

I support Option 1. I **strongly oppose Options 3 and 4**. I am satisfied Homeopathy is the safest option of any medicine available. I have personally experienced that it is more effective than high-risk, high-cost, patented synthetic medicines and other procedures offered by veterinarians (in my case, for serious feline and canine issues). The same remedies apply equally well to animals and humans. My husband and I intend to commence Homeopathy for our own health and wellbeing. We have shared our Homeopathy experiences with friends, family and acquaintances far and wide.

The TGA's role is to protect public safety, not to restrict access to safe products Australians freely choose to use as therapeutic goods.

Thankyou.
