

I am writing this letter to express my thoughts on what is being considered regarding the regulation of homeopathy. I am a huge believer in homeopathy and use it for my entire family. I feel that option 1 , and if not then option 2 of the 4 regulatory options is the best option because homeopathy is an important part of my life and my family's and if it were classified as non-therapeutic and banned from being accessible to people, it would be very detrimental to people's freedom of choice regarding the healthcare options for themselves and their families. I strongly oppose options 3 and 4 so please leave homeopathy regulated as it is at present so myself and many other people in the country can access homeopathy to stay healthy.

Yours sincerely
