**Attention: Complementary and OTC Medicines Branch**

Dear Sir/Madam,

I have just become aware the TGA wants to restrict the use of homoeopathic medicines and have called for submissions.

I am using homeopathics and have been for all my life beginning with childhood when my parents treated us with them and medicinal herbs. I am now 75 years of age and in very good health. My parents and grand parents used homeopathics and herbs.

I am devastated and find it unbelievable that you are intending to legislate regarding their legality. Hundreds of thousands of people are killed by prescribed pharmaceutical drugs each year without proper testing. The Royal family use homeopathics and their current longevity is living proof of their efficacy.

Homoeopathics does not have adverse effects and is curative. It is not new but tried and tested with success for many, many years and doesnot pose a risk to health in any way.

Whatever has happened to medical profession being about curing the population and not poisoning us with highly suspect prescription drugs .

Have you researched homeopathics because if so you would definitely have a more balanced approach to this modality and as a bonus be much healthier yourself.

I support options one and two:-

- Option 1. Leave Homoeopathy as it currently stands.
- Option 2. Requires higher scientific evidence for high therapeutic claims.

I strongly DISAGREE and OPPOSE Options 3 & 4.

With respect, Thank you

PS Sadly the time frame offered for submissions appears to be very restrictive and possibly biased.
