To whom it may concern,

Please note that I would like to make the following submission to have the poison standard amended to include nicotine in tobacco “prepared and packed for heating”. Yes, I’m vaping, and this government's ridiculous ban on nicotine is not only making it harder to find these alternatives to combustible smoking products, but that they're so overtly lining their pockets doing it that it's almost ridiculous they even bother masking it with a pretext of "this is because we're so worried about the possible health dangers". No, they want those delicious goods taxes on tobacco. And everyone sees it. All while simultaneously complaining about the nanny state they consistently help to build up.

And honestly, whether this rubbish being paraded around as legislation goes through or not, I'm going to be vaping nicotine. It's helped me and it can help thousands like me from going back to smoking traditional nicotine products.

Many thanks.
