TO WHOM IT MAY CONCERN

I have used homoeopathic remedies for many years for myself and my two children, starting when they were babies. As babies, the placebo effect would have been irrelevant, yet the remedies were always effective in calming them when nothing else would work. For me this repeated experience is sufficient evidence that homoeopathic remedies are an essential option for our family.

I am greatly concerned that Option 4 of this consultation (Option 4 – Declare homeopathic products NOT to be therapeutic goods) would be detrimental and mean that my family would no longer be able to access tried and trusted remedies for which there are few to no medical alternatives that are suitable for us. I find Option 4 totally unacceptable.

I request that Option 1 of this consultation be selected (Option 1 – Keep homeopathy regulated the way it is).

Yours faithfully,
