To whom it may concern,

Please note that I would like to make the following submission to have the poison standard amended to include nicotine in tobacco “prepared and packed for heating”. I am making this submission because I have used the alternatives overseas and found that they improved my health. When I returned to Australia I am not able to continue with using heated products and I have found that I am feeling worse health wise due to not being able to access alternatives in Australia. If there are better alternatives that can still be taxed by the Australian government (let's be honest that's what's important to the government) and have improved smokers health why would it not be available. Logic.
