

TGA: Four regulatory options under consideration

Option 1 – Keep homeopathy regulated the way it is.

I believe the above option “Keep homeopathy regulated the way it is.” is the only option to go ahead.

I myself and close friends have seen the benefits of Homeopathy and seen how much it has helped a wider community of people. It is simply unacceptable that you would take the option for people away when the main medicine coming from the doctors and health services are unfortunately failing the community on a daily basis.

Taking away such rights to even practice as a homeopath, I believe is against the normal rights of free choice to express for the ones practicing and then also the choice to choose for the ones seeking the services. How can you deny a person who has gone through the normal path of going to numerous doctors and health care professionals and still nothing works so they then feel the need to look for other options, this I believe is the other option for many and it actually works and is improving people's lives.

Please leave this as it is. There is no need for it to be changed.

Many Thanks
