures and CBD oil has helped him immensely.

DescrMore accessible (lower) prices would obviously make it more accessible to all who could benefit.

Not being psychoactive, I don't think it's potentially dangerous, only potentially helpful, so it would make sense to make it as easily available as other health supplements, many of which could possibly be more harmful,

Only publish my submission on the TGA website, do not publish my name or any other information about me.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the “Hybrid” option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Descr

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for help with restful sleep, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have not used CBD but am convinced of its efficacy and would like safe low cost access should need arise.

Access to benign natural medications at low cost provides choice and flexibility in health care.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the “Hybrid” option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS).

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have had nasty side effects from prescription drugs and believe this to be a safer and probably more effective alternative.

DescrAs a pensioner, I am unable to purchase many alternatives to Pharma drugs that are government subsidised.

Publish my entire submission in full, including my name, work title and any other information about me on the TGA website.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

My husband suffered for years with pain from cancer surgery complications. We all have friends and family who suffer and die from cancer and other illnesses. Its appalling that a safe and cheap treatment is available but not allowed to be used . Time for us to grow up and help people who need it and sooner rather than later.

DescrExpensive treatment means the rich get help while the poor suffer. People with debilitating pain or illness are often not in a position to work to pay for expensive treatments. Plesse make it accessible for everyone. Price is a key factor to that.

I would use CBD in a safe way and read the label and warnings.

How can we describe whether I or loved ones have used CBD safely when you can't get it. As far as I know you can't get it in Australia and you can't legally import it yourself.

DescrHigh prices are detrimental to CBD's availability for everybody. Whilst I understand that good quality CBD costs, over regulation adds a cost burden for everybody that is usually not justifiable.

TGA regulation on natural products should be reduced rather than increased.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I think CBD would be helpful to very many people in this country, and for a broad range of minor issues. I therefore believe that a lower priced product is important so that even people from a lower socio economic background can benefit from plant based CBD.

I believe personal relationships will improve when more people have the choice to use it; given my understanding is that it helps people remain more balanced within themselves.

In addition to CBD being more readily available for minor issues, for medically diagnosed issues, patients should have the choice as to whether they start with plant based CBD medicinal cannabis, or pharmaceutical medicines, from the start of their treatment. At the moment they cannot choose the plant based alternative until they have tried the pharmaceutical medications. An experienced medical professional would be able to explain the benefits and possible side effects of each choice in order for them to make up their own minds.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the “Hybrid” option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I've been taking medications daily for 30+ yrs, due to chronic, debilitating levels of pain. I NEED to try something else.

DescrIt must be accessible for everyone, and I expect many wanting it would be on welfare, like me. Hopefully, if this works, thousands of people will be able to return to the work force. It's a no brainer from where it sit.

Publish my entire submission in full, including my name, work title and any other information about me on the TGA website.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, help with restful sleep.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have not tried CBD yet but would be interested to try it in relation to minor pain and improved sleep related to chronic health problems I have suffered with for many years. I have seen many people who report using it safely and successfully in online health support groups and hope it will be more easily available to us to try in Australia too.

DescrAs I have a number of chronic health conditions, which have kept me primarily housebound and unable to work for the last 15 years, the price of CBD is important in how accessible it will be to me. I already have a high cost of medications and supplements and doctors/specialists costs so having a lower cost of CBD would allow me the option to try it and if it was successful be able to maintain the ongoing cost of access.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I don't personally have any conditions but it is grossly unfair that people with pain conditions who have experienced relief from CBD should be criminalised, or disadvantaged by not being able to access CBD relief at an affordable price, and easily available.
Evidence shows that it is safe.

DescrIt would not affect me personally.
I think it is important generally in the community as it is such a promising treatment that it should be equitably available, and affordable for those in lower income groups.
Different treatments work for different people. If CBD works for someone, they should be able to access it.

I would use CBD in a safe way and read the label and warnings.

DescrCBD at lower prices would make it more available to those in the community who may be more vulnerable or at risk of health issues to which CBD may be able to alleviate. An increase in availability for these individuals could be greatly beneficial for both them, and for reducing the burden on the healthcare system. It could also be beneficial in reducing rates of prescription drug abuse such as benzodiazepines and also to reduce the rates of self medication in the community.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for stress, mild anxiety, help with restful sleep, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I would like to use a natural proven product for mild anxiety, sleep restlessness and stress relief as opposed to pills and alcohol which are harmful and readily available

Descrthe price is very important for access. if too many regulations and strict protocols are imposed this will increase the price adversely and ensure availability for all is restricted to those who can afford it. this medicine should be cheap and readily available as panadol and asprin!

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Pain will be less. So, I can move around more

I have curavature of the spine. I would be better able to move around much more. With less pain. This has to be legalized. There is NO high in this. It's medicinal only. More pain I have the less I am able to move. The more weight I put on. So, for me this will save my life.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for stress.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Lower prices will benefit all consumers

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

There is already alot of data that supports that CBD helps with; anxiety, sleep, cancer and general well being. I support it being made available to the public.

Needs to be affordable otherwise it will be out of reach for some Australians.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

I would use CBD in a safe way and read the label and warnings.

My family in the USA have easy access to this safe and effective compound. Why shouldn't Australians be allowed access? It's clear the side effects are minimal. Let's be adults about this.

It needs to be reasonably priced so people can afford it.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

Having lived with chronic pain for many years & seeing the government is cracking down on opiate based pain relief, it is making it so much harder for those of us who want to do the right thing. The only thing that gives actual, safe relief is illegal while addictive, dangerous pain relief is legal? Makes absolutely no sense.

The price isn't an issue if I get relief from the chronic pain. How can you put a price on quality of life?

Please decriminalise all, including medicinal cannabis. It's so much safer than opioids!

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I support the “Hybrid” option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for general health and wellbeing, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I would use CBD in a safe way and read the label and warnings.

Free choice, humans have been using CBD for centuries to heal illnesses and we don't need white-coats - medical 'experts' to approve it, it's our choice

Lower prices would make it accessible for all, and avoid the elitism associated with so much expensive naturopathic treatments - all Australians should have access to all natural products that can help them and big pharma need not be involved

Only publish my submission on the TGA website with confidential information redacted. Name, Contact details - privacy protection details

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I would use CBD in a safe way and read the label and warnings.

CBD has been proven effective for minor medical issues. This is not theory, it's fact. CBD has been proven to lower reliance on opioid based pain killers thus reducing the instance of opioid addiction. This is one of the biggest underlying positives you get with CBD. Making the price affordable for the bottom 10% is crucial.

It should be limited to sale in pharmacies/chemists only and marketed as medicine.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

CBD alone is not medicine. It's 'medicalised Cannabis' NOT Cannabis medicine. Cbd is a good supplement. Nothing more.

If you can't work out that sick people needing cannabis are mostly financially disadvantaged & most can not afford the current products on offer. You also omit essential treatment methods such as balms!

Legalise cannabis. End of story

Publish my entire submission in full, including my name, work title and any other information about me on the TGA website.

I would use CBD in a safe way and read the label and warnings.

I suffered anxiety when I moved from Perth to Sydney by myself to start a new job.
It was very difficult to set up an appointment with a doctor to organise medication to treat my anxiety.
My anxiety was induced by the overwhelming feeling of starting a new job in a new city and having a lot to deal with at the time.
If I could have had an easily accessible pharmacy option to ease the initial pressures I was under then it would have been a lot more helpful and manageable.

Lower prices are particularly important for people who are suffering from medical conditions as their work and career may be affected and they therefor do not earn as much.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS).

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have not used it but have heard convincing reports from those who have. I believe that it should be freely available as an adjunct or alternative to other treatments that are not always as effective as may be expected. As part of a democratic society I feel that we should be able to make our own choices to a variety of medicines.

Price is clearly a critical factor in the choice of medicines for many people. Those who cannot afford certain treatments are clearly at a disadvantage when it comes to choice.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

I would use CBD in a safe way and read the label and warnings.

Low cost is important, because it needs to be accessible for all Australians, and those who need it most are more likely to be dealing with other costs associated with health care; having a low cost CBD option will significantly help Australians with health conditions and disabilities.

My beautiful friend lives a life of pain, fatigue and cannot work but also cannot get a Centrelink payment. Research suggest that CBD oil would benefit him greatly. I want to see people like him able to live a normal and healthy life.

A lower price would make the oil reachable for more people who need it, like my friend who can't work and isn't eligible for Centrelink.

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for general health and wellbeing, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I firmly believe from the literature that this natural plant can help with health. The studies say this and I can not understand why it is illegal in the first place.

This should be available for everyone not just the people with money. If the health system really wanted to look after the public it should not have been illegal. Everyone knows this. It's making a mockery of our health system. This is a not good. We need to have a health system that the public can trust and having CBD illegal shows that it can not.

As far as the general public are concerned the public health system is not helping the public. This is general knowledge. Not me making it up.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I think CBD must be 'proven' to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

Haven't used it myself.

People lost jobs and high cost would impact their chance to buy

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the “Hybrid” option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for stress, mild anxiety, help with restful sleep.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I'm a manager in a small company, lots of stress on all of us to deliver results and be cost effective.
I wake up at night thinking of work and feel a bit run down
I hear that CBD might be a good option for people like me.

Value for money price is the best option, currently CBD can cost more than $300 a month, many people can't afford it.
Better pricing will help many individuals

Only publish my submission on the TGA website with confidential information redacted. Please don't publish my name

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

CBD is readily available overseas. It is safe and plant-derived, hence it is not consistent with the TGAs remit on natural medicines to deny access. All that will do is push people to unsafe sources.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the “Hybrid” option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for stress, mild anxiety, help with restful sleep, general health and wellbeing.

I would use CBD in a safe way and read the label and warnings.

Like many Australians, I have consumed CBD in the form of Marijuana obtained illicitly. I have done so for many years, and know others who have also, and none have ever reported adverse side affects from said consumption.

In general, I find that moderate usage improves my sleep and well being, as I struggle with several illnesses for which CBD may be a treatment.. I believe being able to acquire professionally produced and affordable CBD would have a dramatically beneficial impact on my life.

As CBD may effectively treat many mild to severe conditions, it should be priced affordably to enable more people to access it. If it is priced unnafordably, it will likely only be available to people who have access to other effective forms of treatment for their conditions (such as access to specialiasts, private health cover etc.).

Alcohol and tobacco kill more people in Australia in a single DAY than have EVER been attributed to consumption of cannabinoids.

It's the twenty first century for heavan's sakes, why are we still even having this discussion?

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I would use CBD in a safe way and read the label and warnings.

A large amount of countries are already using this natural remedy for a miriad of ailments even with the THC still present in the oil, with already documented and proven results. Why does this country have to prove it all over again? I'll tell you why, greed and money making from big pharma, no other reason.

As a pensioner price affects me greatly

Let people grow cannabis and perform the simple process of removing the THC themselves. But I'm dreaming, THAT will never happen!!!!

Date:	Wednesday, 20 May 2020 9:07:23 PM

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

I have not used CBD but as I am suffering from Fibromyalgia and osteoarthritis I would use it to ease my all over body aches and pains and also to help with stress and sleeplesness that is brought up with the kind of health issues I am suffering

I think that it needs to be at a fair price so that the "every day" Australian can afford to buy it. If it is too costly it will not be able to reach the wider community

I would use CBD in a safe way and read the label and warnings.

Have not had the change to try as cost prohibitive to me, but would like to for continual pain, back and shoulders. Have heard great results from people who have been able to access.

Because I don’t want to take the “normal” prescribed drugs and their short and long term effects. If CBD was easier and cheaper to access I would use given that it is produced in a way that is safe.

I think it is important that good quality, safe and affordable CBD should be available to people, if as confirmed, the health benefits are extensive. A low price would be important so that as many people can have access and benefit from these as possible. As they are not pharmacologically produced, there is really no need for them to be very expensive (other than greed over benefit).

I have skeletal damage wuth huge pain I also know others with other conditions who could benefit from it being available and at a reasonable cost. It does help I would way rather use cbd than opioid for pain.

Its important that the cost is ser so that low income Australians can uf they choose afford to use it if its their choice to

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

CBD oil is freely available in all pharmacies in the UK so I purchased a couple of bottles to try. It has helped with mild anxiety and stress and I suffered no side affects, so what is available overseas should be available here in Australia.

Price would not affect me.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, general health and wellbeing, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild anxiety, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

My partner has an anxiety disorder and finds that CBD significantly improves his anxiety

Those in the most need for CBD (sufferers chronic pain, anxiety, stress, etc) are often in a low socio-economic demographic. Therefore lower prices would greatly benefit those in most need.

Only publish my submission on the TGA website with confidential information redacted. Do not publish my last name or address

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

I would use CBD in a safe way and read the label and warnings.

I believe there are many Australians in vulnerable financial positions and or are medically challenged (physical and mental) and unable to work in a full capacity, who are not always able to prioritise medicines for themselves due to the frequent high costs and lack of access to care.
Lower prices would mean a stronger economy and workforce due to the improvement in health.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

CBD has provided me with effective pain relief for years. I consider allopathic pharmaceutical products to be highly dangerous and they are to be avoided.

Let the free market set the price.

Disempower the government actors who force the allopathic treatment model onto patients by making all other options too difficult to pursue.
Personal choice in healthcare is an inalienable right.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for help with restful sleep, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have never used CBD and at this stage I won't be using it .. I want others to have access to it if they need it

Lower prices enable all people who need it to access it

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild anxiety.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I haven't used CBD because the cost involved makes it inaccessible.

The current pricing is outrageous. Not only is the product itself unaffordable for most Australians, the cost of getting the actual prescription and getting through all the red tape is extremely expensive as well.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Members of my Family at times suffer debilitating acute pain from long standing chronic conditions. At times CBD has been used without Dr or Pharmacist advice for the successful alleviation of pain. The availability and quality has at times been an issue. To have a quality product that is more readily available would improve the quality of their lives and help keep them at work.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have immune arthritis, I would love to be able to try CBD products as relief from some of the pain and stiffness I experience. I think adults should be able to choose a wider variety of options in treating these types of conditions.

I work so am not too worried about pricing unless it was gouged by vultures.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have constant back pain that I've never found an acceptable medicine for, along with anxiety, depression and restless sleep (due to back pain).
I haven't had a good night's sleep in years.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

My only experience with CBD was hearing another person's story about how helpful it had been for her with pain management, she said it had helped her more than anything else with no side effects.

I think the price of CBD is important for Australians as lower prices would make it more affordable for a wider socioeconomic group.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I know people who have used it for pain and anxiety and have seen how beneficial it is

Lower price more access for all demographics

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I suffer from long term migrains due to.a brain abnormality and CBD product in the USA have helped other people with my issue sleep in a regular pattern and i would be greatful for this

Most people in need of the product can't work full time jobs and thus would need the product to be as cheap as posdible

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Access to care should be affordable not just for people of wealth. If CBD is sold at a higher rate than can be accessed via other means the program would be a failure

It's time to allow all Australians access to alternative natural medicine based on scientific study not political doctrine.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

Low priced natural health products are vital for the general public. Minor issues need access sooo they don't become major issues. If people can't access affordable protects they mbassy use illegal versions or other more toxic and dangerous ones.
My family it's on a very low income and we need access to affordable natural products.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety.

I think CBD must be 'proven' to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

As a member of a support group for cancer sufferers I have seen members have great results with CBD oil.

The price needs to be reasonable so that people who are already suffering don't need to suffer more or be seeking possibly inferior forms on the black market.

Through any health practitioner would be good.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I would use CBD in a safe way and read the label and warnings.

Would help get certified CBD medication safety to help with anxiety. It would take away any desire to try alternatives means that may be unsafe or unsuitable.

If needed for anxiety and sleep, things that are common, it would be ill advised to have high prices. However, if it means having a safer and higher quality product to consume it would be okay.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

Subject:	Proposed Amendments to the Poisons Standard (Medicines/Chemicals) [SEC=No Protective Marking]
Date:	Wednesday, 20 May 2020 3:11:56 PM

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I know many people who use it safely for pain and it saves them

It's very expensive now

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the “Hybrid” option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild anxiety.

Used in UK -
Helped with anxiety

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the TGA proposal – pharmacist-only, up to 60mg/day, adults only & must be proven in large studies to work at low dose before permitted for sale.

If available, I would like myself or my loved ones to try CBD for nothing at this time.

I think CBD must be 'proven' to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would not use CBD in a safe way and will not read the label and warnings.

Publish my entire submission in full, including my name, work title and any other information about me on the TGA website.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I would use CBD in a safe way and read the label and warnings.

I would love to use CBD for mild anxiety and general well-being as I've heard from countless people in the US that have used it with great success. Our bodies are equipped with an entire endocannabinoid System that recognises CBD and these compounds seem far safer than pharmaceutical treatments in my opinion.

I would use CBD in a safe way and read the label and warnings.

I have friends that have used it and claim it is amazing. I am to nervous to try as it is not legal. I look forward to it being legal so i can use it and reap the benefits so many claim.

Cheaper so that it is not only available to the well off. Important for it to be available to all who want to use it

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Equal access for all socioeconomic level is an Australian right.

Pharmacy or specialised CBD stores

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the TGA proposal – pharmacist-only, up to 60mg/day, adults only & must be proven in large studies to work at low dose before permitted for sale.

If available, I would like myself or my loved ones to try CBD for mild anxiety, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS).

I think CBD must be 'proven' to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

So its affordable to people who need it

Only publish my submission on the TGA website with confidential information redacted.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

Subject: Proposed Amendments to the Poisons Standard (Medicines/Chemicals) [SEC=No Protective Marking]
Date: Wednesday, 20 May 2020 2:58:39 PM

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, mild anxiety, help with restful sleep, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

It's safe and proven pain relief. It's a plant used throughout human history and grows on every content, even our our bodies have evolved a canaboid system to aid and support the bodies use of the compounds. It should never of been taken away and criminalised for being a threat to industry and the people behind that are responsible for countless violence and death in my eyes. It's a plant, you have no right taking away what nature intended for the inhabitants of the planet.

Lower prices are important because it's cheap and easy to grow and everyone should be able to grow their own and use it for personal use.

Stop farting around and just do it, it's been far to long and you have no reason to keep it from people.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I haven't used it but I'd love to try for chronic back pain. I feel like the stories I've heard lead me to believe it is a safe and proven pain relief method that would work well for a lot of people

It needs to be an affordable medicine so people can actually access it rather than it be too costly to help anyone. My friend has hyper mobility and was spending a fortune on drugs to get relief and the ones she was prescribed didn't actually help her they just gave her other issues to try to rectify

Allow reputable companies to provide CBD to our market so people can access it

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

CBD has been safely used to help with back pain from an MVA

Availability and low pricing would help with lesser dependence on other drugs with worse side effects

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the TGA proposal – pharmacist-only, up to 60mg/day, adults only & must be proven in large studies to work at low dose before permitted for sale.

If available, I would like myself or my loved ones to try CBD for nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I think CBD must be 'proven' to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have multiple medical conditions, a number of which cause daily pain. The only thing that alters this pain in any way, is narcotics. I would love to avoid narcotics altogether, and would if there was an alternative that works. If CBD worked, I would absolutely change to this option and I believe many people with chronic pain would also so the same. In fact, I have spoken to many people overseas who have the same medical conditions, and are able to manage their pain with CBD and medicinal marijuana and who have been able to avoid narcotics altogether as a result.

As someone with a reduced capacity to work due to illness, a lower cost product would be ideal. In fact, having a lower cost product and a product that helps manage my symptoms could assist in the ability to hold down a job in the first place.

Since narcotics have been made prescription only, many people with chronic illness have been treated as if they are drug addicts, when all they really want is to get rid of their pain and return to a normal life. Introducing CBD or medicinal marijuana could turn this around. This not only affects physical health, but mental health also. This would be empowering.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I would use CBD in a safe way and read the label and warnings.

CBD has been shown to be effective for pain relief as well as a multitude of medical treatments if not actually cures... it has not been shown to be detrimental and it would be highly inappropriate not to allow easy and affordable access to all ASAP - please put health before profit and inappropriate micro management !!

Easy and cheap access allows people to make up their own minds and choices as they presently do with a wide range of other natural beneficial foods and substances let people make their own choice !!

Prohibition does not work to prevent people from accessing substances, it simply forces them into black economies and makes them more expensive and more dangerous - enlightened countries have been allowing cheap and easy access to cbd for years now to the benefit of their populace ... this is a no brainer !!

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I know of many people who have tried cbd and have found it has helped with symptoms of pain, anxiety, IBD

Ideally lower price, so it is accessible to more, not just the wealthy.

I beleive it is safe to use. It should be as freely available as vitamins.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Subject: Proposed Amendments to the Poisons Standard (Medicines/Chemicals) [SEC=No Protective Marking]
Date: Wednesday, 20 May 2020 2:41:39 PM

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for stress, mild anxiety, help with restful sleep, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

The proposed change will mean that I will potentially be able to better manage anxiety. As of now, diet, exercise and plenty of sleep help but since having access to CBD oil (without pharmacists advice) it has equipped me with a better tool to alleviate the symptoms during periods where an attack could take place.

The price of CBD is very important to Australians as there are people close to me that would like to use CBD as treatment of pain management but due their circumstances (age) they simply cannot afford it.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

CBD needs to be affordable to those in need of its benefits. Currently for example, my partner has a chronic knee injury involving nerve damage. He hasn't been able to work for over 5 years. We cannot afford CBD as I am the only income earner. Another example is my uncle who is 85 & suffering greatly from terminal cancer. On his pension he cannot afford CBD. Both cases would benefit greatly from access to affordable CBD.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have never used CBD before but I have read alot about it and strongly beleive that it will be greatly helpful for my anxiety and insomnia.

The price for CBD must be reasonable to allow everyday Australians to afford it. The majority of Australians do not have bottomless bank accounts, to help the most people possible prices have to be reasonable

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I would use CBD in a safe way and read the label and warnings.

If I wish to have the pharmacists advice I will ask and I'd probably ask for their advice if I was unsure of the product. I have a reaction to otc painkillers so would prefer to use cbd. The pharmacist is getting more and more work dumped on them. Do they really need more customer interaction when they need to be filling prescriptions for people that need them

Cbd used for migraine pain without having to resort to opiate based prescription pain relief. Great for anxiety and insomnia.

Lower (reasonable price) make it more available to all people who need it not just those wealthy enough to purchase.

I've heard stories of smoking weed for the CBD health benefits because CBD wasn't available and then they were effected by the THC.

Lower prices mean it's available to more people and illness is spread across all people no matter how much money they make or can afford to spend on medicine.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for stress, mild anxiety, help with restful sleep, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have suffered with anxiety for a long time and been prescribed ssri's by my doctor. I would like the option to try CBD legally in Australia.

I think the price should be equitable so it is available to all people.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Publish my entire submission in full, including my name, work title and any other information about me on the TGA website.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

The higher the price the less accessible it is for people who have less money. The same people who may have less money for other more expensive treatments.

Allowed for private use but possibly even cheaper if it is prescribed by a doctor.

Publish my entire submission in full, including my name, work title and any other information about me on the TGA website.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the TGA proposal – pharmacist-only, up to 60mg/day, adults only & must be proven in large studies to work at low dose before permitted for sale.

If available, I would like myself or my loved ones to try CBD for nothing at this time.

I think CBD must be 'proven' to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would not use CBD in a safe way and will not read the label and warnings.

Never used CBD. I use Meditation for pain control.

N/A

Other options as in alternatives should be encouraged and made available first,. For instant Acupuncture, Massage, Hypnotherapy, Herbs, etc.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Cannabis has been part of human evolution, and has been used as a healing plant since Millenia, and the human body has cannabinoid recepter sites all over.. It should have never been banned in the first place, and is far safer than most pharmaceuticals. Great for healing most human maladies, especially pain. Much needed in these times, as there is an epidemic of addiction to most pharmaceutical pain killers.The cannabis needs to be organic,and of high quality, no toxic sprays, toxic water and processed in such a way to maintain high standard and to be standardised.

I want a fair price, for the pure, quality and high standard product. No junk,No toxic roundup or other poisons used in the growing and processing stages.

People have a right to choose what product they would like to use in their body. If people are getting results and benefits don't criminalise a product, iCBD is a safe and natural product and the body uses it in such a way to heal it self.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

someone I love uses CBD oil for severe pain and to help with other medical problems, there has been no reactions and has only done good and has helped with pain levels, sleep and helped the person to relax, instead of being wound up..

people on a pension and with health problems could not afford to buy CBD Oil if it was too expensive, as they just couldn't afford it.. by the time you pay your bills, and get your food , there isn't much left over for medical stuff.

I would use CBD in a safe way and read the label and warnings.

High quality CBD oil has a beneficial therapeutic effect on my partners breast cancer, more so with a THC component and if more available for her use it would stop the lower quality less safe options from black market sources

Lower priced product to treat severe pain would be a godsend for many people with terminal cancers

Direct internet purchase and delivery from hemp farms to minimise cost and stop black market.
Possibly on prescription for proof of need, thus preventing chemist profit

I would use CBD in a safe way and read the label and warnings.

I am a chronic pain sufferer who still suffers from debilitating pain even after all the prescription medications, including opioids. I have heard about so many people in similar situations who have had a lot of relief and even managed to get some, to all of their lives back. I am just wanting a chance to try and get some of my life back too!

I would need a lower price point as I am only on a disability pension and can't afford much.

If pharmacists were trained in the use of cbd oils to be able to prescribe this natural medicine then this would definitely help both the users and stop people from having to seek it from backyard makers.

Subject: Proposed Amendments to the Poisons Standard (Medicines/Chemicals) [SEC=No Protective Marking]
Date: Wednesday, 20 May 2020 2:40:10 PM

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for stress, mild anxiety, help with restful sleep, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

[redacted]

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS).

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have not used CBD but I suffer from a couple of chronic conditions. While the conditions I have are not currently covered by this proposal, I believe that if CBD becomes available to treat a variety of mild conditions then it will lead to wider research through increased funding, and wider acceptance with better safety controls. So it may help me in the longer term. For now, it may help me with IBS and sleep so it is of interest to me in the short term also.

Higher prices of CBD would prevent me from testing whether it may help me with some of my more mild conditions or symptoms. If it were at a lower price I would be more likely to try it. At a higher price it would only be worth it to me if I knew it would assist with my more serious health concerns, but we are not there yet.

I believe that CBD should be practitioner controlled for the public to access it.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Have older family members with conditions that CBD could potentially help where other treatments have failed

Wouldn't affect me directly but price definitely matters for matters of public health

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

I would use CBD in a safe way and read the label and warnings.

Pain relief from arthritic condition and diabetes. Also IBS.
CBD is only a small component within the cannabis plant, with many benefits available in a full plant approach, hence why the black market is still so strong!!

Lower prices would encourage people to stop using the far more dangerous paracetomol or ibroprufen.

Make CBD available like as readoky as health food AND the full plant accessible nationally, to people as they have in the ACT., and many US states.

Date: Wednesday, 20 May 2020 2:30:58 PM

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the TGA proposal – pharmacist-only, up to 60mg/day, adults only & must be proven in large studies to work at low dose before permitted for sale.

If available, I would like myself or my loved ones to try CBD for mild pain.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I suffer from arthritic pain in some of my joints and would like to try a different form of pain relief.

I would like to buy low cost locally produced product.

Only publish my submission on the TGA website with confidential information redacted.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Socioeconomic factors would influence people's ability to help themselves if it was too expensive.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for stress, mild anxiety, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would not use CBD in a safe way and will not read the label and warnings.

If you look at all the empirical and anecdotal evidence from jurisdictions that allow the sale and use of thereputic CBD products, it seems nonsensical to not allow a product that has seemingly very little to no negative side effects.

CBD is not psychoactive like other cannabinoids so there is little reason to restrict its use.

Prices should allow access.

Compare to prices in North America for instance

From a shop, without restrictions

Only publish my submission on the TGA website with confidential information redacted. do not publish any info featuring my name or contact details.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

For mild health conditions, I see benefit in trying CBD, just like curcumin for reducing inflammation. I have not tried CBD yet.

Price is always a factor. Lower prices but quality ingredients are always something govt and consumers should aim for.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

If it was prescribed safely then I would be able to trial it for adhd and overall health & wellbeing, I've heard it does wonders.

Lower prices would be better of course, but legality is the most important thing. If we are allowed to buy it then that is #1 for me.

Companies with high quality CBD should be able to sell it, not just pharmacies. This also allows to grow the local economy as it is a big industry in the USA and we deserve that kind of economic boost.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I would use CBD in a safe way and read the label and warnings.

I have not had experience with CBD oil because when I tried to purchase it the shipment was blocked for legal reasons. So I still struggle with post-cancer anxiety and menopausal symptoms- I am 35 years old.

I think the price of CBD oil is important because everyone had the right to be able to afford medicine that helps them. It is from nature and mark ups should only cover basic business costs.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I would love to have CDB integrated in to my daily routine to help with skin issues. I also suffer from waves of anxiety that would be minimised significantly if CBD was to be available. I have tired it before and I have many friends who use it overseas. It's INCREDIBLE for a myriad of things.

I do believe it needs to be affordable but I also understand that quality does come with a price in certain circumstances

There should be trials taken out for people to be able to experience the positive side affects of regular use.

The public could put themselves forward to try for the TGA to finally get that its an amazing product and so helpful to those suffering from pain, gut issues, skin problems, anxiety and more.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

My mother suffers severe rheumatoid arthritis in her neck and wrist. She has been waiting for surgery for almost twelve months now and is in so much pain- she could be using cbd to help alleviate pain, anxiety and now depression. I suffer from anxiety and struggle to sleep. I know that cbd would improve sleep quality as well as have a calming effect on me

Needs to be exceptionally high quality. You get what you pay for and we don't want the backyard rogues producing a cheap low quality product

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I think CBD must be 'proven' to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

I've never used it and none of my loved ones have ever used it. It's not available to use. I've read it has great benefits and I believe adults should be able to make their own informed decisions and have access to CBD products.

Wouldn't affect me at all. I beleive higher prices could potentially hinder anyone attempting to abuse the drug (if that's possible) but lower prices take away the potential black market.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

I would use CBD in a safe way and read the label and warnings.

CBD has been proven to work effectively.
It should be available at a price that even the most marginalised can afford. In fact these are the ones who would benefit the most as low cost and low side effects is why people make their own illegally.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

Being on a pension it's price would exclude us.

I would like to see it being legalised in every state
And doctors not saying they can't prescribe it! We would like freedom of choice of what is used
To help our quality of life from a natural plant beneficial for health
Rather than opioids.as it is in other countries. Thankyou

I have arthritis and suffer pain everyday medication currently has side effects and create their own set of problems . Cost is also a problem. I don't like to put chemicals in my body , the more natural products the better. CBD is safe with no mentionable side effects.

Alot of older poeple are the ones that need it most, and unfortunately higher price makes it impossible for them. Why do some poeple have to live in pain so others can live in luxury, just be fair and reasonable.

Date: Wednesday, 20 May 2020 2:15:43 PM

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, general health and wellbeing, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I think CBD must be 'proven' to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Corrwct pricing would assist it being availbe but not too cheap.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have little need for the use of CBD, but know of many conditions that may be improved for others.

I don't think it should be low cost, or high cost, but a moderate cost. I think it needs to be respected as a medicine and not taken for the heck of it (too cheap). Also, the cost shouldn't be inhibitive for those on lower incomes with chronic health conditions.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have never used CBD but done thorough research into its uses and potential benefits. By this research I know if I had access to CBD it would positively impact on my chronic pain issues and that of my family members.

Of course lower prices are preferred, but if the price difference meant the comparison between high quality, pure CBD as opposed to poor quality, I would pay the higher amount for the higher quality CBD

My personal belief is individuals should be permitted to purchase CBD from their preferred CBD supplier. There are many natural health companies that produce a standard of CBD at a pure quality that people like me have sourced and wish to purchase from.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have seen the benefits of CBD treatment in family and friends who have suffered for years from various health issues and cancer. I think it would benefit many Australians and that is safe to use.

CBD should be affordable and accessible for all Australians who could benefit from its use. It shouldn't be out of reach due to socio economic reasons

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS).

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I suffer severe anxiety, insomnia and IBS so this would potentially help me across the range of conditions

Australians pay quite a lot of out of pocket expenses for prescribed medication so I believe they should have equitable access to CBD that is affordable

I would be more than happy to purchase CBD from [redacted]

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, help with restful sleep, general health and wellbeing, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I believe it is outrageous the government controls a mild natural drug that improves the lives of so many people, while allowing destructive drugs like alcohol and tobacco to be so freely available.

I don't think they would affect me too much but would obviously prefer it to be cheaper. It would need to be priced to discourage abuse obviously.

None

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

SHARE YOUR STORY: The TGA would like to know how the proposed change will impact you. Please describe whether you or your loved ones have used CBD safely with or without a pharmacist's advice. What was your experience?

I have not used CBD, but certainly would have like to when I was seriously ill a few years ago.

What I would like to see in future is for Australians to have the choice to access CBD to help with health conditions they're suffering from. There is a mountain of evidence to suggest that it can aid in a variety ways with a range of conditions, and people have the right to access it if they choose.

Describe how higher or lower prices for CBD would affect you. If you think the price of CBD is important for Australians, please describe why.

Affordable prices are of course preferable. I personally would definitely struggle to pay high prices and I know many Australians are in the same boat. The main concern however is that it is available to Australians if they choose to use it.

Provide any other feedback (if any) you have for the TGA on the best way for the public to access CBD here:

It is imperative that people have choice in the medications they have access to. There is a mountain of evidence that CBD can help with a range of health conditions, and we must therefore ensure that Australians have access to it.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the TGA proposal – pharmacist-only, up to 60mg/day, adults only & must be proven in large studies to work at low dose before permitted for sale.

If available, I would like myself or my loved ones to try CBD for stress, mild anxiety, general health and wellbeing.

I think CBD must be 'proven' to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

lower is better. medicine should be accessible to all

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Lower price would mean it would be accessible for low income earners, pensioners and those that are not working due to an illness

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I think CBD must be 'proven' to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

N/A

lower price would make it more accessible for people who want a more natural alternative to pharmaceuticals with harmful side-effects. as it is just a natural plant extract I don't think it warrants an exorbitant price.

Sell through pharmacies and allow products that contain CBD (chocolate, drinks etc.) not just oils etc.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Many people have had such good results with cbd. If there was ever a time my family or I would be in certain situations, I would like the freedom of choice to try it as a treatment.

It needs to be available at a decent cost, otherwise the public won't have the opportunity to try it. I'm pretty sure it wouldn't cost that much to grow.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Higher prices create inequality of treatment, I think it's fairly obvious who would benefit from price hikes while the plebs go without food to treat their pain

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for stress, mild anxiety, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

The price should be affordable to all levels of income so that all people can get the full benifits of CBD

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, mild anxiety, help with restful sleep, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Great for minor pain relief.

Lower prices would make it more accessible to people with low income.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Helps with severe joint pain.

More affordable prices and a natural relief for pain instead of drastic painkillers such as Tramadol and Endones.

Obtain from a chemist.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have suffered from cystic acne and a reoccurring highly debilitating perianal absys for the last 19 years. I am 40 years old.

Surgery, multiple courses of differing antibiotics, diet changes and self health regulation have not tamed the condition.

Two years ago I managed to procure illegally, high quality CBD at an unsustainable cost to myself.

The bottle lasted 1.5 months at high doseage, after two weeks my usual cycle of illness, that also results in mental health issues also (uncontrollable irritability, anger and rage due to toxicity within my blood stream) was declining. My cystic acne was healing, my mental state was evening.

At 1 month, my fissure had all but healed, flares and drains that were happening bi weekly sometimes weekly had ceased.
My wound and condition that had been reoccurring for nearly two decades was healing.

My mental state had started to equalize for the first time in nearly 2 decades.

There were no other changes in my life i was making. No other variables (ive watched carefully over the years for them!). At 2.5 months, 1 month after i had run out of CBD the wound started re flarring and symptoms started again. I couldnt afford the CBD oil, no matter the positive change to my life, the cost was unsustainable due to other finacial responsibilities.

I have zero doubt that the CBD oil had 100% of the contributing factor to the healing of my physical and mental ailments.

Higher prices would box me out. Preventative medicine should be accessible to all. Lower prices would quite literally change my life.

Date: Wednesday, 20 May 2020 1:43:53 PM

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

There is an enormous amount of studies already done to prove the good this plant brings and lower prices will allow access for all.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS).

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

It should be mid priced, to avoid being abused as a drug.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the TGA proposal – pharmacist-only, up to 60mg/day, adults only & must be proven in large studies to work at low dose before permitted for sale.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep.

Only publish my submission on the TGA website with confidential information redacted.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Access to healthcare, provided by the natural world, ought to be available to anybody who so chooses it.

Only publish my submission on the TGA website with confidential information redacted. My name, email address, or any other personal contact details, including information specific to my health historical and current.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Have used CBD and found it highly effective for pain relief and anxiety reduction.

CBD should be widely available and therefore lower priced to be accessible for everyone. It is not costly to produce and therefore should not be high priced so as pharmaceutical companies can profit from it.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have found CBD to be very helpful as it helps me to get to sleep. I cannot take pharmaceutically prescribed drugs for this condition as the side effects have been horrendous.

I have been prescribed medical cannabis but the cost is prohibitive.

I would like CBD to be available easily from a chemist. There is worldwide evidence of the safety of CBD.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the “Hybrid” option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the “Hybrid” option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS).

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have not used it but have been susceptible to stress and anxiety and don't like to take prescription medication if I can help it. By all the anecdotal evidence from overseas where it is already available, I believe that it could be of some use. I would also like a more natural option for mild pain relief.

Price is important so ALL Australians can afford to have access. Many alternate treatments are out of the reach of those who could most benefit.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the TGA proposal – pharmacist-only, up to 60mg/day, adults only & must be proven in large studies to work at low dose before permitted for sale.

If available, I would like myself or my loved ones to try CBD for nothing at this time.

I think CBD must be 'proven' to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,
