

To whom it may concern,

Submission to the TGA re Homoeopathy Regulation

I am in FULL support of **Option 1** to keep homeopathy regulated the way it is.

We use homeopathy in our family as required and wish to continue doing so.

Our fundamental rights to choose our own health care no matter what it is should never be taken from us. Modern medicine has its place and we do use that when need be.

So leave homeopathy the way it currently is. I highly OPPOSE options 3 and 4.
