

To whom it may concern,

I am writing in regards to the "options for the future of "LOW RISK" products, namely homeopathic products" and remedies as mentioned on pages 46-49 of the consultation paper.

I am in support of option 1 - **To keep homeopathy regulated the way it is.**

I have used and experienced homeopathy for the past 30 years and continue to use today on myself and my family.

Medicine does have its time and place, but to look after overall health alternative therapies can and do complement the medical model. I mean isn't that's what it all about, maintaining people's Health and Wellness. Our human right is "FREEDOM OF CHOICE". Freedom to choose how we look after our own health as we see fit. It is and always should be personal choice.

So I am in FULL SUPPORT of OPTION 1. I strongly oppose options 3 and 4.
