

Homeopathy

10<sup>th</sup> May 2017

I am writing this submission in order to state that I believe that homeopathic remedies should continue to be regulated as per the current scheme.

I object to the motion to declare that homeopathic remedies are not therapeutic goods.

I believe that doing so will restrict access of Australians to safe medicines.

There are many people with chronic illnesses that mainstream medicine cannot help. Although as an Industrial chemist I do struggle with the theories behind homeopathy I believe that we all need access to alternatives as long as they are safe.

Regards
