To Whom It May Concern:

Regarding homeopathy in Australia and the current consultation process, I agree with Options 1 and 2, and I strongly disagree with Options 3 and 4.

I raised my family using only homeopathy and can't imagine having done things any other way, and I can't imagine this option not being available to future generations. WHY, after all these years is our government threatening something that works and is safe and non-toxic? Please, I implore this government to leave things well alone.

Please, go with Options 1 and 2.

Thank you.

Kind regards,
