To whom it may concern,

Please note that I would like to make the following submission to have the poison standard amended to include nicotine in tobacco “prepared and packed for heating”. I'm making this submission because Australian citizens across every facet of life should be offered a choice. Their own choice. This sense of choice **SHOULD** extend to the use of heated tobacco products as a better alternative for legal aged smokers trying to quit or make the switch. By restricting this sense of choice, the Australian government would be restricting our rights of freedom and would be extremely disappointing as a citizen of democracy.
