## Access to Homeopathic medicines in Australia:

I urgently ask you, not to decrease the access to homeopathic medicines here in Australia. Millions of people are using them as a gentle, but mostly very effective help with medical issues.

Cutting off the access would mean, many more people would need to see their GPs and the costs for Medicare would increase, if people can afford to go to a doctor or vet.

I have been using Homeopathic medicines for more than 30 years on all my animals and myself without causing harm.

In Germany you can access those remedies easily through every pharmacy.

**Please leave it as it is !**

Hopefully
