To whom it may concern,

Please note that I would like to make the following submission to have the poison standard amended to include nicotine in tobacco “prepared and packed for heating”. I am a smoker and I would like to be able to use products that have the probability to reduce the harm caused to me. When travelling to NZ, I have used vapes and heated tobacco products, and you can feel the difference. I don't believe we should take the approach that you either smoke or quit, there is a middle ground.
