

Dear [REDACTED]

As per our discussion earlier, due to the urgent response required for the Lifepak 15 Monitor/Defibrillator product defect correction I missed the deadline for NSW response to the CONSULTATION FOR COMMENT: TGA Medical Devices Public Consultations - Changes to a number of definitions and scope of the medical device regulatory framework in Australia. I would appreciate your assistance in providing the below comments to the relevant TGA contact.

NSW response:

- Support the proposed changes

Please accept my apologies for this late submission.

Kind regards,

[REDACTED]
