

I am writing to ask that you implement Option 1, or if not 1, then Option 2.

I strongly oppose Options 3 and 4.

I have studied homeopathy and find that your consideration of the materials available is incomplete.

I find homeopathy of value and feel that it is my right to have access to it. As well, given my understanding of the research, there is reason to believe that homeopathy is an effective and safe practice as well as one that should be considered because of its reasonable cost.

I ask you to do due diligence in the most professional manner and resist the power of the big pharmaceutical companies that want to destroy everything that they have no way of making huge profits from.

You have a duty of care for all members of our society, I ask that you protect my right to safe effective remedies that will not harm my health any further than western medicine has to date.

Yours sincerely,

Noeleen Braddock.
