To Whom It May Concern

I wish to continue to have access to homeopathic medicines in Australia. This is vital to the well being of myself and my family. I have leukaemia and a host of chronic conditions that go with it and depend on this form of medication, as I am allergic to most pharmaceuticals that I have been prescribed by medical professionals.

We have used homeopathic medicines continuously for the past 17 years.

It is vital what we are able to choose our own form of adjunctive healthcare.

Therefore **I SUPPORT OPTION 1** wholeheartedly.

I'm **STRONGLY NOT** IN FAVOUR OF OPTION 4.

Regards
