Dear TGA,

The Queen is our legal head of state. She has much respect from people, governments and other heads of state around the world.

What does the Queen and other members of the Royal Family use for healthcare?

Homeopathy.

If it is good enough for the Queen ... it is good enough for me.

Secondly, have any of you ever used homeopathy?

Well maybe you should. Then you would find out how effective it can be.

TGA do your job. Which is to protect us from unsafe practices. I think you are looking in the wrong direction. Look to countries such as Germany and Switzerland which have a tradition of using homeopathy for centuries. Safely and with good therapeutic outcomes.

You are going down the path of the witch burnings. Don't destroy what you don't understand.

I as a consumer want to have freedom of choice. I have used homeopathy in the past to support my wellness and it has been very effective. I wish to continue to have this choice. A choice I might add that is of no cost to the public sector as I fund it myself. In fact it is a cost saver to the public purse because my choices which continue to maintain my health mean less doctor's visits, less hospital stays and less drain on our public health system.

I am, in your world, a consumer. Allow me to continue to have free choice in where I spend my money and what I use to support my wellness.

We are supposed to live in a free society where people have freedom of choice. Only option 1 gives me that choice. You may think Option 2 is viable however it is not. That level of research costs a lot of money and these companies making homeopathic remedies don't have that sort of money to do that level of research.

Please allow me as a responsible, intelligent member of society to make my own choices.

I strongly oppose options 3 and 4. They are not the hallmark of a free, democratic society. Don't take my choices away from me.

Thank you,

██████████
