

Submission to the TGA Consultation on future regulation of low risk products

I am writing to ask that you implement Option 1, or if not 1, then Option 2.

To protect my rights and access to homeopathy, I strongly oppose Options 3 and 4.

I have been using homeopathy for more than 15 years and I have found it to be extremely safe and effective.

Unlike pharmaceutical drugs, homeopathy poses zero risk of harm or death to anyone. Why would anyone want to restrict access to it as a healing modality?

People should have the right to choose their preferred method of health care, especially when it is the safest form of medicine!

Homeopathic Medicine is a Traditional medicine used worldwide and recognized by World Health Organisation . On that basis alone it should be recognized as a therapeutic option for health care practitioners. Under no circumstances should Homeopathy be removed as a therapeutic option for practitioners.

I strongly support **Option 1. – Keep homeopathy the way it is.**

Regards
