To whom it may concern,

Please note that I would like to make the following submission to have the poison standard amended to include nicotine in tobacco “prepared and packed for heating”. I'm making this submission for the number of family members and family friends I know that would like an alternative option to a reduced risk product. No one is saying that these products are risk free, and the healthiest option is to quit, but surely it is better to have the option easily available to those that want to quit then what we currently have in the market, which does not work for majority of people trying to quit? Do the right thing by these smokers (and their families) and people trying to quit, people's lives are at risk...isn't that more important than politics?

Kind regards,

[REDACTED]
