

Homeopathy is a safe and effective option for me and my family and it has been extremely beneficial to us. Western prescribed medicines have only left us with side effects, making us even more sick. Homeopathy is gentle and has aided healing and health in our household.

If there is ever any question if homeopathy is effective and valid, look at all the animals whose lives have also been dramatically improved. Our dogs have had consultations with veterinarians who provide homeopathy and have had great results in conditions such as: allergies, hyperactivity, incontinence and arthritis. Animals don't know what they are taking, so any placebo effect can confidently be ruled out.

The TGA's role is to protect public safety, not to make value judgements on faulty evidence.

As homeopathy is the safest option of any medicine available, I and the wider homeopathic community strongly support Option 1 and/or Option 2.

To protect my rights and access to homeopathy, I strongly oppose Options 3 and 4.

It is of great concern to me that our rights to access homeopathy will be changed. People need to be given choice, this is our right as Australians.

We need to move forward in the options available to people, not over two hundred years backwards. Lets continue to evolve and allow homeopathy to continue having a positive impact on those who choose to use it.
