

I would like the TGA to know that I treasure my homeopathic remedies and the advice and suggestions I receive from specialists in this field.

I value and need my OTC products to have recommendations and usage ideas!

I do not take kindly to the idea that uninformed non users of homeopathic remedies have decided what is and is not good for me.

This proposed legislation is a gross over reach and against my human right to obtain a product I have been using successfully for many years. I strongly object that the TGA Government agency is going to decide on my health choices. I have used homeopathy for many years for myself and often for my family.

Homeopathy has never harmed anyone unlike allopathic and pharmaceutical advice, procedures and so called medications have.

If as mainstream TGA agency employees believe it is a placebo and useless then why are you attempting to remove its availability?

I demand my right to be able to obtain advice and non toxic harmless remedies without side effects whenever I need for my health challenges.

Homeopathy has been used for over two hundred years now and was and still is used by many allopathic health professionals also.

**Please remove option 4 of this proposed TGA ruling!
My health challenges are not the business of the TGA.**
