

I would like to offer my submission regarding the availability of homoeopathic medicines.

I strongly support that the availability of homeopathic medicines stay the same as it is today (8/5/17, date of this submission), as mentioned in Options 1 & 2 of the recent proposed changes.

Therefore I strongly disagree with Options 3 & 4.

As a long standing consumer and customer to alternative medicines, including homoeopathics, I have seen the benefit of them to my health, and to that of my children, over the last 30 years and see no reason to jeopardise or change homoeopathic medicines from their existing availability or medicinal structure.

Yours sincerely,
