Regarding Consultation re Homeopathics,

This is to assert that I am in agreement with proposition 1 & 2 but strongly oppose 3 and 4.

I feel strongly that it is my choice which medicines I take. I value input into my decision from bodies such as the TGA but fiercely reserve the right to make my own choices.

I would like to also take this opportunity to raise the issue of why analgesics are advertised as ways to ignore the body's signal that it should lie down and rest. It's like cutting the wire in a car that alerts you to the fact that the oil is running low and believing that this addresses the problem.
