

I am writing to ask that you implement Option 1, or if not 1, then Option 2.

I strongly oppose Options 3 and 4.

I have used homeopathy on and off since the early 80's and for my children, with success and no harmful side effects. Its beauty is also its cost-effectiveness, nothing compared to pharmaceutical products.

I have read scientific research on homeopathy and find that your consideration of the materials available is incomplete. I find homeopathy of value and feel that it is my right to have access to it. As well, given my understanding of the research, there is reason to believe that homeopathy is an effective and safe practice as well as one that should be considered because of its reasonable cost.
