To whom it may concern,

I am worried that the restrictions to the sale of homeopathic remedies and services will greatly impact the health and wellbeing of my family as this is the major way in which I treat my family for acute and chronic medical issues. Therefore, I am extremely opposed to Option 4 of the TGA Consultation.

I understand that the TGA is there to regulate and protect the safe use of medicines and the medical practices here in Australia, but I don't approve of the TGA restricting my use of safe, low risk medicines. Especially regarding the ongoing treatment, with homeopathy, for my youngest son with autism. The improvement he has made in the last 6 months under the care of his homeopath has been amazing and all his treating therapists would agree.

Please allow me and my family to continue to use homeopathy as well as conventional medicine to aid our health and wellbeing

Please consider "**Option 1** – Keeping homeopathy regulated the way it is."

Thank you,
