

To the Therapeutic Goods Administration

I make this submission in response to the proposed consultation process that includes changes to the way homeopathic medicines are regulated.

I agree with options 1 and 2 and strongly disagree with options 3 and 4.

I have used homeopathic medicines for many years and find them to be highly effective as a first line of defence for many ailments. Using homeopathic medicines has reduced our family's need to use the health system and reduced the side effects of drugs.

regards,
