Response to the TGA regarding Homeopathy

I am writing to say the following:-

- 1 Say "NO" to Option 4
- 2 I have been using homeopathic remedies for 28 years. During that period I experienced improved health in both mind and body. It has helped in both acute and chronic situations and consequently I carry my essential homeopathic remedy kit with me.
- 3 I have treated my family, friends and clients and my animals with a good amount of success. I find the treatment used, mainly gentle, beneficial and low in cost.
- 4 The Swiss report on Homeopathy finds that "there is sufficient evidence for the preclinical effectiveness in the clinical efficacy of homeopathy and for its safety and economy compared with conventional treatment".
- 5 The area of Kerala in India now uses homeopathy extensively in treating the general public.
- 6 Millions of people worldwide acknowledge the benefits of homeopathy. It would not be growing at the rate it is if it didn't work.
