To whom it may concern,

Please note that I would like to make the following submission to have the poison standard amended to include nicotine in tobacco “prepared and packed for heating”. I recently lost an Uncle to cigarettes. He had tried numerous devices (patches; hypnotherapy; gum; sprays) but simply could not quit. The Governments hard line stance meant that he and anyone like him (those who try, but can't quit) have no alternative to switch to a proven, safer alternative (as evidenced by the FDA's approval). When will the Australian Government drop this ignorant position and stop sentencing people like my Uncle to death?
