

## **TGA Consultation: Options for the future regulation of 'low risk' products**

To whom It May Concern,

I am writing to request that you implement **Option 1**.

I strongly object to **Option 3** and **Option 4**.

Homeopathic Medicine is used worldwide and is the most popular complementary medicine recognised by the World Health Organisation (WHO) and as a result it should continue to be recognised as a therapeutic product in Australia.

Our family use Homeopathic Medicine to treat minor illnesses with great success. All our interactions with Homeopathic Medicine have been positive and by using this form of treatment we as a family place a lesser burden on the Australian medical system which is under immense pressure.

The TGA's role is to ensure that the products and treatments available to Australians are safe for use. It is not to arbitrarily decide what the Australian public can and cannot use especially when safety, as with Homeopathy, is not an issue. Australians have the right to choose which treatments best suit them and Government agencies should not regulate to restrict their access to information about that treatment.

Regards,
