To whom it may concern,

Please note that I would like to make the following submission to have the poison standard amended to include nicotine in tobacco “prepared and packed for heating”. My partner is a pack a day smoker. We have 3 small children and he needs to find a safer alternative to reduce the health risk for himself and our family. He has tried patches, inhalers, medication, hypnotherapy and nothing works. We need a substitute that will help the transition between smoking and quitting. Currently there are no suitable options in the Australian market.
