

I am a consumer of homeopathy and have been for the past 14 years. It has been my therapeutic medicine of choice for both my children and myself and has been an amazing health tool assisting us in many situations over the years. I absolutely love the safety and elegance of homeopathy and I strongly **support** TGA regulatory Option 1 and 2. I believe option 4 or one of the less onerous options is completely **unacceptable** and I plead that this is rejected. Australians should be free to choose what therapeutic goods are in their best interests for their own health journey and therefore **reject** TGA Options 3 and 4.
