Subject: Proposed Amendments to the Poisons Standard (Medicines/Chemicals) [SEC=No Protective Marking]
Date: Tuesday, 19 May 2020 11:22:37 AM

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

It's a product I would expect to see in a pharmacy or health food shop next to supplements, not behind a counter.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

[REDACTED]

Date: Tuesday, 19 May 2020 9:10:26 AM

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for help with restful sleep, general health and wellbeing.

I would use CBD in a safe way and read the label and warnings.

I have used CBD to help with sleep and general wellbeing.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

[REDACTED]

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for nothing at this time.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I would like to see CBD widely available & easily accessible urgently as I believe it will be a safe & effective alternative for the treatment of severe pain where nothing else seems to work.

I think the price needs to be kept low so all people, regardless of income have access to it.

I think it should be available in health food stores as well as pharmacies or wherever people shop for their healthcare needs.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I personally have not used CBD oil but know of others who have. I have researched the benefits and think that we should be allowed to have the option of being able to use it when our health and well-being are compromised.

The price of CBD oil is very important as it makes it more accessible for especially lower income earners. No-one should be disadvantaged.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the TGA proposal – pharmacist-only, up to 60mg/day, adults only & must be proven in large studies to work at low dose before permitted for sale.

If available, I would like myself or my loved ones to try CBD for nothing at this time.

I think CBD must be ‘proven’ to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

My brother-in-law used cannabis to control pain when he was dying of cancer. I would have liked him to be able to access CBD safely from a pharmacist.

I think the price is very important so that it can be accessed by everyone who needs it.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I would use CBD in a safe way and read the label and warnings.

I have been medically prescribed cbd oil for anxiety and think it should be available easily to everyone.

Right now the door is open for many abuses on price and that shouldn't be so. I stopped buying in as it was too expensive for me. I had it from pharmacy (nanabidiol). I would like to access it easily as it is great on anxiety.

I would like it available in health shops and online as well as in pharmacy. However the quality should be controlled.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have previously used CBD for anxiety and sleep issues, stemming from chronic back pain. Unfortunately as this is extremely difficult to get a hold of in Australia my experience has been quite limited. During trips overseas I have also been able to use CBD in higher doses and found it to be quite beneficial. I take strong narcotic painkillers, and have done so for over 10 years, and I would love a safer alternative to try instead of these drugs.

In my opinion lower prices would ensure that all citizens could get fair and equal access. While I can understand that higher prices might lead to higher quality medicines or products, there is no guarantee this will be TGA approved and covered under the PBS which would mean that this doesn't allow a wider audience to benefit if required.

Ideally access would be via dispensaries or health stores, and/or through pharmacies, either on the shelves, or as pharmacy supplied medicines.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

Subject: Proposed Amendments to the Poisons Standard (Medicines/Chemicals) [SEC=No Protective Marking]
Date: Friday, 22 May 2020 4:38:59 PM

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

My closest friend is only 19 years old, and suffers from early-onset arthritis. If CBD was accessible, it would be incredibly effective for pain relief, drastically helping them and changing their lifestyle.

CBD should be as cheap as possible, so it is accessible to all. It should be a right to have access to whatever medication you need.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

The proposed change for the availability of CBD oil will impact on me in a favourable way. It will reduce the cost and increase the availability of CBD oil, and ensure quality controls. I have used high quality CBD oil with no adverse effects, and without advice from a pharmacist. It has effectively dealt with chronic pain issues I have, enabling me to discontinue using opioid based pain relief medication. It gives me a sense of well being.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

i tried cbd while overseas, it really helped with my mild joint pain. it was a shame i couldnt get it here (safely) as i would definitely use it

higher cbd prices would make this very useful substance inaccessible to some australians, and they have the right to be able to afford these products also. also these people are often not able to afford other more extensive medicines, and low cost cbd would be a great replacement for some.

I would use CBD in a safe way and read the label and warnings.

I find that the CBD is more natural than the factory made prescriptions which are made with chemicals. I have used CBD when I was living in Vancouver, Canada for anxiety and to help me sleep allowing me to come off medication for them during that time.. Now back in Australia I have sadly had to go back on those medications .

Costs should not be limited only to those who can pay. What about those who are suffering? They should be given the option of choosing what's best for them.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

Currently the price of CBD precludes many people from using it with benefit. Also the process is quite arduous with many doctors not even willing to assist in obtaining it for their patients.

The cost and process for obtaining CBD must be reasonable so whatever steps are necessary for this to be achieved should be undertaken.

Date: Friday, 22 May 2020 3:46:19 PM

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS).

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Only publish my name and work title on the TGA website, do not publish my submission.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

I spend six months each year in Canada where CBD oil is legal and Canadian society hasn't fallen apart. Many patient's here use CBD oil safely and routinely for a vast array of conditions with good documented outcomes.

Just follow what Canada does and let the government collect the GST on sales. At the moment you can still buy plenty of CBD oil produced locally by organic farmers who do know how to manufacture the oil but the government doesn't collect any revenue.....pretty dumb actually.....just saying.♂♂

I would use CBD in a safe way and read the label and warnings.

It's naturally made, there should be no reason for high price. People should readily have access to it as an option instead of prescription medications.

People should require a letter or note from a therapist or health practitioner such as psychologist, kinesiologist, chiropractor, physiotherapist. This should not be limited to the power of a GP. The letter should accompany reason(s) for use.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

Although I have injuries I've not needed CBD however as I get older I'd like the option to use something for pain that is not an opioid as we all know about America's opioid crisis. I also know of 2 friends using it and it has given them back a good quality of life.

It needs to be relatively affordable as people needing it may be unable to work because of pain.

Buy it from a pharmacy or healthfood store.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS).

I would use CBD in a safe way and read the label and warnings.

Aided in relief with IBD. To have it more readily available at a high quality with lower price/more competition would be highly beneficial with symptom relief.

Making it more readily available to the masses to assist with pain relief, would ease pressure of the already strained medical system. Rsystem.

Readily available from various stores.

Only publish my submission on the TGA website with confidential information redacted. Please keep health information and name confidential. Thanks

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, help with restful sleep, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

My best friend has 13 screws and 7 metal plates holding his ankle together after a skating injury that ended his chances of going professional. Since we finally got him access to medical cannabis his quality of life has improved incredibly and longer requires opioids and anti depressants and I've never seen him happier for someone who's entire future was taken away from them

Lower affordability

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Subject: Proposed Amendments to the Poisons Standard (Medicines/Chemicals) [SEC=No Protective Marking]
Date: Friday, 22 May 2020 2:36:54 PM

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I experience high levels of pain throughout my body because of that, I also have issues sleeping and I also have mild anxiety throughout each day. Taking CBD oil has helped with those issues and basically made them non-existent. I am able to sleep at night and have very low amounts of pain so I can get through the day doing normal day to day tasks.

It would help Australians gain access to something that could change their life by helping their problems at a low, reasonable cost.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS).

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Price is very important now with there Covid19 devastating world economical impact on job and business security

Free access to safe CBD oil from recognised suppliers would be good so wide spread use of the CBD oil is possible for the masses just like in other jurisdictions around the world giving SOLE RIGHTS & Control to BIGPHARMA will push up the price for sure

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I would use CBD in a safe way and read the label and warnings.

I have severe inflammation in my GIT (15yrs now) combined with skin issues and I want to try CBD to heal it as nothing has worked yet. It needs to be made widely available

CBD can be made at home quite cheap so I don't see why it should be made to retail at a high price. Health before greedy profit

Legalise the plant it's made from so that it doesn't get corrupted by big pharma. It grows free from the earth so stop being greedy!

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I think the price of CBD is an extremely important factor for the public health of Australians, as subsidizing costs will allow low income peoples to access this medication. If the cost of CBD were prohibitively high than it would only be available for use by the most priviledged populations of our community.

The best way for the public to access CBD would be widely available access through pharmacies. I believe it would also be important to implement public health campaigns regarding the affects and possible reactions to CBD, as well as educating doctors so they feel comfortable prescribing.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

severe arthritic pain, sleeplessness, anxiety

High priced CBD will not allow many who could benefit from use of CBD products to be able to access them, its important its fair and easily accessible to those who most require or could benefit from it, products should not be out of reach for those on low and limited incomes

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I would use CBD in a safe way and read the label and warnings.

I understand that there are no side effects to the use of quality CBD oil. CBD oil with pharmacist and doctor advice was successfully used by my partner for anxiety and poor sleep. I believe this is a safe and effective treatment option for people suffering from these conditions.

CBD oil should be accessible for all Australians and not limited only to those who can afford it.

Please allow CBD to be available from Doctors, Health Care practitioners & health food stores with Naturopaths on hand that can answer questions and guide the consumer properly.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I would use CBD in a safe way and read the label and warnings.

It is a valid form of pain relief and assists with stress and anxiety. I have seen it have a positive impact on friends and family with mental illness and painful medical problems throughout their lives. They were of course taking it 'illegally' but I supported them taking it as I saw the benefits.

I think all medication should be affordable to those who need it. That's what makes us a wonderful community with a 'lucky country.' Of course it should only be taken through consultation with trained medical professionals for the safety of the patient.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

Date: Friday, 22 May 2020 2:01:24 PM

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the TGA proposal – pharmacist-only, up to 60mg/day, adults only & must be proven in large studies to work at low dose before permitted for sale.

If available, I would like myself or my loved ones to try CBD for stress.

I would use CBD in a safe way and read the label and warnings.

I suffer from PTSD from service to the NSW SES.
CBD has been extremely helpfull in controlling sleeping patterns and mood swings

Publish my entire submission in full, including my name, work title and any other information about me on the TGA website.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Steve Martin

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Arthritis pain, sleep difficulties, mild anxiety used successfully by three different people of three different generations

Current legal price unaffordable to most

Only publish my submission on the TGA website with confidential information redacted. Name

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

The cost of CBD would be very significant for affordability reasons given that the ongoing effectiveness would mean continued use for a sustained impact.

I believe it is important to keep costs low for everyone to benefit who suffers conditions that are very costly in the medical field.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I've suffered rheumatoid arthritis for the past 14 years. I've never used drugs beyond paracetamol and, very occasionally, NSAIDs; instead my traditional Chinese medicine practitioner has kept it largely under control, and I've made a point to eat a high-quality diet and stay active. However, the pain in my hands is getting worse as I get older. I still want to avoid the disease modifying drugs due to their horrendous side effects, and I believe CBD could be the solution for relieving this pain.

Price is important as I'm on a limited income.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I have an autoimmune condition and CBD oil helped me enormously when I was suffering from pain, anxiety and not sleeping well. It was literally overnight that I used to feel better after taking CBD oil. I also believe it actually reduced the inflammation in my body.

I'm not earning a lot at the moment so if it was cheaper it would help a lot.

I feel it could be possible for me to further reduce the inflammation in my body if I had more access to CBD oil

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild anxiety, help with restful sleep, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have been using imported cbd for months now and have seen a radical change in my well being related to *mild* anxiety and *mild* panic attacks. CBD is non cardio toxic and I believe that the government restriction forces people to turn to pharmaceuticals that change their bio chemistry.

I am a student and casual worker who higher priced cbd would effect if I were to rely on it for medical purposes. There shouldn't be any more roadblocks between misery and happiness.

I think it should be free and open for anyone to access. To me I don't see any problems arising from it's sale. It is a benign substance with no potential for abuse.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

hello i have a lesion in the back of my brain and i suffer migraine headaches and then get anxious as i can't get any relief.

As we are currently in a pre depression which will inevitably lead to a global depression i feel its anyone's human right to have access to this amazing natural plants healing qualities.

Please Learn about the entourage effect, so we can get the legal CBD to accompany CBD

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have not used the oil but would like it be to available to control pain as there are too many side affects from pharmaceutical drugs and for people to have a choice on how they are able to control many things .

Obviously cost is better at lower prices as then more people will try it !

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, general health and wellbeing.

I think CBD must be 'proven' to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

Sick of the side affects other pharmaceutical drugs give.

Lower prices would help people more because this has been proven to be a low cost drug.

Vendors that are watched closely.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I do not want to use this at this time but I support others being able to access it.

Should be available through qualified alternative health practitioners

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

CBD has drastically reduced my anxiety and stress levels - I use a mild dose. I've tried heaps of prescription based focus meds, nootropics, diet changes and nothing has impacted as much as CBD. Other benefits have included a huge increase in quality sleep, and a reduction in pain / inflammation! My overall life quality is so much better with this and I can only imagine it would help others.

Higher pricing would make it very difficult for people to use and see benefits. I don't think price should be an issue or blocker - its seems wrong!

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I would use CBD in a safe way and read the label and warnings.

I have a relative with an Acquired Brain Injury who has safely used CBD oil with very good results. I have also read the results of over 30yrs of Israeli medical research into CBD oil use for numerous health conditions which has demonstrated very safe and efficacious results. I also know it was used widely and safely 100yrs ago. Research has proven humans have receptors in the brain and body. specific to the uptake and utilization of cannabinoids.

Myself and acquaintances with minor health conditions are often unable to afford the usual medicines and have often found them unsuitable for their complaint.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

It's been used for anxiety, stress & sleeping disorders
I can tell you it's great it has shown excellent results on sleeping disorders and great results for minor anxiety, the best part of all it's natural chemical free and don't have to worry about taking some other drugs that might affect other organs.
If you believe on health care & profits CBD won't let you down.

Prices are very important because if it's too expensive there will be less people buying it which it means less profit for the market, so it needs to be affordable so more and more people can use & also the lower the price the more people will buy it there for the more profit for the industry

I will say for 100ml something around 200\$ but not more than 250\$

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Less dependency on addictive pharmaceuticals. Thank you

So many people could benefit in so many good ways with out the stress

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Will be helpful in assisting me with coping with my anxiety everyday more naturally and safely than prescribed medication. I have used cbd before however it was very expensive and in a low dose.

I think a fair middle ground price range should be implemented making it accessible enough for those who want to try it and those who need it.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

CBD has helped me in the past with anxiety and inflammation.

CBD should be accessible to all economic status. Paying exorbitant amounts of money for something that is a processed plant isn't warranted.

Only publish my submission on the TGA website with confidential information redacted. Do not publish my name. You can use the information i have provided

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

I would use CBD in a safe way and read the label and warnings.

The price of CBD is extremely important in that if it is priced too high it will further widen the health service gap seen currently in Australia, particularly within marginalised populations who are already at an economic and financial disadvantage. As with the cost of all medication and health services, the notion that only certain socioeconomic classes should be able to afford particular medications is in violation of Australia's current health care acts and policies.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I haven't had a personal experience with CBD oil yet although I am keen to try it. Having researched the benefits of CBD oil widely, I think it's imperative that a high quality low cost product is made available to the general public as it's suited to so many common ailments that affect people's daily lives; like anxiety, stress, poor sleep, muscle pain, period pain, endometriosis, PMD etc

The cost should remain low to allow equal access to all Australian's. The availability of CBD oil needs to be fair and just. Not only available to the rich.

I think having registered businesses/shops like in The Netherlands, Canada and USA would be a good option? With qualified practitioners able to ascertain the unique needs of the individual and prescribe accordingly. I think this space for practitioners must include professionals with a Health Science degree or qualification such as Naturopaths, medical doctors, osteopaths etc

I would use CBD in a safe way and read the label and warnings.

I suffer from anxiety and insomnia on a regular basis. I believe i would greatly benefit from being able to easily access CBD.

I think that all medicines should be accessible at affordable prices. Although i earn a relatively good salary my expendable income is low due to mortgage and insurance costs. I have a family member who suffers from MS and believe her quality of life could be greatly improved by CBD but if it isnt affordable and accessible she would not be able to purchase it on a regular basis

If available, I would like myself or my loved ones to try CBD for mild pain, help with restful sleep, general health and wellbeing.

I would use CBD in a safe way and read the label and warnings.

It relieves pain by taking a teaspoon at night, and another one in the morning. It helps with sleep and night cramps in the legs. I have used it topically the most, by rubbing it in to affected muscles and for sciatic pain. It also promotes fast healing of sunburn etc.

It should be made affordable and accessible. It is one of the most ancient remedies and our bodies have adapted to it to the extent that we have receptors for it.

I think it should be made available through chemists and health food shops. It needs to be a pure substance.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

it would make life more enjoyable if i had some relief from my pain and anxiety.

cbd needs to be accessible to the average Australian

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Have had people i know use an adjunct to cancer treatment with great success

Lower so more accessible. Most people in chronic pain etc have limited funds due to either working less and drugs they have to buy and this would help.

Only publish my submission on the TGA website with confidential information redacted. Personal details

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

A friends family member has used CBD . They have found it very beneficial as it has helped stop swelling around ankles, feet, hands and face.

I think CBD should be lower priced so that anyone who needs it would be able to afford it.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

I would use CBD in a safe way and read the label and warnings.

I've heard of a lot of good results with sleep and anxiety from people in England and America. I also think Australians Should have it as an available option, for freedom of choice.

The lower the cost the more available it would be to wider group of people. But as long as that didn't effect the quality of the product.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I would use CBD in a safe way and read the label and warnings.

I believe CBD oil should be widely accessible because as a Allied Health consultant / Remedial Massage Therapist I see clients with mild to chronic conditions that CBD oil would help relieve these conditions. For the few clients that have able to access CBD oil they have received favourable benefits, with no side effects.

Lower prices would mean that more people would have access to CBD.

I would use CBD in a safe way and read the label and warnings.

Without pharmacist advice.. safely using 1000mg..3-5 drops for neck and shoulder pain, restful sleep and mild anxiety.

I could recommend it to those with limited funds. Especially in this economic climate. Retired folks are I such a limited income. Better use of funds instead of pain killers for safety.

Health food store and pharmacy.

Subject: Proposed Amendments to the Poisons Standard (Medicines/Chemicals) [SEC=No Protective Marking]
Date: Friday, 22 May 2020 10:55:39 AM

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for general health and wellbeing, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Should be free market,

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I would use CBD in a safe way and read the label and warnings.

Would only like it to be used when all other avenues of treatment exhausted. Then if needed to then be accessible for those that do benefit from it without extra stress of something overpriced . Seriously sick people and in chronic pain often have limited incomes. Higher cost would mean someone benefits from someone else pain and suffering.

Only through qualified and trained practitioners who are aware of everything client is already taking and their health status. So only through clinic situation , not online to be abused.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for stress, mild anxiety, help with restful sleep.

I think CBD must be 'proven' to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

I have used in the past for severe anxiety and panic attacks and worked really well. It also helped me to focus, have more clarity and quality sleep

CBD should be available for the ones who needs most and price is very important as most of those people aren't able to work due to health conditions.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the TGA proposal – pharmacist-only, up to 60mg/day, adults only & must be proven in large studies to work at low dose before permitted for sale.

If available, I would like myself or my loved ones to try CBD for mild anxiety, help with restful sleep.

I think CBD must be ‘proven’ to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

I would say set up the price higher to start with, so there will be less misuses.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

No I have not used as it is not easily or readily available mild cases of pain eg arthritis

Price and efficacy similar to manufactured (chemical) products would make a natural product more widely used and therefore more people would be helped.

Low dose/high quality CBD should be as widely available as aspirin or paracetamol products. High dose/high quality CBD should be available by prescription from naturopath or GP

My family would benefit from the use of CBD oil as we have PARADOXICAL REACTIONS to most pharmaceuticals, this is the case for 10% of the populace. It is hereditary.

Affordability is very important and should be made accessible to everyone.

Let people grow their own plants and make their own oil (this is one option). Under the instructions of their GP is another.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have used CBD oil (<0.1% thc) for almost a year and have seen dramatic changes to my IBS, mild anxiety and reactions in stressful situations and deeper sleeps.

It should be accessible for all Australians. A higher price effects who can purchase it, but also leads those to source cheaper oils which most likely haven't been regulated

Only publish my submission on the TGA website, do not publish my name or any other information about me.

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS).

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have seen positive benefits in patients with chronic joint and muscular pain

Most chronic pain affects the older population, many of whom are retired and on the pension. My dad for example, would need the price to be lower so that he could afford access.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Neither myself or my partner has used CBD but I believe it would benefit my partner to help him sleep better. We both have mild anxiety and I would like to try it intermittently at times when this flares up. My partner and I would also like to try it for aches, pains and inflammation.

I think it needs to be affordable. My partner and I both work full time and 0.8 part time respectively. We live a good life but still struggle with keeping up with bills week to week so it's really important that we have access to affordable health care solutions.

Publish my entire submission in full, including my name, work title and any other information about me on the TGA website.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

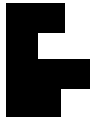

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, mild anxiety.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have used CBD oil in a massage oil for muscular pain and had great pain relief as a result. I have also used it for stress/anxiety/insomnia to good result.

Obviously if prices are higher it is only affordable to people who can pay the high price and many people who need it would not benefit so I support lower prices. The base oil can be of lower cost for example olive oil or coconut oil is cheaper than sweet almond oil so this cheaper option should also be available ideally in terms of using it as a massage oil.

I believe it should be freely available in health food shops and pharmacies.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

whilst studies are limited in Australia, evidence-based research globally have all concluded that CBD products significantly reduce opioid use. I think considering how we are forever battling opioid misuse, it would be contradictory to our mandate to not allow easy and affordable access to the proven alternative.

I think it should be schedule 3: involving the pharmacist and thereby ensuring appropriate product selection.

Publish my entire submission in full, including my name, work title and any other information about me on the TGA website.

I would use CBD in a safe way and read the label and warnings.

Higher prices for CBD oil would likely make it inaccessible to both myself and to other Australians. I believe it is important that Australians have fair and equitable access to low dose CBD oil as a possible option to helping with mild symptoms or conditions. Lower prices would make this possible.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

A loved one has used CBD safely without pharmacist advice - it alleviated migraine symptoms better than any other current prescription or over the counter medicines.

Higher prices are unlikely to affect me as I am a strong believer in CBD's health benefits, however I believe it should be low-cost enough to be affordable for most Australians.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for nothing at this time.

I think CBD must be 'proven' to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

I would use CBD in a safe way and read the label and warnings.

Obviously if the price is kept at a lower rate it would be more affordable for the every day person as well as lifting sales

We are supposed to be living in a free country, so allow us to live freely. Make it an option and place safety precautions alongside sales to give people a safer feeling of wanting to try it

I would use CBD in a safe way and read the label and warnings.

Increased relaxation before bed. Increased sleep cycles

Higher prices and lower prices don't determine quality in the market. We need a selection to choose from before we can make decisions

Provide more education around the safe use of CBD with Australia's consumer market.

I would use CBD in a safe way and read the label and warnings.

I have not yet used CBD oil, however anecdotal evidence from several close friends and acquaintances is that it is effective in helping to reduce minor pain, anxiety and stress without side effects that can often occur with "traditional western" prescribed medications

Pricing effects will depend very much on the shelf price set. An artificially high price will potentially place the supposed benefits out of reach of many who may well gain the greatest benefit.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I've used CBD oil for periods of insomnia, with very good results. However it is very expensive and not easily accessible. A friend of mine is also using the CBD oil for pain, and has been able to come off of her pain medication. We are both extremely happy with the results we get from CBD products, and hope that it will become widely available to all Australians in the near future.

The CBD oil I currently purchase is expensive. The cost makes it unattainable for many people, which is unfair.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for stress, mild anxiety, help with restful sleep.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

While living in Canada, where cannabis is legal, I was able to go, ask advice and purchase a high quality CBD product from a dispensary. It has been the most effective treatment for my anxiety.

Just like any medical treatment, it should be accessible to everyone, no matter their situation in life.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I believe CBD oil should be widely available for the Australian public, with strong manufacturing controls in place to make sure it's a pure CBD oil with no nasty fillers and also to check the cannabis plant for traces of mould. We all have an in built endocannabinoid system in the human body and are designed with receptors to cannabinoids for pain relief and relaxing. With the increase in stress, sleep issues and mental health problems in today's society - I believe CBD oil should be available as an option for people experiencing anxiety and sleeplessness/excessive stress to see if it helps them. Additionally, both my mum and sister had chronic fatigue syndrome and they get flare ups of pain and have issues sleeping - CBD oil could greatly help them. My partner has diverticulitis flare ups occasionally and the anti inflammatory properties of CBD oil might help to reduce the severity of the flare ups. I, myself have suffered from panic attacks in the past and anxiety, and wished I had access to CBD to see if that would have helped because the panic attacks were debilitating and for seemingly no reason. I did seek other help with counsellors and supplements, which helped too.

I think competition should be encouraged so as to prevent a monopoly of one brand in the Australian market. I believe lower prices will allow most Australians to access CBD as medicine, however quality control should be paramount. If the product is not manufactured properly and is not 'clean' then the company can greenwash claims and may be a less efficacious product. Grants should be provided to good manufacturers and people who source & farm the cannabis plants under good conditions and have a strong understanding of cannabis farming. The govt should work with this farmers and manufacturers to ensure the plants are not mouldy and the end product is of the best quality.

I believe CBD should be accessed in health food stores and pharmacies.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I have used CBD in America and felt a noticeable difference in stress and mild anxiety, and just a general increase in well being. My husband had an increased ability to focus (possibly he has mild adhd) and general mood and well being improvements

Of course the price is important. It should be a competitive market with no restrictions on price

I have fibromyalgia & cbd has changed my life. It has given me a settled mind, good sleep & a lot less pain which means I'm able to work. I have had consultation & found the consult & medication is very expensive & I can't afford it.

High quality, low priced cbd will allow me to function relatively normal allowing me to continue working & not being a burden on the welfare system.

As long as it meets manufacturing standards it should be readily available

I haven't used it however I have heard many success stories from the US. My adult daughter suffers anxiety and I would lo be able to offer her something that will help her. My husband suffers from muscular pain and I know regular use of NSAIDs is not good for him. It would be great to find a healthier alternative.

I think he price needs to be low so it is accessible to all especially those who need it most. I also believe by having it low, it will prevent a black market.

Look at what is and isn't working in the US. There's no need to reinvent the wheel.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would not use CBD in a safe way and will not read the label and warnings.

I have Crohn's disease and cbd oil helps me dramatically

I think it should be available for anyone even people who can't afford it but need it

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I think there has been a lot of success in people with a wide variety of issues personally I do not feel the need to use it at this time but I have family and friends who would benefit a lot

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I would use CBD in a safe way and read the label and warnings.

I've got a few friends who have had a huge reduction in pain and/or anxiety while using CBD oil.

I think everyone should be able to access it, regardless of their financial situation, as pain and anxiety don't only affect the affluent.

I think that research on CBD oil should be easily accessible and easy to understand for all.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

If available, I would like myself or my loved ones to try CBD for mild pain, help with restful sleep, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I have used it for stress and sleep. Also for the pain caused by shingles. It was very beneficial.

Price is important for anyone with a medical issue.

CBD should be available to anyone. It is harmless and natural.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

We havnt used but having read research it could benefit family members who have chronic migraines, back pain and arthritis.

It needs to be low price. If your life is compromised by pain you can't afford expensive medications.

I would use CBD in a safe way and read the label and warnings.

I have not used CBD but have done research and spoken to many people who have had many benefits from its use

If the price is competitive but reasonable so that people can access it for long term use as in many cases it is not something you take short term to assist with your complaint you are using it for

Educated sellers who can educate and assist in treatment such as adjusting dosage and explaining other lifestyle solutions to change in conjunction

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the TGA proposal – pharmacist-only, up to 60mg/day, adults only & must be proven in large studies to work at low dose before permitted for sale.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety.

I think CBD must be ‘proven’ to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I have used CBD for my stress and anxiety, it has been very helpful. I haven't used it for long periods of time due to access. Although I have friends who also use it for severe and mild pain relief and also mental health!

I truly believe this will have a positive and greater impact on the community/globe!

I think if CBD is too low in prices, like anything people will either abuse it, or won't see the value in it.

But equally if it's too expensive, some people won't be able to access it or it won't be affordable to for people to use daily.

Yes my family friends and people that I know have used it with great success I give to my elderly mum and it has slowed down her tumor growth (have shrunk) and avoided surgery. I use it to reduce inflammation in my body with great success.. I use it to control anxiety when I am under stress.

Lower prices means it is affordable and accessible to I can use it as I need it.

It does no harm so it should be available.

Publish my entire submission in full, including my name, work title and any other information about me on the TGA website.

I would use CBD in a safe way and read the label and warnings.

I am in favour of using any and all cannabis products being available to everyone at a reasonable price. It is a versatile plant that has been used widely for thousands and thousands of years, and would be very helpful to several people in my family. Experience tells us that it works, and that's without any safeguards, dosages, warnings, etc. Please allow us the ability to choose our health care!

Of course the price is important. You need to keep the prices down as low as possible, and not tax the hell out of it like you do alcohol and tobacco. Those of us who need to use it for pain and anxiety etc really do NOT need to be price gouged as well - many of us are on a very limited income.

Needs quality control, dosage suggestions, free availability through the chemist so that the ability to ask questions and get responsible answers is there.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

The change would impact me because I would like to use the oil to formulate a sports injury balm. I have an acupuncture clinic and remedial massage and deal with pain with clients on a daily basis. I have recently finished an Adv. Cosmetic Formula certificate and would like to use CBD oil as part of a formula for a sports cream/salve. Years ago I was in Oregon U. S and whilst there met a remedial massage therapist and she was using CBD oil as part of a ointment to massage into painful muscles and she declared to me it made a massive difference with the pain. It has been legal in Oregon for quite some years, I have since done some research on this and it seems the CBD oil helps with the inflammation.

For me if it is sold at high cost than that would effect the % I would be able to use to make balms and if to low a % than pointless even using. At a lower cost it makes it affordable for me to buy and in turn be able to use a higher % in my formula's which than may help others with their pain.

This is just one of the reasons for keeping it at a low cost but a big one for all Australians if it does help with muscular pain so I believe it should be affordable for all Australians. Muscular Pain eg; lower back can be debilitating for those who suffer from any muscular pain and pain doesn't discriminate between a poor or wealthy person.

I think there should be a one shared data input so when sold information could entered with persons name, quantity sold, price and a reason for buying the oil. Than if possible the buyer could enter data on as much information on how the oil worked for them so we can use received information on whether it is helping.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to

seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Obviously lower prices would make CBD available for most people, I believe the benefits would be of value to everyone at some time in their lives

Only publish my submission on the TGA website with confidential information redacted. Do not publish my personal details

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I would use CBD in a safe way and read the label and warnings.

People should have choices of what they use to benefit their wellbeing. When wellness is compromised, many people need to take time off work so have reduced income levels. Therefore lower prices for CBD means more people can benefit.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

It is beneficial for anxiety and pain control, and I would like to legally access the CBD without fear of breaking the law.

The price affects me in that it is far too expensive to access legal CBD at this time in country S.A. Because it is not affordable it is effectively denied to me.

It should not be under the control of corporations to access CBD, because then it will remain expensive enough to be out of the reach of many who could otherwise benefit from it.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, help with restful sleep, general health and wellbeing, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Have friends who have used cbd to help with chronic back pain and helps with sleep.

Would like it to be affordable for everyone not be an exclusive medication.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have friends who have used it with great results.

Definitely lower prices would benefit many who can't afford it at higher prices.

Hopefully this will ensure quality control for CBD and people can access consistent quality CBD

No experience, but believe it could help my arthritis pain. I am 86 and it is crippling me.

I am a pensioner and think if it was too expensive I could not access it. I am getting worse every year and altho' I am healthy enough, the pain does not let me walk far and I am afraid of being a real cripple in a couple of years. That I could not tolerate. If I have to go through the indignity of having someone wipe my bottom I will try to die.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I used to be a cannabis smoker, and when I was in the U.S last March (2019) I took the opportunity to kick the habit by using CBD to meet the needs of my endocannabinoid system without the ugly carcinogenic effects that we all know come from smoking.

Australia has a big time habit for smoking cannabis, despite the current legal status. It would be a game changer for many people who might want to also kick the habit!

The cheaper the better. As long as the export can be scaled, we should be able to afford to put Australian patients over profits without sacrificing potential economic benefits.

We should have a free-market that anybody can get into and a variety of brands to increase industry industry competitiveness and achieve maximum economic benefit. There's no scientifically valid reason that this substance should not be widely accessible to all. In turn, the industry should not be monopolized.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I would use CBD in a safe way and read the label and warnings.

CBD has helped me greatly in reducing my anxiety and fluctuating moods relating to my borderline personality disorder.

I believe the public should have as much access as possible if need be. Atleast have the option available for the public

Higher prices would affect obviously because of the world situation right now. It's important for the price to be accepted amongst the people, as majority of our population are average to low income earners

Subject: Proposed Amendments to the Poisons Standard (Medicines/Chemicals) [SEC=No Protective Marking]
Date: Thursday, 21 May 2020 11:13:55 PM

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for stress, mild anxiety, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS).

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Not much personal change, but it would be good to know the medical option is there for me and my family/friends.

It needs to be affordable for all people

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

[REDACTED]

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS).

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have not tried CBD but I believe people in Australia should have the choice to buy it as there are so many health benefits. I have worked in clinical trials for pharmaceuticals for fifteen years and can appreciate the benefit of new medical options.

Many people suffering long term health issues are more likely to be low income. Therefore CBD needs to be lower price so affordable for all socio-economic brackets.

Only publish my submission on the TGA website with confidential information redacted.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

I would use CBD in a safe way and read the label and warnings.

I and my loved ones have not tried CBD

I believe that a fair and reasonable price would allow more Australian's to access CBD. With greater access to assist the public with minor health issues it will help to reduce the pressure on the public health system.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

We have not tried CBD but would be very interested in it's use for pain management in my daughter and also for her anxiety. I have heard amazing things but believe at this stage it is not available for children.

I do believe the price is important to be accessible but it also needs to be safe and not over used like all medical supplies.

I believe the best way for the public to access CBD would be at the very least via a pharmacist or allied health professional.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

If available, I would like myself or my loved ones to try CBD for relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS).

I think CBD must be 'proven' to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

As a health practitioner - to advise patients on the relevance of CBD to their health situation, CBD is one of a number of options.

CBD should be affordable for all people to access if required. Not just for high income earners. Those that need it most - their health condition had already impacted their ability to earn an income.

To be recommended by a health practitioner : Naturopath, Herbalist, Nutritionist, GP, Psychiatrist, Pharmacist.

Only publish my submission on the TGA website with confidential information redacted. Only personal details - name, e/mail, phone number, address.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I would use CBD in a safe way and read the label and warnings.

Was under the impression it was already legal and medical cannabis. Big pharmacy shouldn't be getting in the way of this. Its good as an anti inflammatory, which is a huge problem and negligible risk compared to tramadol, its laughable

A fair price for a quality product if you at all serious about actually assisting people to be healthier and not a sold out

Already been grown and sold around the world, its red tape and millions of dollars in bribes holding it up

I would use CBD in a safe way and read the label and warnings.

I believe the "Hybrid" option for widely available lower cost CBD would help many people. While I have not used it myself, I have spoken to people who have benefitted.

If CBD is priced too high, it would be out of reach of many people who need CBD and could benefit from it. If CBD was priced lower then it would be available to those who need it - we should not allow financial discrimination to affect the health of the poorer people in our society.

CBD has been used safely worldwide. It should be immediately available over the counter. We should not continue to make people suffer when a proven therapy could be available.

A lower entry price into the market is good for any new product as it allow the general population to access it and try for them selves. After that, the natural demand for the product will either rise or fall and the price will be dictated that way

I would use CBD in a safe way and read the label and warnings.

I live with mild anxiety and depression so I have a lot of trouble at the best of times including sleeping. I have family members with constant physical pain. It would be a huge relief to have a natural substance instead of pharma medication.

Hugely important to keep the cost low so Australians can access CBD. The best thing is just to get it on the shelves at this stage (whether the price be high or low).

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I would use CBD in a safe way and read the label and warnings.

CBD should be affordable. As many Australians who struggle with the health issues that would provoke the trial/use of CBD should not be forced to choose between everyday living expenses and attempting to get their health back on track.

If CBD becomes available to the public, it will require informed persons distributing it. I believe it should have its own dispensary, where knowledgeable staff are dedicated to educating and discussing the use and correct dosage.

Publish my entire submission in full, including my name, work title and any other information about me on the TGA website.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

its important that all Australians can afford CBD to help with all health conditions

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I cant afford expensive medication

Only publish my submission on the TGA website with confidential information redacted.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I strongly believe that this CBD should be approved especially for those experiencing pain, stress, sleep disorders and various levels of anxiety. I experience some of these myself.

The price is important because not everyone can pay for highly priced medicinal CBD product.
It should be reasonably priced.

I feel the best way to access CBD is through your preferred practitioner.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I would use CBD in a safe way and read the label and warnings.

A pharmacist is not a physician nor trained in alternative medicine .
If anything it should be made available through a naturopath or health professional trained in health and natural medicine .

Cost needs to be negligible , what would be the point of making something available that only a few can afford .

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I'm not sure if I would use CBD. I might try it to see if it benefits me. However other people who do need it should have access to it. Lets not keep them waiting.

If CBD was really cheap like Panadol and non perscription I might try it to see if it benefits me(Social anxiety/depression and more).

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would not use CBD in a safe way and will not read the label and warnings.

Lower prices of CBD would lower the cost of my medications, month by month. Low-cost CBD is important for reasons of accessibility across social and economic strata. Cannabidiol should be available to all.

Allow people to buy Cannabidiol over the counter, and simplify/open the process up to manufacturers, suppliers and distributors.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Many of my friends and patients have used CBD with very positive results and benefits, There is absolutely no doubt that it is good for chronic arthritic pain, neuropathic pain, anxiety and much more. In all cases it has been used with no side effects and has created improved wellbeing.

CBD is a safe and effective therapy and should be made available at an affordable cost, so that it can be utilised by all those that can benefit from it. I have had a relative that has suffered SERIOUS side effects from prescribed medicine where as CBD has enabled them to stop using these very deleterious medications and live a much improved life without them.

I think CBD should be available from pharmacies and licensed suppliers so that quality control can be made consistent and people have access to this highly beneficial product.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Pricing is important so all Australians have to opportunity to choose this option if it's needed to support healing.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS).

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Have used CBD as a sleep aid. Assisted immensely with jet lag whilst travelling through Europe. (No adverse effects experienced)

Lower prices for access to pain relief, reduced anxiety and improved sleep would be important during our current economic hardships

Accessibility should not be anymore restrictive as any analgesic.

Publish my entire submission in full, including my name, work title and any other information about me on the TGA website.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I would like to be able to try it for a variety of reasons including anxiety, sleep and pain. I currently do not know anyone who is using it in Australia

I don't think it should be too cheap to avoid misuse however it should be affordable to those who need it.

I think available only through a chemist initially and people can talk to the pharmacist, but without it being too strict.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the TGA proposal – pharmacist-only, up to 60mg/day, adults only & must be proven in large studies to work at low dose before permitted for sale.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, general health and wellbeing, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have a family member that has health and medical issues

Lower the price, so all walks of life can afford it

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Haven't used it but would like the option if needed

Would prefer lower prices as I'm a senior

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I work at a medical centre as a nurse and see many patients in pain due chronic conditions. I would like to see them have access to CBD at a reasonable price. A lot of patients have been speaking about it, wanting it.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

i suffer from anxiety and stress is something i deal with daily. i think that CBD is an incredible source that could potentially help me and millions of Australians.

the price of CBD absolutly is important for Australians as it could give vaunrible australians who need it the chance.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I would use CBD in a safe way and read the label and warnings.

Experience has been extremely positive with no side effects. I would use it for mild insomnia due to menopause plus nausea and for stress.

CBD should not be expensive due to lack of parents and easy access. It should be affordable to all due to its safety profile and ability to assist with sleep and stress .

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I would use CBD in a safe way and read the label and warnings.

I take high quality CBD for pain relief and well being. It works for me but is way too expensive to keep it up. I would like a low cost safe option within Australia

I would get a consistency in health benefits from CBD at lower/affordable prices as many more people would.
At present it is too expensive for many to keep up or to even try to see benefits from CBD.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

hi there,

I have struggled with mental illness all of my young adult life and have been looking alot into the benefits of CBD to calm and relax for anxiety and depression would be good to be able to get over the counter CBD that is safe and know where its coming from.

a low price point would help alot of people move of expensive and over prescribed medication

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Better sleep, less anxious, pain relief lower back.

It needs to be at a price that everyone can afford. It should be widely available from Australian companies not imported

Pharmacists and over the counter

Publish my entire submission in full, including my name, work title and any other information about me on the TGA website.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Cost effective treatment and self dosages as needed rather than rely on pharmaceutical medications that have adverse side effects is the way to go. All pharmaceutical medications have side effects that make the conditions you want to treat worse

Put it on the government pphb scheme or whatever it is to make it affordable

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

It helps with pain from autoimmune disease damage. Dosage advices and kept to safely.

It has to be affordable for lower class as well as often they are left suffering the most.

Only publish my submission on the TGA website with confidential information redacted. Do not publish health history

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Would be very useful to provide a restful sleep without resorting to stronger prescriptions.

Lower CBD prices are very important to allow people to access something as simple as Panadol, which is very low cost and readily available. All drugs can be dangerous if used incorrectly.

Must be easily accessible, say chemists and health food shops.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I think it should be as easily accessible and affordable as all health supplements.

I can purchase my olive leaf extract from most supermarkets and all chemists and I use olive leaf in place of harmful pharmaceuticals- I feel CBD should be more available and affordable

Provide more information openly - remove the tabo Of CBD and actually support patients

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

[REDACTED]

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for stress, mild anxiety, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have not used CBD with or without a pharmacist's advice.

I believe the price of CBD for Australians is important because it has the potential to help a lot of people from a range of socio-economic backgrounds. Those who are not earning a lot of money, should still be able to access CBD.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the TGA proposal – pharmacist-only, up to 60mg/day, adults only & must be proven in large studies to work at low dose before permitted for sale.

If available, I would like myself or my loved ones to try CBD for stress, mild anxiety, help with restful sleep, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

We use it as a Immune system booster and for my daughter diabetes and celiac conditions

It is important to buy less products from Pharma Ind. and try to start a more natural way to treat conditions

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I would like to try CBD oil for my back pain. I have read many accounts of how beneficial CBD oil can be for pain relief without side effects.

Lower prices would make CBD oil available to more people which is only fair.

CBD oil should be easily available so people in pain can access it quickly. A long wait time is cruel and unnecessary. Feedback about the health benefits and or effects can be reported to a medical practitioner to ensure the dosage is safe.

Date: Thursday, 21 May 2020 7:25:55 PM

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Myself, loved ones and friends have used CBD with no adverse side effects for a wide range of reasons including anxiety, pain relief, better sleep and general relaxation.

Prices need to be affordable for all people, so all have equal opportunity to access.

It needs to be easy to access via multiple retail outlets.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, mild anxiety, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I can't say exactly why but it makes me feel a lot better in so many ways...leveled out and slows me down yet I feel hopeful as well.

Obviously it should be priced mid range. But qualities will differ and some companies may add other medicines combined. It's the way of the future.

On line. Health food store.
Markets.

Publish my entire submission in full, including my name, work title and any other information about me on the TGA website.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have numerous friends that have used cbd for chronic pain and nausea whilst going through cancer treatments and it has proven to be successful

Price is always important!

Public should be able to have access or grow their own!!! After all it is a NATURAL HERB

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I would use CBD in a safe way and read the label and warnings.

Anecdotal evidence suggests it is very useful as a medicine. I would like to have access to it for this reason. Have not used.

Price is always important. Good health outcomes should not be expensive to achieve.
Profit should not be a price factor.

Inform all Doctors, allied health of all aspects of its use, benefits, indications and side effects.
Publicise that consultation with any of the above should take place by those wanting to use CBD

Only publish my submission on the TGA website, do not publish my name or any other information about me.

It wouldn't presently but I had a mental health issue in the past where this was a primary recommended treatment but it wasn't easy to pursue. Given it was a mental health issue, it all seemed too hard to bother. I wouldn't want someone else to be in the same position - or me in the future.

I'm not really across what it might cost.

At the end of the day I'm pro-choice, people need to be empowered to make their own life decisions to support their way to health.

I would use CBD in a safe way and read the label and warnings.

This will ensure that current sales of cbd oil are safe. It is currently being sold at the local fruit & veg market 'under the counter' & it concerns me that this product might be unsafe.

I feel it should be cheaper so anyone that needs it can access it, not just those that are well off financially.

Should be sold by a health care professional such as gp, pharmacist or naturopath.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the TGA proposal – pharmacist-only, up to 60mg/day, adults only & must be proven in large studies to work at low dose before permitted for sale.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS).

I think CBD must be ‘proven’ to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Date: Thursday, 21 May 2020 6:53:28 PM

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Australians need access to relatively low cost effective options to help improve health and wellbeing, in order to reduce the strain on the healthcare system, increase health and well-being and possibly prevent illnesses worsening by ongoing stress and poor health

The best way for the public to access CBD oil in my opinion is through consultation with a pharmacist, Naturopath, or Herbalist, who consider all interactions.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

My circle of both friends and family have utilised CBD oil in the past. Mainly for anxiety and stress, as well as tummy pains. They have all reported very positive results - less gut pain, less stress and anxiety.

I think the price should reflect the quality. I personally would not opt for the cheapest purely based on a financial decision.

I think this seems to be a very important herbal treatment that many throughout the world are using with reported great benefits. Australia should have access to it too.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I personally know and have heard of many cases where cbd has been extremely helpful, whether just for better sleep, stress relief or extreme pain. I have not heard of any severe adverse effects so far, even at higher doses.

I think it should be accessible for any one, and often those who would benefit from it most, are not necessarily the wealthiest and often unable to work for different reasons.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Short term use of CBD oil when in the United States assisted with the promotion sleep as well as decreasing the appearance of acne.

If the product is useful for people with severe illnesses it should be affordable to them with the consideration of medical bills and lifestyle costs that come with such illnesses.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the TGA proposal – pharmacist-only, up to 60mg/day, adults only & must be proven in large studies to work at low dose before permitted for sale.

If available, I would like myself or my loved ones to try CBD for general health and wellbeing, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I believe all Australians should have a chance to use natural med.

Not everyone can afford Cbd at the moment

People need help to take right dosage.

Only publish my submission on the TGA website with confidential information redacted. Name

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I believe low cost CBD would be beneficial to Australians, as many current medications and treatments for a variety of common health issues can be expensive, course duration dependent and potentially dangerous in the long term. Lower cost CBD would allow everyday Australians with minor health issues to try CBD in a safe and regulated fashion and decide its efficacy for themselves.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I support the TGA proposal – pharmacist-only, up to 60mg/day, adults only & must be proven in large studies to work at low dose before permitted for sale.

If available, I would like myself or my loved ones to try CBD for mild pain, mild anxiety.

I think CBD must be ‘proven’ to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

I suffer from arthritis an pain in my back and neck. I've tried so many different pain killers and most either make me nauseous, drowsy or constipated. I would welcome some other non addictive source that would help.

A price that was high enough to stop any possible abuse and low enough that lower wage earners can also take advantage of it.

If it works like it says it does, then I think it should only be available at the chemist, whether or not by prescription.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

Date: Thursday, 21 May 2020 5:40:11 PM

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, mild anxiety, help with restful sleep.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Lower prices are crucial so that ALL Australians can access it without it being yet another drain on the household purse.

CBD should be freely available. Doses up to 90mg/day may not be enough for many people due to their size and weight, metabolism and other biological factors.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I think CBD must be 'proven' to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

Only publish my submission on the TGA website with confidential information redacted. name, address, email. :)

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

I would use CBD in a safe way and read the label and warnings.

Haven't used but interested

It needs to be set at a price that is accessible for all Australians. This allows people to actually try it for their concerns and see if it offers benefit or not - without worrying about how huge the investment is before doing so. Accessibility is key.

OTC through the pharmacist only without a prescription OR a APRHA regulated healthcare professional ie. Registered Herbalist etc

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

If the TGA allows us to access CBD without a pharmacist's advice and puts the onus on us to use safely, we will be able to experience relief from mild pain and mild anxiety, increase our quality of sleep at night and to increase our general well being.

Lower prices for CBD would be beneficial for all Australians who would like to access this for general health and well being, or mild pain and anxiety. This way they can save money and go without the need to use pharmaceutical products with known side effects.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I would use CBD in a safe way and read the label and warnings.

My loved one has constant mild pain and CBD could help with the everyday stress it brings. It would be very good to try as soon as possible.

A lower price for a lower dose would be reasonable to use for mild illnesses for regular use, would be better for the body than using other chemical medications.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I would use CBD in a safe way and read the label and warnings.

I have seen many people already who have managed crippling pain with minute doses of CBD oil. This product was used widely a long time ago. After researching the reasons why this medicine was taken off the market, I'm appalled it's taking this much time to reinstate it as a mainstream medicine. The results speak for themselves

I would use CBD in a safe way and read the label and warnings.

I think Australians should be able to access all forms of medications, natural or pharmaceutical, to support their health. Yes I have used CBD without a pharmacist's advice as have loved ones and I have seen profound health benefits with multiple conditions.

The lower the price the more accessible it is. The price on pharmaceuticals for acute and in some cases terminal conditions is outrageous. Often the only affordable option for patients is trial medications.

I would use CBD in a safe way and read the label and warnings.

As a new resource we can assume as inflation occurs prices will continue to rise over time. Starting sale at a high price point would consequently limit access to less fortunate Australians as we slowly progress into the future. Furthermore, once it begins being used in the common household it will encourage more research to be done, therefore we should ensure we sell it at a low price point when first making it available.

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I consider it to be a wonderful, quick acting, safe supplement to offer my clients and family. for pain relief, anxiety, insomnia etc. If it was removed and or if I could not freely recommend it, I feel seeking it via a GP would over crowd the medical profession on their valuable time and or another chemical derived option may be offered with side effects and or complications which is what we are trying to avoid by recommending a natural agent

It needs to be priced realistically so that every Australian can access it

Only publish my submission on the TGA website with confidential information redacted. my personal information, name address etc

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I haven't experienced it first hand but my research shows it has many benefits and we should be allowed to make a safe choice to use it if and when needed

I'm on a low income hence the availability of a low cost and safe product would prove beneficial

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Many of my friends have told me how CBD has helped with their muscle cramps and sleeping issues, as well as helped them stay calm in times of great stress. I have suffered from bad spasms in my back and I'd love to see if CBD could help me too.

My mum used CBD oil for pain reduction at the end part of her life, and it brought her great relief.

I've watched a couple of documentary series on it and am confident it would enhance my life & that of my family's!

Living with a very low income, a high price tag on the CBD oil would stop me from being able to use it.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have suffered from anxiety for many years and have not wanted to use medication from doctors as I feel they have too many side effects. I also know from friends that most of the time they don't work.

As I am on an aged pension a higher priced product would be out of my range.

I believe CBD should be sold over the counter, not only at pharmacies or through a doctor.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I would like to use CBD to effectively reduce aches and pain from scoliosis and enable sound sleep to promote full energy and wellbeing.

Lower priced CBD will allow me to purchase CBD to improve my sleep and general health as well as reducing muscle spasm from scoliosis. Many Australians could benefit from the safe use of CBD if it is affordable to them.

All Australians should be able to access CBD at a low price to reduce pain and encourage healthy sleep. CBD is a safe and effective way to manage aches and pain long term without the risks to health of many over the counter pain medications.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I suffer with chronic pain and given the government has BANNED the NATURAL PLANT KRATOM that's healing properties for people with chronic pain are fantastic, it's outrageous that the pharmaceutical industry studies "allegedly proved it to be dangerous" wonder why they did that??? It is A THREAT TO THEIR MONEY MAKING MACHINE.....imagine something that could cure????? there's NO MONEY in it for them now is there?? I know people who have used cannabis oil for numerous things with GREAT SUCCESS. We have the RIGHT to NATURAL PLANTS that heal DESPITE BIG PHARMAS CLAIMS

Obviously price is a concern to everyone many people struggle to keep their heads above water already with MONOPOLISATION of EVERY INDUSTRY and outrageous prices

Date: Thursday, 21 May 2020 4:36:37 PM

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Have not used, but have read about the benefits for mild sleep issues, stress and pain promoted by middle aged woman as good alternative to hormone replacements etc

It should not be priced too highly that people will not try it as an alternative to non natural options

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for general health and wellbeing, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

It should be available at a reasonable price to all, regardless of financial situation.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the TGA proposal – pharmacist-only, up to 60mg/day, adults only & must be proven in large studies to work at low dose before permitted for sale.

If available, I would like myself or my loved ones to try CBD for nothing at this time.

I think CBD must be ‘proven’ to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

Through prescriptions, those who need CBD the most (critical illness) should receive the support.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

If available, I would like myself or my loved ones to try CBD for mild anxiety, help with restful sleep.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have mild anxiety that I used to use alcohol to self-treat. Whilst I no longer drink, I would like to have something more natural that I can have in standby for high-stress situations. Being easily available (over the counter but pharmacy only) will also be ideal.

I am not concerned about price. Although, reasonably priced CBD will make it more accessible to all.

A pharmacy only, over the counter medication. But not needing a script.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I would use CBD in a safe way and read the label and warnings.

I am yet to try it but know of a Naturopathic doctor who believes strongly in it and also seeing how it has been used in the USA now for a few years I can see that there are a huge variety of therapeutic applications with very few (if any) side effects. Potentially CBD is much much more safe and effective than the majority of 'approved' pharmaceuticals.

Of course access to quality at a low price would always be the aim to allow all people who need it to have access

Only publish my submission on the TGA website, do not publish my name or any other information about me.

Overdose is highly unlikely as supported by a huge evidence base, so please don't make people fearful with the statements above!

It needs to be affordable so it is accessible for people in chronic pain and with complex health issues who have a low income - or be subsidised - WITHOUT ridiculous restrictions. At present it is almost impossible for patients to be prescribed CBD in WA, even from a specialist pain clinic. And GPs don't want to participate in prescription because it is too much paperwork!

Make it accessible!

Make it affordable!

Invest in UNBIASED research!

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have used cbd oil and found it really good for relieving depression anxiety, my sleep pattern improved and pain was relieved greatly.

It is important that the price be kept minimal as then more people would be able to access it

Anyway either by chemist, health food shops or even private people making it at home, but it must be organic and untempered with by the med industry

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild anxiety, help with restful sleep, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Several friends have already used CBD with great success, particularly for anxiety and sleep. A friend's 84 year old mother has come off all of her pain and other strong medications and is pain free after many years which is miraculous. Other friends cannot access it affordably or at all which is why I believe it should be readily available. The risks are almost nonexistent.

I have not bought it for myself because of the lack of availability and cost. Otherwise I would be taking it to boost my general health and wellbeing.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, mild anxiety, help with restful sleep.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Of course it's important and there are always other medications and costs involved in allied health for conditions like pain, anxiety etc. It all adds up quickly

Publish my entire submission in full, including my name, work title and any other information about me on the TGA website.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, mild anxiety, help with restful sleep, general health and wellbeing.

I would use CBD in a safe way and read the label and warnings.

Please consider that adults should be able to make their own choices about their own health. Plenty of research confirm positive outcomes of CBD on inflammatory disease, arthritic pain, insomnia, and anxiety. There are no harmful side effects of CBD unlike many prescribed pharmaceuticals. CBD should be freely available at low cost to anyone who needs it. I have seen significant reduction in pain and anxiety in family member that has used CBD with guidance from health professional experienced in advising on CBD.

Best way for public to access CBD is through CBD health professionals with experience of CBD. A clinic for those who need advice and storefront and online orders for those who know what they need. The parameters for CBD clinicians should be similar to other natural health professionals. i.e., the client decides whether they want to see a doctor, nurse, herbalist, naturopath, counsellor or store assistant or just order online..

Only publish my submission on the TGA website with confidential information redacted. Name and email and phone number

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I would use CBD in a safe way and read the label and warnings.

For many of my patients, cost is an issue and I always prioritise the most effective medicine for the condition.

Where CBD would be the medicine of choice, I would like to have the opportunity to prescribe it.

Since the public have access to other products for mild anxiety and pain OTC, CBD should also be freely available (one pack at a time) as it does not contain active quantities of THC.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I would use CBD in a safe way and read the label and warnings.

I believe that lower priced CBD would make it fairly available to all Australians who need it, regardless of their financial status.

In view of the recent TGA review of the safety of low dose cannabidiol, I feel it is time that it is made freely available to Australians who need to access it for a range of conditions. The TGA review also noted that CBD could be useful in the management of chronic and generalised pain as well as in anxiety and insomnia. Given that these conditions may be helped by CBD with a lower safety risk than many prescription based pharmaceuticals, this could be of great benefit to many Australians.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I would use CBD in a safe way and read the label and warnings.

I think CBD oil would replace many medications I use now e.g Panadol, nurofen. From the research I've done myself this would be my most preferred product in my medicine cabinet.

Lower prices would be great but if I needed a higher strength or a bigger container to last longer I would think about paying up to \$400 if I felt the product was going to really work and provide health benefits.

I would like to see it in most chemists and over the counter.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the “Hybrid” option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS).

I think CBD must be ‘proven’ to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

I have had a number of patients over the last few years who have used CBD for various conditions and feel that it has been beneficial.

Price is important for affordability for patients

I believe pharmacists and registered health practitioners like Chinese Herbalists should have access.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, mild anxiety, help with restful sleep.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Currently it doesn't effect me, I don't buy it, but if it was more available as a pain relief medicine I'd buy it instead of paracetamol

Publish my entire submission in full, including my name, work title and any other information about me on the TGA website.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have not used CBD because it is not legal in Australia yet. I have debilitating chronic pain due to IBS and have tried all under the sun to reduced my symptoms without much result. My doctor thinks CBD might help. I have no interest or need for the THC component of cannabis.

Obviously if cost is too high many Australians including myself might not be able to afford it.

I could be done via a prescription by a doctor. Whichever way is safe do people in real need can access it.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the TGA proposal – pharmacist-only, up to 60mg/day, adults only & must be proven in large studies to work at low dose before permitted for sale.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I think CBD must be ‘proven’ to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

Price of CBD is important and while it may be available through a Pharmacist, price should not be a barrier for the most affected members of our community to access this for it's therapeutic importance.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

We haven't had the opportunity to access CBD but would like to use it to help our elderly mother who is in pain after a fall. She can't tolerate a lot of painkillers and needs some relief to be able to sleep and so recover her strength. I feel CBD would be a great option for her and assist in full recovery without the complicated side effects from other medication.

Thank you

I think the price of CBD is important for all Australians, lower prices make it an accessible option for more people especially those on low incomes and in great need.

I think the best way to access CBD is in Pharmacies and other health related stores.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I would use CBD in a safe way and read the label and warnings.

I have friends, clients, family members and myself who would benefit from using CBD oil...

I am trained in herbal medicine and as a naturopath I learnt about it as a scheduled medicine and many other scheduled medicines...

Cannabis is a herb and I believe that the best people to actually dispense it is a practitioner who already understands how to work with herbal medicine and plants, not practitioners who have not undergone years of training in this modality.

I scoff at it being called medical cannabis

It is medicinal and it's a herb!

Cannabis oil is a herbal medicine!

Not a pharmaceutical drug!

My college at work, used with medical advice, CBD oil on her daughter to CURE her seizures, so I know first hand it absolutely works and is safe with children, and yes the neurologist said she now has normal brain activity!!!!

I have a friend with chronic pain who has had adverse reactions from pain medications even bowel surgery from taking NSAIDS why was he never prescribed cannabis oil?

I had a brother in law die late last year From lung cancer he was on NSAIDS why was not Prescribed cannabis oil for his pain?

Because you know when you don't give it to people in such a bind they go and get it anyway or make it themselves.

Another family member uses it for anxiety and hasn't smoked since Christmas!!

I would like to try CBD oil for my ongoing chronic pain after a whiplash injury when I was 20 20 years ago
I probably will always have pain and I don't like taking pain killers
as I am celiac

I would like the option to try it without too much fuss something that will be much more gentle on my body than a pain killer.

has studied many substances And I think Australia needs to catch up!! So much can be done and used which we are not utilizing in supporting people !

There is research from to use cannabis oil in skin conditions which is my field at best at the moment I can only prescribe hemp oil but cannabis oil would be more efficacious so I hope one day I will be able to do this!!

The earth has given us many things we are not using and we could be!!

I think under the guidance of a health practitioner, dr, homeopath, naturopath herbalist TCM practitioner we could all be benefitting our clients lives in a positive way with out all the side effects of mainstream drugs!!

I can see the below comment says avoid reference to serious illnesses... well why?

It's ok to poison the body with chemo and kill cancer but it's not ok to support the body and mind to relieve pain anxiety and stress??
Hmmm????

I think the medical model of hierarchy needs to shift... Or is it just about money and not actually wanting to make people well?
Personally I got into my field to make people well!!!

“First do no harm “

Natural first Without Nasty side effects

Then if that doesn't work

Then, maybe a pharmaceutical drug ?

But cannabis isn't a pharmaceutical drug it's a plant with its own complex structures which doesn't need man to play around with it too much.

As a practitioner I hope to see this scheduled herbal medicine and many other scheduled herbal medicines given back to the people who are trained in this field and given back to the people, because it's safe and it works!!!

DescrLowest price

High quality for all

Via a dr, naturopath, TCM practitioner, herbalist with a full consultation and for the practitioner full training off the “ rules” and procedures they have to follow

Date: Thursday, 21 May 2020 2:32:16 PM

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, mild anxiety, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Should be available to those who need it, regardless of their income

Publish my entire submission in full, including my name, work title and any other information about me on the TGA website.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have not used it as I haven't been able to access it, however I live with daily pain(last ten years and it has recently gotten worse) that negatively affects me and my contribution to my family, if it was readily available at a cost I could afford I would at least give it a try.

Being on a medium range income (single income because my pain doesn't allow me to work consistent hours) pricing these items high takes away the opportunity for me to use them

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

DescrThe price is important as it allows people with debilitating pain access to something that might provide benefit and allow them to work and function in society . People who cannot work cannot earn money and are then not part of an economy.

I believe it should be accessed via allied health qualified practitioners such as Pharmacists and Naturopaths etc.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, help with restful sleep.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Due to my health conditions, I would need a higher dose, a low dose with the high cost would be less affordable and less effective. Limited income due to health conditions make the expense of CBD out of reach for many .

Online or in a health store, or a registered health practitioner, alternative health practitioner like an acupuncturist , for example.

Only publish my submission on the TGA website with confidential information redacted. my name and contact details

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

Whilst myself and my family have not used CBD, from the literature I have read and overseas examples of its use in small doses I genuinely believe it would benefit our family and other families. I do like the fact that I could report its benefits and or side effects to a panel for further investigation. I also believe that it would have great benefits in the veterinary science fields.

DescrBeing of pensioner age and no real regular income, the lower price range is always going to be a factor in trying new options of medication.

I believe an accredited naturopath should be able to dispense CBD to patients after consultation and assessment of the patients health concerns.

Only publish my submission on the TGA website with confidential information redacted. My name and email

I am not afraid of CBD at all, several of us have used CBD safely without the advice of a pharmacist - I even give it to my elderly dog. We have never had any issues, only positive results. I feel confident in choosing the dosage rate for myself and my It would be nice if I could go and buy it without the 'cloak and dagger' routine.

DescrLower prices are always better, but I would keep paying whatever I needed to

the only thing I would say is that it should be as easy as possible. At present, I buy it in a shop like I would buy bread for example. It would be fantastic if it could be as easy as that :)

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have heard personal stories from loved ones close to me who use it and have used it before, all of whom have seen tremendous results across many sectors in their life. This has been all used safely without a pharmacist's advice.

DescrIt would need to be at an affordable price for all Australians.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

As a pharmacist I would like to be able to offer CBD to my patients as an option for improved health and wellbeing within clinical settings

DescrLower prices would make it more affordable for all.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I think if it is a reasonable price for every day people, who are suffering, and want to try CBD they should be able to, at a lower price.

Maybe they should have distributors that are experienced in the use of CBD oil, that can distribute it. An it can be kept a record of orders, an who orders it.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I think CBD must be ‘proven’ to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

There are not many good options for pain at the moment especially for people with pre existing conditions. Proven and effective CBD products can, with pharmacist oversight, fill a clinical need for pain management in the general community

DescrCost is always a factor but I believe effectiveness is more important, paying more for proven products will be much more beneficial than throwing money on sub therapeutic productss

Schedule 3 option seems to be the most appropriate

Date: Thursday, 21 May 2020 2:21:05 PM

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I think CBD must be 'proven' to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

I have loved ones who experience anxiety, IBS, and chronic pain. I think they should be able to access products that may help their day to day lives that are proven to be useful and affordable.

DescrA lot of people experiencing chronic pain, anxiety, IBS do not have other ways to deal with it. Particularly other cost effective ways. All Australians should be able to afford treatments to make their lives more comfortable.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I use CBD patches after i do weight training. They help with DOMS, which in turns, lets me have a good nights sleep. My mum also uses CBD patches regularly for sciatic pain.

DescrI think CBD mg/ body weight kg should be the norm. I'm only 5'1 and i only need 1 patch but i know a few people who use up to 3 patches at a time because of their body size. Price should be consistent with other pain medications but also enough to help Australian crop growers so we don't have to source CBD overseas. I think carebeyond.com prices are pretty reasonable.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I have a friend who used it for menstrual pain & restless legs with no side effects.

I think it should be accessible to all.

Health professionals, health stores chemists etc

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I do not consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

My mother I believe from what I've read and heard would benefit using dosed controlled CBD with anxiety mild pain etc. from arthritis and to aid in sleep in her older age.

Descr

I would use CBD in a safe way and read the label and warnings.

My 90 year old mum who suffered with osteoporosis & arthritic changes and aging degenerative pains and aches would've greatly benefitted from CBD. I have a friend using drops atm with chronic fatigue syndrome of 35-40 years duration, she is very happy, it helps with joint aches and pains.

It will make it more widely available. Many Australians struggle with costs. I can afford CBD, but many could not if costs are high.

Possibly pharmacies and health food stores, registered health practitioners.

I would use CBD in a safe way and read the label and warnings.

Never used it and don't necessarily intend to but strongly believe we should have the option of Accra to it to help relieve pain, stress or assist with sleep and quality of life

DescrNot sure of price so can't comment! But believe it will be needed more by low socioeconomic populations so needs to be affordable

Don't make it so complex! My understanding Is that it has proven to help with pain relief and symptoms of chronic conditions so don't make those sick people jump thru 20 hoops!

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the proposal by a private applicant for widely available CBD, minor claims only & no restriction on dose.

If available, I would like myself or my loved ones to try CBD for mild pain, general health and wellbeing, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I think CBD must be 'proven' to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

Dear Therapeutic Goods Administration,

Following is my response to the public consultation to amend the scheduling for cannabidiol.

I support the "Hybrid" option for widely available lower cost CBD, up to 90mg/day, adults only, TGA Monograph for minor claims & may self-report health effects.

If available, I would like myself or my loved ones to try CBD for mild pain, stress, mild anxiety, help with restful sleep, relief of symptoms of medically-diagnosed Irritable Bowel Syndrome (IBS), general health and wellbeing, nothing at this time but I think Australians should be allowed to freely access it at an acceptable dose.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

No have not currently used but definitely would like to try and see if it had a positive result on over all wellness.

DescrI believe it should be affordable for all Australians that would like to try

I think it should be supplied through reputable companies with reputable testing for quality control.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I do not consent to the publication on the TGA website of my personal information.

I consent to the TGA contacting me to ask for more information or to seek feedback about how the consultation was undertaken.

I declare that the information I have provided in this submission is true and correct.

Kind regards,

I think CBD must be 'proven' to work at a very low dose (60mg) for the health claim on the label, before it is allowed to be sold.

I would use CBD in a safe way and read the label and warnings.

This proposed change on the availability of CBD would allow me to use it for my arthritis, IBD and stress levels.

The CBD price needs to be reachable to the average person needing help.

Access to CBD for the public would be handy if through the Pharmacists, Doctors and Naturopathic Practitioners.

Publish my entire submission in full, including my name, work title and any other information about me on the TGA website.

I would use CBD in a safe way and read the label and warnings.

DescrIt absolutely needs to be affordable and widely available and preferably subsidised under the PBS.

It should be made available through pharmacy outlets and privately operated independent clinics and outlets.

Publish my entire submission in full, including my name, work title and any other information about me on the TGA website.

I would use CBD in a safe way and read the label and warnings.

Only a few of my friends tried it for mild anxiety, stress and difficulty sleeping with great results. A real sensation of relaxation.

DescrMillions of Australian could benefit from CBD but if it is expansive they will turn instead towards prescription medicine covered by Medicare. These medicine have a higher risk of addiction.

Only publish my submission on the TGA website, do not publish my name or any other information about me.

I consent to the publication on the TGA website of my personal information, including any sensitive personal information in my submission.

I want to try good quality CBD for minor health conditions now and at the lowest price, while health claims continue to be researched.

I would use CBD in a safe way and read the label and warnings.

I use a low dose CBD for arthritis topically and sometimes orally for sleep. I don't have complete confidence in whether the quality is good though so would like it regulated more

DescrI think it is important to have a access to a safe regulated product that people can trust and afford. Low cost pricing is important so more people can access it
