

AUSTRALIAN HOMEOPATHY

The TGA's role is to protect public safety, not to make value judgments or restrict access to safe products that Australians freely choose to use, as therapeutic goods.

The Swiss Research into Homeopathy clearly gives evidence to support its safe use as a therapeutic system of health care which should be made available to all. This evidence does not seem to have been taken into account. Decisions of this kind cannot be taken without a full and impartial investigation of the evidence available and provided by non-biased bodies. This does not yet, appear to be the case.

In the interests of patient choice and also because of the hugely catalogued dangers of conventional drugs which many people are unwilling or unable to take – Homeopathy should continue to be available under its current status. I therefore support options 1 and 2 and I firmly reject options 3 and 4 of this proposal.
